THE GIFT OF HONORABLE CHARLES FRANCIS ADAMS

(THE SECOND OF THE NAME)

WHO IN HIS LETTER CONVEYING THIS PROPERTY TO THE TOWN OF QUINCY STATED THAT THE LAND WAS A PART OF THE ORIGINAL GRANT TO EDMUND QUINCY IN 1637, ADDING THAT HE MADE THE BEQUEST (REPEATING THE WORDS OF JOHN ADAMS) "TO SHOW THE VENERATION HE FELT FOR THE RESIDENCE OF HIS ANCESTORS AND THE PLACE OF HIS NATIVITY AND THE HABITUAL AFFECTION HE BORE TO THE INHABITANTS WITH WHOM HE SO HAPPILY LIVED."

"ACTUATED BY THE SAME FEELING, I HAVE WISHED NOW, WHILE IT IS SURELY IN MY POWER, TO DO SOMETHING FOR THE TOWN AND ITS PEOPLE WHICH AS TIME GOES ON, WILL BE OF EVER-INCREASING VALUE AND SERVE TO REMIND COMING NAMES AND GENERATIONS OF THE NAMES AND GENERATIONS THAT ARE GONE."

THIS GENEROUS BEQUEST WAS MADE IN 1885. IN 1895 MR. ADAMS GRANTED TO THE CITY THE PLACE KNOWN AS PINE ISLAND.

IN GRATEFUL APPRECIATION OF THE GENEROSITY OF ONE LONG DISTINGUISHED FOR HIS INTEREST IN AND SERVICE TO THE PEOPLE OF QUINCY AND THE NATION THIS TABLET IS ERECTED 1930

INAUGURAL ADDRESS OF MAYOR THOMAS J. McGRATH,
TO THE MEMBERS OF THE CITY COUNCIL,
MONDAY, JANUARY 5, 1931

Gentlemen of the City Council:

This year marks the beginning of the forty-second year of Quincy's incorporation as a city. Since the first city government in 1889 there have been many changes in the process of evolution from a small city to a corporation which now numbers perhaps 75,000 people, and a present real property value of approximately \$130,000,000. With the steady increase in population came also the steady increase in demands for public improvements, notably for additional school facilities. These demands have been met, and while the cost was large the people of the city have the satisfaction of realizing that in equally balanced development Quincy stands well with the other cities of the state. While we are by no means through with big capital expenditures I feel that this year is an opportune time to limit outlay to those items which are of first importance. For quite a period the city government has been exceedingly generous in extending municipal works, but owing to reduced income this year it does not seem advisable to ask the property-owner to contribute more than is absolutely necessary to maintain our present standards. I hope the members of the City Council will take this view of the situation and thus avert a condition whereby we would be compelled to increase the tax rate. In this connection I believe it well to sound a warning against individual or organized attempts to increase the budget for personal service. There may be a case here and there where justice demands a revision of the salary scale, but in the main those who are privileged to be on a municipal payroll during these hard times are the most privileged of wage earners. Candidates for these preferred services will work untiringly to obtain appointment, but as soon as this is secured we find them immediately joining with others to get greater preference. It seems to be the right time to resist these appeals. When we consider that excellent workmen in the trades have, during a long period, been subject to adverse industrial conditions, the answer to an appeal for more wages or gratuities on the part of city employees should be met with a decisively negative answer by the city government. I am sounding this note of warning because I believe the members of the City Council, as well as the Mayor, have been importuned to grant concessions to those who are already earning good wages and whose employment is guaranteed. If there was ever a time when public expenditure should be closely scrutinized that time is this year. The return for service in every walk of life has been much reduced during the past years, and there is no reasonable excuse for the city to expend beyond the necessary requirements of the different departments. Fortunately the outlay heretofore has been sufficient to extend our street, sidewalk, sewer and water work in such volume that this year's work may be largely concentrated on what the City Council may decide to do on schools, new streets, and completing the big projects tentatively agreed upon. The development of Beale Street and the auxiliary way from Granite Street to Franklin Street are efforts to aid the business interests of the

city, and consequently should receive the whole-hearted support of the city government.

The Schools

Despite the unusual expenditures for new school buildings in the past few years the demand still remains unfulfilled. New buildings or additions are needed in the Wollaston and Atlantic districts, and I hope that early in the year the 1931 building program of the School Committee will be ready for consideration by the Council. The Mayor has been requested to ask the Council for permission to engage an architect for an addition to the Quincy School, but before doing this I hope to arrange a joint meeting of the Council and Committee so that the whole 1931 schedule may be in hand before any action is taken. There is an undeniable demand for additional rooms in the Atlantic district, and this is also true of the Massachusetts Fields and Wollaston areas, but before taking definite action on one it is my thought that other equally urgent demands should be considered by a joint meeting.

The School Committee has been considering three additional school sites, at Germantown, the southerly side of Furnace Brook Parkway, and a lot on the southerly side of Fenno Street, owned by the trustees of the National Sailors' Home. This latter request is now before the City Council. In the matter of the Germantown lot the Mayor was instructed to write to Mr. Arthur Adams, the treasurer of the Sailors' Snug Harbor, but through some fault no answer has come to the city. Another letter will be sent Mr. Adams without delay. The lot on the Parkway is now being considered by the School Committee. My estimate of the cost of these three lots would be from forty to fifty thousand dollars, and is a considerable sum to pledge for locations which, in at least two instances, will not be required for some years to come. Aside from the consideration of these lots the actual needs in Wollaston and Atlantic are urgent and if possible should be given first consideration. In all these districts it is a present matter of additions, which will not demand as much money as would new buildings. With the contemplated development of the National Sailors' Home property a new school in that area will be necessary as soon as this development is carried out. In considering the need for additional school buildings it should be the hope of the Council that as soon as possible the west wing should be added to the North Junior High. It is the intention of the School Committee to make this building a high school center, and with the new west wing pupils from part of the Wollaston section and Atlantic could be accommodated in this building. As this wing would cost approximately \$300,000 it will have to wait until our credits are more ample than they are at the beginning of the year. If, however, we must wait until another time to complete the building the grounds surrounding the North Junior should be developed. Anticipating that the Council feels an interest in this work, I have asked Mr. Herbert Kellaway, the landscape architect, to prepare a new plan for grading, and this, with an estimated cost, will be sent to the Council so that if the matter is agreed upon work can be started in time to give the lot a better appearance this summer.

Streets

As there has been so much street rebuilding work done in the past year the present program of such work does not embrace more than three major projects. City Square from Dimmock Street to Granite Street should be reconstructed, and Hancock

Street from Granite Street to School Street should be improved. Now that the drainage work in Standish Avenue is done this important thoroughfare should be rebuilt from Hancock to Beale Streets. Elm Avenue from Hancock to the junction of East and West Elm is not in the best condition, but a method may be found to improve the surface without a great expenditure. There are other streets which may be rebuilt, but these are of minor importance compared with the streets named in this paragraph. The City Council has already given its consent to the widening of Beale Street, and I presume that it is the intention to complete the undertaking by installing a new bridge. With this in mind I have approached Mr. Tuttle of the New Haven to give us a plan of the proposed bridge, and this he has consented to do.

Another matter which should be decided this year is the proposed extension of Franklin Street. Under an agreement made with the Council the Granite Street end was cleared and used during the holiday season. The city's lease was for five months, which brings it to a close in March of this year. Whatever doubts may have been had concerning the utility of this way there can be no doubt as to its utility as a parking space. From the moment it was available it was in constant use, and one might naturally conclude that as a parking area and as a necessary auxiliary street this proposed way has many merits. At any rate it was splendidly useful during the holidays and measurably helped in increasing holiday trade.

The City Hospital

Work on the new operating room is progressing at a favorable pace, and with its completion the facilities of this institution will be adequate for a few years. The city could, if means were at hand, keep on constructing new buildings, but for the present the work of the hospital will not suffer if we stop with the completion of the present program.

Protection of Life and Property

The Council has granted four additional policemen, and today you received a request from Chief Sands for six additional men. This means an addition of ten men in both departments, and entails an expense of at least \$17,000, which is a considerable sum to add to the year's budget. This increase in service costs is inevitable in a city where the calls are so many, and consequently I am willing to support these requests to the Council.

New Streets

The demands for new streets will probably be as numerous as in other years. At the beginning of the year it is always necessary to know just what credits are available as of January 1, and what will be available as the year goes on. On January 1 our borrowing margin was \$223,385, and this will be increased up to July 1 by the sum of \$308,000, giving the city a total credit after July 1 of \$531,385. If we should allot \$125,000 for new streets the balance would be \$406,385. The railroad's estimate of the cost of a new bridge at Beale Street was \$197,000. This cost contemplated a wider bridge, with 18 feet headway, with tracks lowered so as not to change the present grade of street. I am only quoting this estimated cost to show that in this one undertaking the cost is much more than was originally planned. Revised estimates may substantially reduce this cost. If the Council decides on some action relative to the street through the Edwards Meadows the cost

of this work must be kept in mind, and by grouping it with the Beale Street project our available funds after allotting for new street construction would not much more than satisfy the demands of these two enterprises. After July we will have other credits, but these will be in relatively small amounts, with a total in the five months—August to December—of \$205,000. It may be that the Council will decide to clean up these big jobs before launching other appropriations of secondary importance.

Late last year the Council authorized an expenditure of \$15,000 to cover the ditch from Holbrook Road to Wilson Avenue. At the time this sum was requested it was known that it would not be sufficient to complete the work, and as no start was made a new estimate will be sent to the Council, and if the money is made available work can be begun early in the year.

Sewers

The three important sections to be considered in sewer extension are Squantum, Adams Shore and Houghs Neck. About two miles have been laid in Squantum, and our concentrated effort for 1931 should be in this district. All our work has been done on the westerly side, but the most essential work—to continue the trunk sewer along the easterly shore—should be done this year. This is an expensive project, but by the ruling of the Metropolitan District Commission the installation of a pumping station depends on the city's development of a greater sewerage area. This means the construction of the easterly trunk and such laterals as will convince the Commission that sufficient houses are connected to warrant the construction of the station. Our main effort this year should be in Squantum, not overlooking, of course, the need of providing all new streets with sewers. The culvert across Hancock Street near the Atlantic fire station will be built this year. When this is done the efficiency of the drainage system which flows through this culvert will be demonstrated, and a condition which has bothered the city for years greatly improved.

Comfort Station

The plea for a Comfort Station has been brought to the attention of the city government many times, but so far it has been impossible to get consent for this necessary facility. The growth of the city clearly demands that something be done, and I feel confident that this year we can meet this problem. Heretofore the location of such a station has always been placed within the shadow of City Hall. From a study of actual conditions as they developed during the Christmas season it seems that such a building should be located nearer the business center, which apparently is somewhere in the vicinity of Granite and Hancock Streets. It may be that the city could find a suitable site in the vicinity of this location and either as owner or tenant develop an adequate comfort station.

Sidewalks

The success of the asphalt sidewalk has been demonstrated and consequently the city should continue its policy of installing this type of walk. Some sections have been liberally treated in the matter of new walks, and this year we should give attention to the districts which have not been favored.

I am incorporating in this statement to the Council a few statistical tables which I believe we can all profitably study. Figures in

these tables show how generously the city has been spending in the past and show also the danger of increasing these expenditures beyond the ability of the taxpayer to pay his share of this cost.

Quincy's Future

I believe that all look forward to a greater industrial activity and in this revival harbor the wish that our city may share in the allotment of industrial settlements. The city will perhaps always remain a preponderantly residential city, but the need for industrial and commercial enterprises is necessary to give permanence and growth. Urban populations have always depended on some large center for opportunities to earn a livelihood, but in the changing order all communities must furnish some opportunities for employment within their own borders. Quincy needs industrial development, but until the New England area is restored to its former status as an industrial center our own city as well as other communities must wait until the restoration of the old conditions. In the meantime property owners must resign themselves to a situation which forces them to wholly bear the cost of maintaining a modern progressive city. When, however, the revival comes we may confidently expect that this city with its many natural advantages will share in this industrial rehabilitation.

BORROWING MARGIN FOR 1931

Net valuation, 1928	\$134,509,873	
Net valuation, 1929	143,910,564	
Net valuation, 1930	148,288,327

December	49,000	8,000
	<hr/>	<hr/>
	\$445,000	\$68,000

FUNDED DEBT

Total funded debt of the City, January 1, was \$5,520,000. During the year this was reduced by payments as follows:

City debt within limit	\$383,500
Sewer debt within limit	75,000

Outside debt limit:

Sewer	\$20,500
Water	111,000
City Hospital	19,000
High Schools	54,000
South Junior High School	30,000
Government School	16,000
Montclair and Houghs Neck Schools.....	14,000
Southern Artery	32,000
Monatiquot Bridge	10,000
	<hr/>
	\$765,000

The funded debt during the year has been increased as follows:

Within the debt limit:

Sewer	\$100,000
New streets	380,000
Sanitary sewers	50,000
Montclair and Houghs Neck Schools.....	27,000
Gridley Bryant School	40,000
North Junior High School	80,000
Adams School addition	70,000
Hospital building	110,000
Hospital operating room	40,000

Outside debt limit:

Water	85,000
Schools	200,000
Hospital	10,000
	<hr/>
	\$1,192,000

The funded debt of the City is as follows:

School buildings, furnishings	\$2,654,000
Water	737,000
Sewer	568,500
Drains	156,000
Hospital building	569,000
Fire	30,000
Police	50,000
Streets	1,036,500
Permanent walks	5,000
Cemetery	4,000
Southern Artery Loan	137,000
	<hr/>
	\$5,947,000

From the financial exhibit which is made a part of this statement to the City Council it will be obvious that new indebtedness can be undertaken only when absolutely necessary. On a present showing of \$5,947,000 of indebtedness the per capita cost is \$82.59, using the census showing 72,000 in population in computing this cost. On the basis of the 1930 assessed value of real property (\$129,867,175) the ratio of debt to this value is 4.5 per cent. The figure of the ratio is not alarming but the per capita statement deserves study. Our per capita debt in 1917 was \$43.15, in 1927 it was \$79.33, and \$78.60 for 1928. The present cost shows a tendency to go beyond a safe limit when the greater part of this burden is borne directly by the home owner. Although figures and percentages do not always tell the exact condition of a city I am convinced that with our true knowledge of our circumstances we can take these statements of rising costs as a sharp reminder that the city may prudently establish an interregnum in all but demonstrated and urgent needs.

We are at the threshold of a New Year. The problems of the year will not differ greatly from the problems of other years and the momentous decision for the city government is to determine what proportion of demands can be granted. But whatever the result of our deliberations I feel that we are all pledged to give the city the best that we can, and with this pledge ever uppermost in our thoughts it is safe to predict a successful year for the city government in 1931. Whatever service the Mayor can give is freely and sincerely placed at the disposal of the City Council.

CITY GOVERNMENT—1931

MAYOR, HON. THOMAS J. McGRATH

SECRETARY, WILLIAM C. CANNIFF, JR.

Secretary of Board and Superintendent of Schools

JAMES N. MUIR

The regular meetings of the School Committee are held at 8 o'clock P. M. on last Tuesday of each month except July.

REPORT OF THE AUDITOR

JANUARY 1, 1931.

HONORABLE THOMAS J. McGRATH, *Mayor*:

In accordance with the ordinance of the City, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the City at the close of the financial year, December 31, 1930.

ELIZABETH N. DUNN,

Auditor of Accounts.

IN COUNCIL

Order No. 158

FEBRUARY 17, 1930.

Ordered:

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1930, and ending December 31, 1930, to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Bonds, Interest, and Expenses of Water Department be paid from Water Receipts.

REPORT OF BOARD OF ASSESSORS

JANUARY 1, 1931.

HON. THOMAS J. McGRATH, *Mayor*:

Dear Sir:—The following is respectfully submitted as the report of the Assessing Department for the year 1930:

Valuation

Value of buildings	\$90,045,900 00
Value of land	39,821,275 00
Value of land and buildings.....	\$129,867,175 00
Value of personal property	11,891,550 00
Total valuation of the city as determined April 1, 1930	\$141,758,725 00
Tax rate	28 00
Amount to be raised by taxation	\$3,969,244 30
The valuation was also increased by omitted assessments levied in December, 1930	\$7,800 00
Valuation of automobiles, December 31, 1930.....	\$7,274,870 00
Total valuation of the city including automobiles for 1930, was	\$149,033,595 00

Recapitulation Budget of 1930

City Appropriations	\$3,520,563 24
City Debt	654,000 00
City Interest	188,858 74
Temporary Loan Interest	125,000 00
Deficit Overlay	32,161 02

State Assessments:

State Tax	123,060 00
Metropolitan Sewer ..	84,757 58
Metropolitan Parks	97,109 99
Fire Preventive	1,154 59
Charles River Basin	16,254 72
Neponset Bridge	9,886 55
Planning Board	782 20
Mass. Highway	2,449 76
Auditing	1,615 61
Southern Artery	1,752 12
Soldiers' Exemption	184 41
Smoke Nuisance Abate.....	719 65
Grade Crossing	6,540 00
Snow Removal Tax	322 00
Ways in Malden, etc.	2,901 36
State Aid and Pensions.....	370 00

County Assessments:

County Tax	152,168 15
County Hospital	35,736 68

Overlay (of current year)	35,031 54
---------------------------------	-----------

Total	\$5,093,379 91
-------------	----------------

Estimated Receipts

Income Tax	\$472,011 01	
Corporation Tax	112,548 69	
Bank Tax	4,981 35	
Licenses	7,681 00	
Fines	6,833 09	
Special Assessments	112,176 65	
General Government	10,344 22	
Protection of persons and property.....	8,627 92	
Health and sanitation	21,274 66	
Highways	9,112 46	
Charities	16,051 82	
Soldiers' benefits	925 00	
Schools	13,574 07	
Libraries	3,027 20	
Recreation	21,898 00	
Cemeteries (other than from trust funds and sale of lots)	18,469 23	
Interest on deposit	70,904 80	
Interest on taxes and assessments	37,811 68	
Motor Vehicle Tax	132,212 76	
Poll Taxes	43,670 00	
<hr/>		
Total estimated receipts	\$1,124,135 61	
Net amount raised by taxation on property.....	\$3,969,244 30	
Number of polls, 21,835, at \$2.00 each	\$43,670 00	

The Building Inspector's report of new buildings for the year ending January 1, 1930, a period corresponding approximately with the taxable period of one year ending April 1, 1930, was \$4,565,448, while our increased assessment of buildings for the year showed but \$2,845,450—a difference of \$1,719,998. To this last amount should be added some \$800,000, making a sum in excess of \$2,500,000, which represents a tax reduction on buildings. The \$800,000 referred to is the amount of a tax levied this year on the liberal development in and around City Square, on which a part of the tax was levied in the previous year and then accounted for in the Building Inspector's report.

As the year closes, looking back to the April 1st assessment date, this reduction of value amounting to \$2,500,000, seems to have been quite properly made, and a logical conclusion must be that unless the present general real estate and business situation soon improves, the 1931 assessment of April 1st will show many reductions and a very serious shortage of the City's total value.

Because of this most liberal development, as above noted, and its immediate popularity we recognized an apparent change of center in City Square and moderate reduction of land values were recognized in the southerly portion of the Hancock Street business district.

Some other changes of centers have been noted with consequent changed values, but the areas so affected have not been very extensive.

Assessors' Budget and Additional Work

Outside of the statistical part of our report relating to assessments and valuations which we submit upon its merits, we respectfully ask for some consideration of the increasing volume of our regular work, both in the field and in the office, and the added burdens yearly brought to our department—not overlooking the fact of

reduced office expenses which our efforts and the cooperation of our clerks have brought about.

Substantiating our claim of reduced expenses we refer to the yearly report, showing that the average yearly budget appropriation since the present board has served of \$31,532.00 per year (some \$4,000 less than the average for the two preceding years) was this year brought down to \$30,772.00—this amount including some modest increases of salaries in 1928.

Motor Vehicle Excise Tax

Much of the added work of the department is occasioned by the Motor Vehicle Excise Tax first operative in 1929. This tax necessitates writing separate bills, an individual valuation book, and a separate commitment to the Tax Collector. The automobile values are made by the clerks from the Tax Commissioner's valuation list—incidentally reducing the work of the Assistant Assessors who previously made a house-to-house canvass to assess a property tax on automobiles. Of the total number of 21,170 motor vehicles taxed in 1930, previous to December 31st, 5,167 Excise Tax Abatements were made, but it must be kept in mind that nearly all of these abatements were for exchanges, the law providing for a tax only for the number of months which a car is in use, and but 392 abatements were made for overvalue.

Betterments and Sewers

Previously all betterment taxes were billed by the departments where they originated and for the full amount, apportionments being made only on request of the taxpayer after receiving the bill. Now all street and sidewalk betterments are billed by the Assessors and all, including main sewers, are apportioned over a period of years. For this work a Deferred Assessments Revenue Book was installed which is comprehensive and requires considerable time to keep it accurate and up to date.

Transfers

Transfers of property, tax sales, and land court titles entail a great amount of detail work which is constantly increasing in volume.

Court Cases

Only one appeal from our decision on request for abatement of taxes was taken to court—this complaint being placed before the County Commissioner who, after hearing, dismissed the case.

Office

The office equipment is now substantially complete and up to date for immediate future needs, but a serious handicap to complete efficiency is the lack of needed room, which obviously grows more serious each year. If we could be provided additional quarters and in a way which we would like to suggest, we feel confident we could reduce the expense of this office the coming year sufficient to nearly, if not wholly, pay the cost of such work and this without seriously discommoding any other department.

Most respectfully submitted,

MICHAEL T. SULLIVAN,
J. WINTHROP PRATT,
ALBERT NELSON.

Board of Assessors.

REPORT OF COLLECTOR OF TAXES

To His Honor, the Mayor of the City of Quincy:

I have the honor to submit the following report of the Tax Collector's Department for the year ending December 31, 1930:

JAMES B. WHITE,

Collector of Taxes.

REPORT OF DEPARTMENT OF HEALTH

JANUARY 31, 1931.

HON. THOMAS J. MCGRATH, *Mayor, Quincy, Massachusetts.*

DEAR SIR:—The following is my fourth and last report as Health Commissioner for the City of Quincy. Owing to discontinuance of my duties in the Health Department, I have been unable to score the work of the Health Department activities for 1930 as has been done in the three previous years. However, I might say that, except in a few particulars, the standard of work done in 1930 is as high as that done in 1929.

"The Appraisal Form for City Health Work" as published by the American Public Health Association recognizes fourteen major divisions in city health work. This Appraisal Form, unfortunately, is not yet in common use, so that comparisons with other cities of comparable population is rather difficult. However, I shall mention some salient feature of each one of these divisions of public health work as carried out in Quincy during the year 1930.

Vital Statistics

No criticism—considerable credit due to City Clerk Emery Crane.

Communicable Disease Control

For the first time in the history of the city, there was no death from diphtheria. This is all the more remarkable when one considers that in 1888, when Quincy was incorporated as a city, the population was comparatively small. There was no case of diphtheria reported for five months. This was due to the constantly increasing use of toxin-antitoxin. On February 19th of this year it was reported at the White House Conference (on Child Health and Protection) that Quincy was at the head of the list in this state in cities between 65,000 and 104,000 as to the percentage of children that had received immunization against diphtheria. This percentage was about 31. When the anti-diphtheria campaign was first started in 1926 there were four deaths.

Venereal Disease Control

The clinic was divided into two divisions—one for each sex. An attendant was furnished in each clinic to help the physician. Because of the very few visits made by the average gonorrhea patient, it seems as if this phase of Venereal Disease Control in Quincy were hardly worth while. Many such cases cease treatment uncured or wander to other agencies. The syphilis patients, however, continued treatment. Many cities are doing much better work in this health activity.

Tuberculosis Control

The budget item for control of tuberculosis is by far the largest in the Health Department expense sheet. It is to be hoped that in a few years this expense will be decreased, due to efforts now being made to prevent the childhood case which eventually becomes the adult case.

Maternity Hygiene

Very recently the Quincy Hospital has opened a Pre-Natal Clinic. A tremendous amount of the infant mortality in Quincy

is due to conditions existing before or at the time of delivery. It is hoped that this new clinic will help to reduce the high infant mortality in the early days of life.

Infant Hygiene

The truest test for the efficiency of Public Health work in any community is the infant mortality. During 1930 Quincy had the lowest infant mortality during its existence as a city. In other words, out of one thousand babies born during the year only forty-six died.

The average infant mortality during the last eight years has been 53. It is interesting to note that in the babies registered in the clinics during the same period that the mortality average has been slightly over 4.

Pre-School Hygiene

One weekly clinic at Woodward Institute.

School Hygiene

This is under the care of the School Committee.

Food and Milk Control

The percentage of pasteurized milk dropped from 96 per cent to 93 per cent. There should be a full-time food inspector, due to the fact that there is no restaurant inspection in Quincy whatsoever. A constant increase in the use of drug stores as restaurants makes this advisable.

Sanitation

There have been three sanitary inspectors during the year; therefore the work has been somewhat unsettled. Industrial nuisances continue to give trouble.

Laboratory

Regular routine work as in preceding years.

Popular Health Instruction

Acting on your orders, the monthly bulletin of the Health Department was discontinued early in the year. This had been published since June, 1927, and had a mailing list of 750. More space has been given in the "Quincy Daily Ledger" and "Quincy Evening News" to public health and to the education of the public in health matters than ever before. Transition from policeman to teacher has affected both the work and point of view of health officials. So true is this that nearly every activity of a State Department of Health attempts more or less directly to instruct, interest and lead local officials and citizens to do the right thing for their own well being and that of their neighbors.

Cancer Control

The health department has not even made a start in this weighty problem.

Heart Disease Control

The commonest cause of infectious heart disease arise during school life. Therefore, the campaign against heart disease is largely in the hands of the family physician and the school department.

The salary of a Nutrition worker was paid from city funds during October, November and December.

Your Health Commissioner, at his own expense, attended the White House Conference on Child Welfare in November. Quincy was one of eleven cities in this State covered by a searching and exhaustive nation-wide study made of the medical care of children. These cities were Boston, Fall River, Springfield, Lowell, Lynn, Newton, Brockton, Pittsfield, Holyoke, Somerville and Quincy.

It is recommended that both the nutrition work and the work in preventive dentistry should be continued. The first activity was ably carried out by Miss Dorothy Lane and Dr. A. E. O'Malley demonstrated most thoroughly the ease and economy with which one could do dental work on pre-school children.

Mr. Alexander Robertson resigned as sanitary inspector in May, 1930, to accept a much better position as health officer in Bar Harbor, Maine. Mr. Robertson showed considerable vision and enthusiasm in his work, and the change was a marked loss for the Health Department. The loyalty and cooperation of Health Department employees during the year has been most gratifying to the Commissioner.

In closing this report I should like to repeat a statement that I made in the first Health Department Bulletin in June, 1927. "Emphasis is to be laid on two principal activities of the Department—first, the prevention of disease; second, the health of the child."

How efficiently this has been done during the last four years you and the citizens of Quincy know.

Truly yours,

E. B. FITZGERALD, M.D.,

Health Commssioner.

REPORT OF SUPERINTENDENT

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR: I hereby submit my annual report of the Department of Health for the year ending December 31, 1930.

The personnel of the department is as follows:—

Commissioner of Health and Inspector	
of Milk	Dr. E. B. FitzGerald
Superintendent	Thomas G. Smith
Clerk	Verna M. Kelley
Sanitary Inspector	A. A. Robertson
Inspector of Meats and Provisions	Howard Rogers
Dispensary Physician	Dr. C. J. Lynch
Child Welfare Physician	Dr. Rachel L. Hardwick
Venereal Disease Physician	Dr. E. E. Smith
Bacteriologist	Dr. E. E. Smith
Tuberculosis Nurse	Gertrude T. Russell, R.N.
Tuberculosis Nurse	Mary E. Keeley, R.N.
Contagious Nurse	Catherine F. Coleman, R.N.
Child Welfare Nurse	Nettie D. Fowler, R.N.
Child Welfare Nurse	Mary E. Marr, R.N.
Inspector of Animals and Slaughtering	Dr. E. A. deVarenes
Statistician	Abraham Pactovis

Under date of June 15th Mr. A. A. Robertson resigned to accept a position as Health Officer in Bar Harbor, Maine. His position was filled by the temporary appointment of Abraham S. Pactovis. Mr. Pactovis assumed the duties of Statistician and Sanitary Inspector until October 1st, when he resigned to resume his study in college. He returned under date of November 1st and was appointed as Statistician, part-time.

Miss Dorothy M. Lane was appointed Nutritionist, March 1st, under the auspices of the Red Cross, until October 1st, at which time this department procured an appropriation until the close of the year.

Under date of November 1st, Roy W. Cramond was appointed as Deputy Commissioner and he assumed the duties of Sanitary Inspector.

Appended you will find the report of the various nurses and inspectors.

See Auditor's report for statement of receipts and payments.

Respectfully submitted,

THOMAS G. SMITH,
Superintendent.

REPORT OF CONTAGIOUS DISEASE NURSE

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—I herewith submit my sixth annual report of contagious disease work for the year ending 1930.

1594 cases of notifiable diseases were reported as follows:—

Measles	771
Scarlet fever	343
Chickenpox	106
Mumps	78
German measles	78
Whooping-cough	88
Dog bite	39
Anterior poliomyelitis	13
Lobar pneumonia	51
Influenza	8
Diphtheria	7
Septic sore throat	5
Typhoid fever	3
Rabies	1
Ophthalmia	1
Malaria	1
Cerebro-spinal fever	1

Nursing Visits	By Contagious Disease Nurse	By Other Nurse
Scarlet fever	972	104
Measles	1,447	207
Diphtheria (cultures 68).....	64	10(cultures 23)
Whooping-cough	107	
Anterior poliomyelitis	19	
Typhoid fever (cultures 10)	10	
Venereal disease	14	
Chickenpox	1	
	<hr/> 2,634	<hr/> 321 Total 2,955

Scarlet Fever

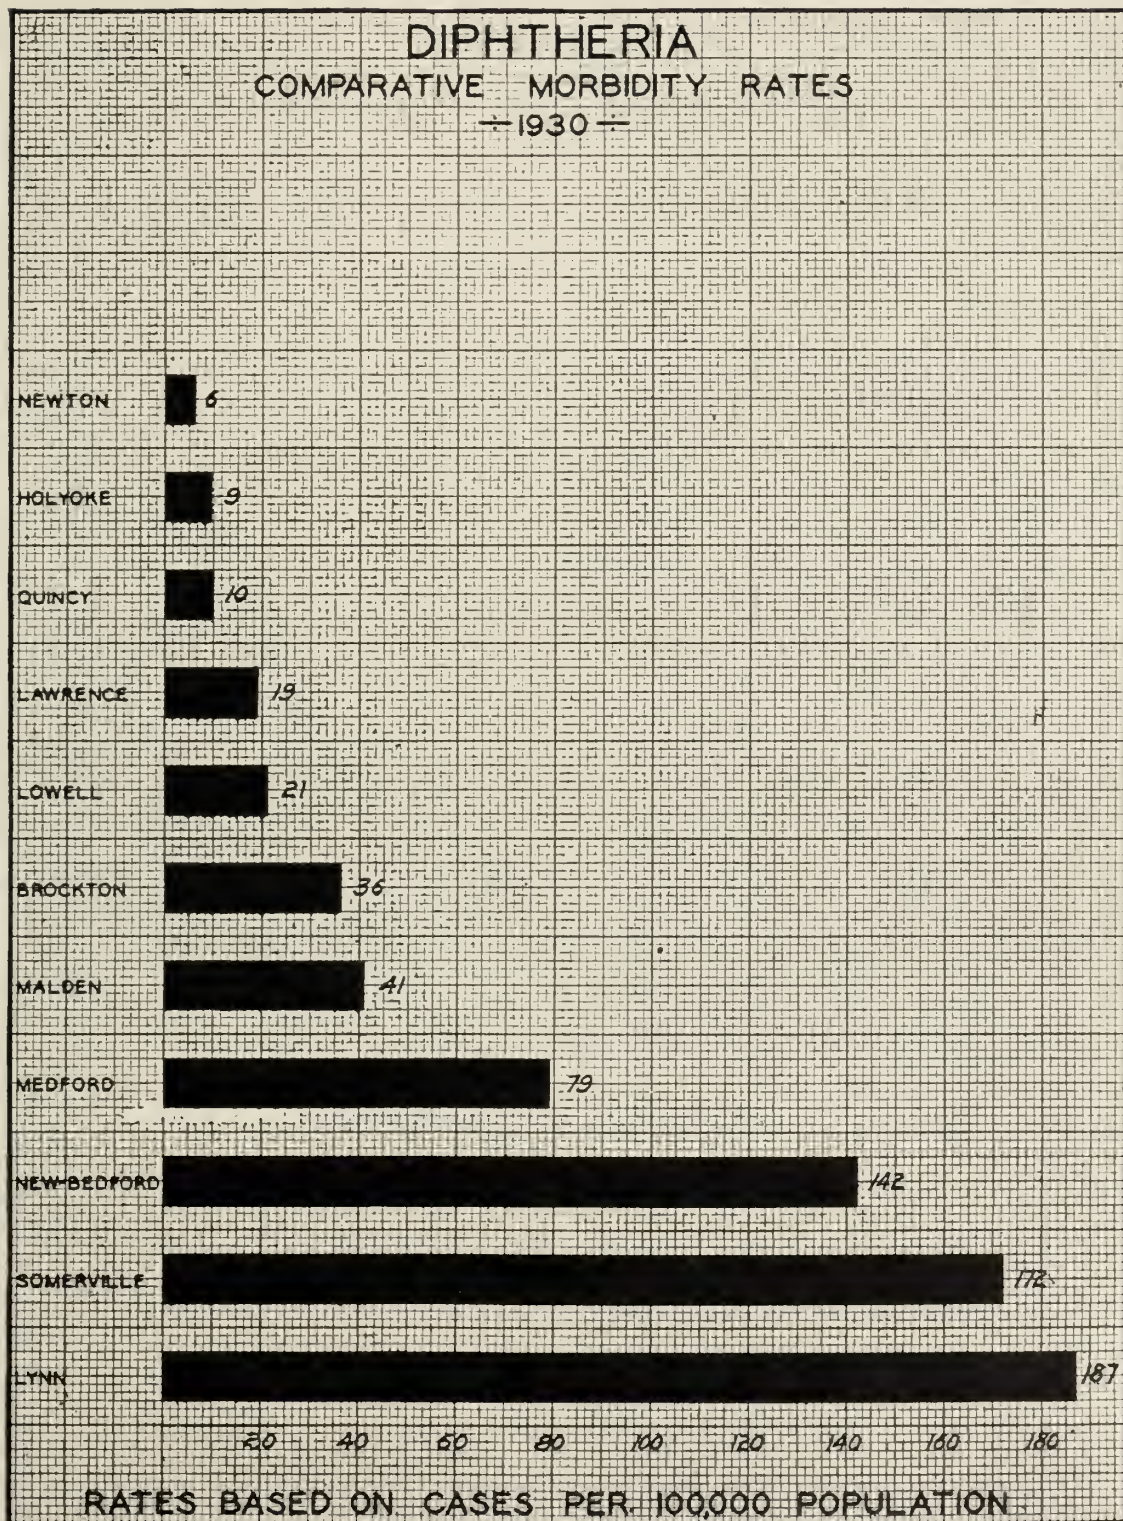

The majority of these cases were of a mild type and occurred in Ward 6. Thirty-five cases were cared for in the hospital. One child died at home.

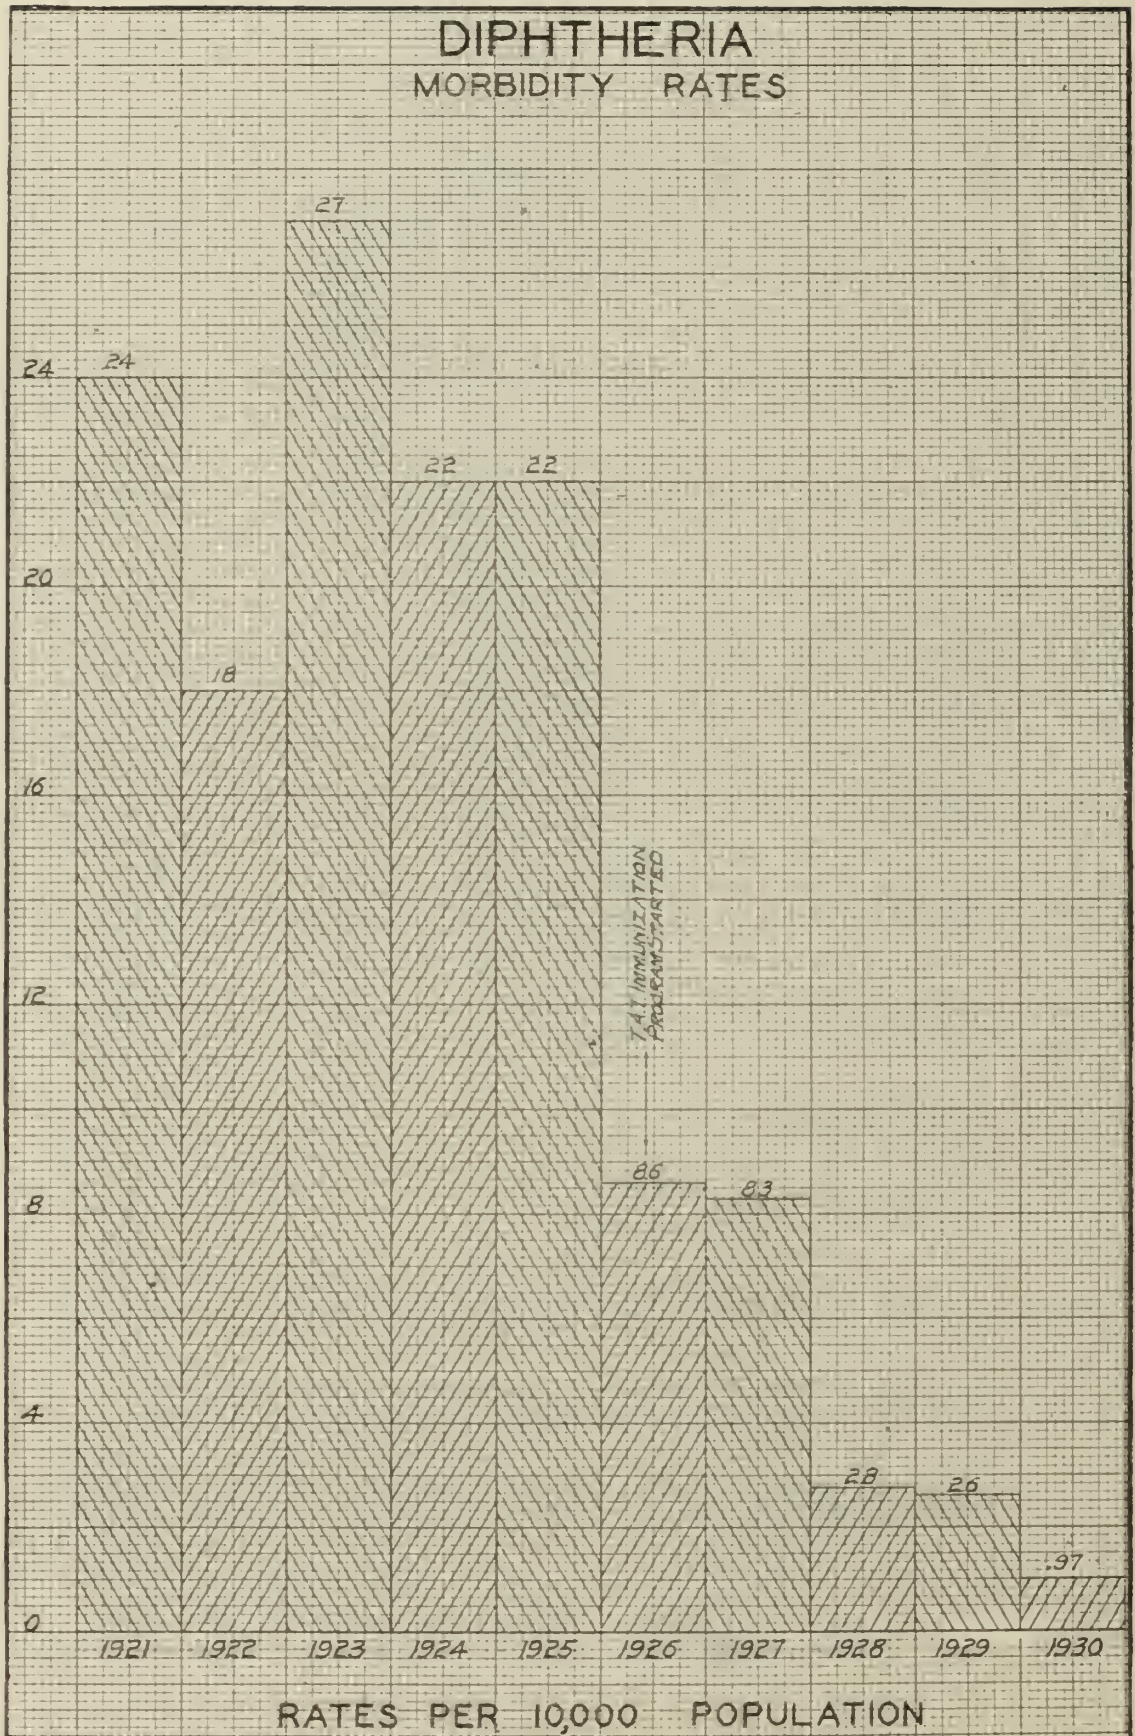

Diphtheria

There were seven cases reported during the year, eleven less than last year. As in the year previous, prevention clinics were held in the various wards. Continuing the policy adopted three years ago, this department cooperated with the School Department in giving these treatments in all the Grammar Schools. A total of 1,231 children were immunized during the year.

Anterior Poliomyelitis

Of the thirteen cases reported, eight were cared for in the hospital. There were four deaths from this disease. The majority of these cases occurred in Wards 5 and 6. There were four cases in one family, a very unusual occurrence.

Measles

This was one of the important diseases to show an increase over last year, 771 cases being reported. The majority of these cases were in Wards 1 and 2. There were three deaths from this disease.

Typhoid Fever

Three cases reported, two of which were hospitalized. One of these cases was a contact. No definite history of the source of infection could be obtained in the other cases.

Whooping-cough

There were three deaths from this disease.

One hundred and sixty-one various clinics were attended during the year. Assistance was given at the physical examination, as well as the dental examination of the children in the first grade of the Parochial Schools.

Sixty visits were made in the homes to obtain histories for the White House Conference.

Office hours were held daily:

9-9.30 A. M.

1-1.30 P. M.

In the follow-up work, 2,634 visits have been made, including checking up of quarantine rules, taking of cultures, examination of contacts and releases from quarantine. Visits have been made to St. John's and St. Joseph's Schools in connection with the work.

Respectfully submitted,

CATHERINE F. COLEMAN, R.N.,

Contagious Disease Nurse.

REPORT OF THE PHYSICIAN FOR VENEREAL DISEASES

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—During the year 1930, forty-four (44) individuals came to the two clinics for advice, examination, or treatment as follows:—

Received treatment for:

	Male	Female
Gonorrhoea	11	1
Syphilis	10	7
Wasserman tests for syphilis	23	23
Smears for gonorrhoea	20	4
Irrigations for gonorrhoea	74	0
Injections of bismuth for syphilis	137	76
Injections of arsphenamine for syphilis	99	35
Total number of visits	325	122

Respectfully submitted,

EDWIN E. SMITH, M.D.,

REPORT OF DISPENSARY PHYSICIAN

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR DOCTOR:—The dispensary records during the past year reveal that Quincy has had a marked increase in pulmonary tuberculosis. During 1929 sixty-nine new pulmonary cases were reported, whereas in 1930 there were ninety-six. This was true of the entire state, as at times the state sanatoria had to call upon private sanatoria to take care of their overflow. Despite this increase of new cases, we had less active cases at the end of the year. During the past year we hospitalized over 60 per cent of the active pulmonary cases, and over 90 per cent of the active childhood type were sent to the sanatoria.

Early diagnosis, immediate hospitalization and vigorous check-up on all contacts is the right way to attack and control tuberculosis. That is what we are doing in Quincy—and better during the past year than any previous time.

I doubt if any other city of our size is doing more than Quincy. The budget appropriation for tuberculosis is large—both for the childhood and adult type of tuberculosis. The spirit of cooperation between the administration and physicians in general practice is enviable. This is as it should be and should be continued.

Number of new contacts reported and examined are increasing and this is a sign of progress. The importance of focal infection in all cases is stressed and there was a noted increase of correcting defects from diseased tonsils, bad teeth and all sinus trouble. More tuberculin tests were done and more X-rays were taken during the year.

“Camp”

The usual good results were obtained from our Norfolk Health Camp during the year. A new venture during 1930 was sending a group of older girls, 14-17 years, for eight weeks, and results seemed worth while. This group composed girls who were camp cases in their early ages and who now are latent Hilum cases and need further attention. This group was afterwards formed into a health club, and attended lectures twice a month at the dispensary during the last three months of the year. This method kept us in touch with these cases. All enjoyed the classes and they increased in weight during this time. Both these ventures are worth while and should be continued.

“Undernourished Clinic”

The clinic is showing its usual yearly progress. The physicians during the past year have made far more use of the dispensary equipment for quick and efficient diagnosis. This is gratifying and I hope it will continue.

But, despite all this, I feel the time has arrived when the childhood type of tuberculosis should be attacked in a much bigger way. The source and supply of these cases is mainly in the schools, and it is here that we should make our big fight to overcome the condition of juvenile tuberculosis.

In your schools you have a general enrollment for education. Conjointly you should also have an enrollment for health. Education at the expense of health is futile.

Other states and cities have adopted measures along these lines and are getting good results. For some few years, Boston, for

12½c per pupil per day, has attracted attention to her good results. Quincy should not lag behind.

I have already presented the idea to the school committee and received unanimous approval. The obstacle presented is that there are no rooms available. Rooms should be provided. Economically, the idea is sound. Furthermore, the welfare of the children demands that some plans should be adopted.

In closing, I would again advise a trained social worker for the city. Such a person working in conjunction with the present agencies would add great efficiency and in time would be an economical investment for the city. A detailed report of the adult and juvenile clinics at the dispensary for the past year is included.

Respectfully submitted,

C. J. LYNCH, M.D.,

Dispensary Physician.

REPORT OF DISPENSARY NURSES

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*:

DEAR DOCTOR:—We herewith submit to you our annual report for the year ending December 31, 1930.

Cases of pulmonary tuberculosis in the city	283
Active cases	111
Arrested cases	116

Negative for T. B.	22
Diagnosed Pulmonary	9
Suspicious Pulmonary	5
Tuberculin tests done on adult patients	33
Negative	9
Positive	24
Total number of deaths reported in the city for the year.....	40
Died at home	20
Died at Norfolk County Hospital	17
Died at Tewksbury State Infirmary	1
Died at Vermont Sanatorium	1
Died at Quincy City Hospital	1
Adult clinics held during the year.....	49
Attendance	130
Registration	56

There were only three minimal cases of tuberculosis reported for the year.

Total number of visits made during the year by both nurses	1,989
Cases referred to Public Welfare Department for aid	20
Cases referred to City Physician	14
Cases closed and addresses forwarded to other cities and State Department of Public Health	15
Cases reopened	5
Visits made to ex-sanatoria cases	422
Milk provided for needy patients by the Norfolk County Health Association and the City(quarts)	4,687
Information received from doctors regarding condition of private patients	7
Number of sputum examinations made on Quincy cases	119
Cases closed out as non-tubercular	7
Number of new contacts on record during the year	243
Number of new contacts who consented to examinations	190

All ex-sanatoria cases which could be located were visited in the home by the dispensary nurses, with the exception of private cases. All homes were visited upon report of a new case and disposition made. All homes were visited after a death and advice given. All active cases were supplied, free of charge, with sputum boxes, paper napkins and paper waste bags—so that all possible precautions could be taken for contacts. No case was visited without permission of the attending physician.

All cases going to Norfolk County Hospital as patients or for X-rays were provided with transportation by the nurses.

Undernourished and Contact Children's Clinic

Number of clinics held during the year	95
Attendance at clinics	1,883
Registration at clinics	296
Total number of contacts examined during the year	570
Total number of new contacts examined	108
Cases referred to the Quincy City Hospital for tonsil and adenoid operations	62
Cases referred to the Kiwanis Club for tonsil and adenoid operations	6

Cases referred for dental work	106
Vaccinations done on city cases	14
Tuberculin tests done	225
Negative	87
Positive	127
Referred to Norfolk County Hospital for X-ray of chest.....	174
Registration of children at North Reading and Westfield Sanatoria for the year	65
Registration of children at North Reading and Westfield Sanatoria at end of year	35
Suspicious cases discharged "Well" no disease	7
Childhood type discharged "Apparently Arrested"	15
Childhood type discharged against advice "Improved"	4
Pulmonary cases discharged against advice "Improved"	3
Number of children admitted to "Norfolk Health Camp" for eight weeks	39
Transportation for these children was provided by nurses of the Health Department	
Children provided with transportation going to North Reading Sanatorium	10
Nurses attended:	
Annual Norfolk County Health Meeting at Braintree.	
Norfolk County Health Meet, Little Building, Boston.	
Nurses' Public Health Meeting, Y. W. C. A., Boston.	
Each nurse made sixty home calls for Hoover Survey.	
Assisted at children's outing at Nantasket Beach.	
Attended Camp children's outing at Duxbury Beach.	
Assisted at T. A. T. clinics in schools (9), Miss Russell.	
Additional clinic work done by Miss Keeley:	
Total number of visits made to homes on contagious dis- eases, as scarlet fever, measles and diphtheria	321
T. A. T. clinics in schools	36
T. A. T. clinics about the city	24
Baby clinics	12
Pre-school clinics	1
Assisted at physical examinations on children at St. John's and St. Joseph's Schools. Provided transportation for St. Joseph's School children to dental clinic at dis- pensary. Made home calls for White House Child Conference	60

Respectfully submitted,

GERTRUDE T. RUSSELL, R.N.,
MARY E. KEELEY, R.N.,

Dispensary Nurses.

REPORT OF CHILD WELFARE PHYSICIAN

JANUARY 1, 1931.

EDMUND B. FITZGERALD, M.D., *Commissioner of Health, City of Quincy, Mass.:*

DEAR DR. FITZGERALD:—It is my privilege to submit to you the report of the Child Welfare Clinics of Quincy for the year ending December 31, 1930.

Statistics

Total Clinic registration	5,241
Well Baby Clinics	2,887
Pre-school Clinics	222
Orthopedic Clinics	272
Nutrition Conferences	1,860
Number of Clinics	466
Well Baby Clinics	304
Pre-school Clinics	50
Orthopedic Clinics	14
Nutrition Conferences	98
Total Clinic Attendance	7,646
Well Baby Clinics	7,145
Pre-school Clinics	251
Orthopedic Clinics	250
Total Home Visits by Nurses	3,122
Babies	2,712
Pre-school	234
Nutritionist's visits	82

A more detailed analysis of these figures will be found in the reports of the Child Welfare Nurses, the Nutritionist, and Orthopedic Clinic Report.

In general, the statistical report for the year 1930 shows a slight increase in registration, new enrollments and attendance. The fewer number of home visits made this year by the nurses may be explained by the fact that it was necessary for them to be in attendance at other clinics, dental and school examinations. Moreover, the figure of 120 White House Conference home visits represents more hours spent on a small number of children than the regular home visits indicate.

Comparison of Annual Reports of Well Baby Clinics

Year	Registration	New Enrollments	Attendance
1926.....	1,561	497	7,800
1927.....	1,752	622	7,047
1928.....	2,130	693	7,293
1929.....	2,783	652	6,795
1930.....	2,887	717	7,145

No effort is made by the Child Welfare Staff to increase the clinic registration. The registration figure, therefore, represents a voluntary expression of parents' desire to seek the advice and assistance in child care which clinic offers.

Reference of Children

During the year 342 children have been referred from the clinics to the care of practicing physicians and dentists in the community. The details of these referrals may be found in the report of the Child Welfare Nurse.

It has greatly increased the efficiency of the clinic recommendations for health to be able to refer children directly from the Child Welfare Clinics to: (1) The Quincy City Hospital for throat consultations and treatments, (2) The State Habit Clinic for guidance, (3) The Dental Clinics for dental advice.

Nutrition Work

Through the continued generosity of the American Red Cross the children's clinics have had the benefit of the instruction of a nutritionist. Miss Dorothy M. Lane, American Red Cross Nutritionist, was appointed in May, 1930, to carry, on a full-time basis, the work previously directed by Mrs. Mildred M. Burnham, whose resignation was accepted with regret.

Miss Lane's time was shared by the Undernourished Children's Clinic, Dental Clinic, Child Welfare Clinics and Mothers' Classes.

In the Child Welfare Clinics she conducted a program of instruction in nutrition through weekly demonstrations, informal and group talks, individual conferences with parents and home visits at the recommendation of doctors or nurses.

She has prepared, for publication, a recipe book of foods suitable for children, ages 7 months to 7 years. The material is excellently arranged to be helpful to parents of this age group.

The experimental phase of the nutrition program has led to a conviction that parents attending the clinics need and desire help in simple food choice and preparation for growing children—that parents of the children 1 year to 6 years of age need this help most—that the person in charge of such a program in the clinics must be a versatile teacher and have understanding experience in the problems of the parents.

The Nutritionist's report will give the scope of her work, which has been much appreciated.

Orthopedic Clinic

The Orthopedic Clinic has rounded out its third year of service as a part of the Child Welfare Program in Quincy. It is gratifying to be able to report that in this clinic this year 250 children have received advice leading to the correction of conditions which, if neglected, would have resulted in deformity. To one interested in the maintenance of efficient health the significance of this clinic's work will have a stimulating appeal. As a pioneer in this field of service for children Quincy has set a standard for positive health work.

Volunteer Help

Volunteer workers in the clinics this year have included delegates from:

The Wollaston Woman's Club.

The Wollaston Mothers' Club.

The Girl Scouts.

The Graduate School, Harvard Medical School.

Additional volunteer help could be used if the clinic meeting places afforded more space for the activities which such a group might conduct.

The Quincy Center Clinic at Woodward Institute is the only one which is ideally housed. At this clinic there is ample space for baby carriages, dressing the babies, weighing, play space for the runabouts, table space for demonstrations, quiet, warm room for examination of children and conference, safe storage space for clinic equipment.

Recommendations and Acknowledgments

It is recommended that the Child Welfare Clinics continue to carry on the full program of activities for health work of infants and pre-school children which has, in the past, so evidently met the need of parents and children. It is further recommended that additions and renewals be made to the equipment of these clinics.

It has been a continued privilege to work under the direction of a commissioner whose understanding of Child Welfare has encouraged the progress of clinic instruction, and to have the able assistance of Mrs. Fowler and Miss Marr as clinic executives.

The Child Welfare Nurses are doing a high type of teaching in the home, a fact best appreciated by the mothers who experience the benefits of their guidance.

For this cooperation grateful appreciation is expressed to the personnel of the Health Office and other members of the Health Department Staff, the Quincy Chapter of the American Red Cross, the Wollaston Mothers' Club, the Wollaston Woman's Club, the Girl Scouts, the Fore River Club, the North Quincy Council, Knights of Columbus, and the Trustees of Woodward Institute.

Respectfully submitted,

RACHEL L. HARDWICK, M.D.,

Child Welfare Physician.

REPORT OF CHILD WELFARE NURSES

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*:

DEAR SIR:—It is with pleasure that I submit the report of Child Welfare activities for the year 1930.

There were 304 Well Baby Clinics held with a total of 2,883 babies having been registered. Of this number 563 have moved from the city, 97 transferred to the Pre-school Clinic, 293 came only for correct weight or were referred back to the doctor whose feedings they were previously following, 449 are active only bi-annually on account of large families or illness in the home, but who receive check-up home visits. There were 10 deaths in this group.

A weekly Pre-school Clinic was held, 52 clinics and a registration of 304 children over 2½ years of age. There were 93 referred to the School Department, 68 moved from the city, and 2 deaths, leaving a total active registration of 135 on December 31st.

A monthly Orthopedic Clinic was held from January to November, when it was held bi-monthly. There were 14 clinics held. Registration was 272 and on December 31st, the active registration 228 children, 44 having been transferred to the Children's Hospital for follow-up treatment, or have moved from the city.

Through the generosity of the American Red Cross, Mrs. Mildred Burnham, who was on May 1st succeeded by Miss Dorothy Lane, gave very helpful lectures, instructions and demonstrations on combining and the preparation of foods. She also gave very helpful hints on the clothing for children at different seasons of the year. Her time was divided between the various clinics, as well as making home visits which brought her in closer touch with the actual nutrition problems. A more detailed account will be given in her annual report.

A Pre-school Dental Clinic was also made possible by the generosity of the Local Chapter of the American Red Cross, therefore making the first clinic in Mouth Health Education in the pre-school program.

We extend our thanks and appreciation to the Wollaston Woman's and Mothers' Clubs, the Girl Scouts and the Vincent Club and the graduates of the Harvard Medical School for their volunteer services.

The following is a summary of the Child Welfare activities for the year 1930:—

Visits to the pre-school group	234
Visits to babies	2,712
Visits for the White House Conference	120
Visits to and inspection of 20 boarding houses	148
Children placed for temporary board	8
Referred to Children's Hospital by clinic doctor	23
(Out-Patient Department)	
Medical	6
Orthopedic	4
Muscle training	3

Lip reading	1	
Speech training	2	
Nerve	2	
Skin	3	
Surgical	2	
Referred to New England Hospital (scurvy)		1
Referred to Quincy Hospital		11
X-rays	4	
Tonsillectomy	3	
Ultra-violet	4	
Referred to Dental Clinic or dentists		29
Referred to oculist		2
Referred to Eye and Ear Infirmary		2
Referred to eye and ear doctor		3
Referred to private school for lip reading		1
Referred to local M.D. by clinic doctor		222
Referred to local M.D. by clinic nurses		84
Referred to specialists (Mongolian)		2
Intra Dermal tests		3

Deaths

Bronchial Pneumonia	5
Bronchial Pneumonia (Syphilis)	1
Bronchial Pneumonia (following Measles)	2
Bronchial Pneumonia (Eczema)	1
Bronchial Pneumonia (Mongolianism)	1
Bronchial Pneumonia (birth injury)	1
Cause unknown	1
Total number of deaths	12

MARY ELIZABETH MARR, R.N.,

Child Welfare Nurses.

REPORT OF ORTHOPEDIC PHYSICIAN

JANUARY 1, 1931.

DR. E. B. FITZGERALD, *Health Commissioner, Quincy, Mass.:*

DEAR DR. FITZGERALD:—The following is the report of the Orthopedic Clinics maintained by the City of Quincy as part of its Child Welfare Program for the year 1930:

There have been fourteen clinics, one held on the second Thursday of the month from January to October. During November and December there were two clinics each month, held on the second and third Thursdays.

Two hundred and fifty children have been examined; 155 children have returned this year for the usual educational orthopedic advice; 95 new children were admitted to the clinics.

The types of orthopedic conditions found at the clinics may be classified as follows:

Pronated feet	175
Pronated feet and knock knees	10
Knock knees	8
Bow legs	12
Retarded development	8
Birth injury	5
Torticollis	3
Generalized muscular atonia	5
Apophysitis	1
Funnel chest	1
Pigeon breast	1
Webbed fingers	1
Webbed toes	1
Plantar wart	1
Forefoot adduction	1
Hyperextended knees	1
Healthy children without defects	16
Total	250

Interest in the Orthopedic Clinic continues to grow, as shown by the figures of preceding years.

Report of 1927.....	89 children
Report of 1928.....	164 children
Report of 1929.....	208 children
Report of 1930.....	250 children

I wish to pay tribute to Dr. R. L. Hardwick, to the Child Welfare Nurses and the Commissioner of Health for their hearty cooperation and help in making the Orthopedic Clinic an interesting one.

Respectfully submitted,

M. G. KATZEFF, M.D.,

Orthopedic Physician.

REPORT OF QUINCY HABIT CLINIC

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner, Quincy, Mass.:*

MY DEAR DOCTOR FITZGERALD:—Herewith is a report of the activities of the Habit Clinics during the past year.

The Habit Clinics of the Massachusetts Division of Mental Hygiene have concluded a satisfying and productive program during the past year at the Woodward Institute.

Although the activities as expressed numerically are somewhat below those of the previous year, there has been a compensation in the opportunity for more intensive work in the individual cases, and a widening in the scope of community education by means of which a greater number of individuals have been made conversant with the aim and function of the clinic. This has meant that the clinic has been utilized for consultation purposes by many who heretofore had never known of the service that was procurable.

This year, as in previous years, the clinic has had the cooperation and approval of the school system which facilitated the educational work done for the personnel in that field along the lines of mental hygiene. This has been done by group talks to the teachers of the primary grades in all the public schools throughout the city. It has made teachers aware of the fact that mental hygienists and educators are aiming for the same goal, namely, to prepare the child for later life and also, that the clinic has much to offer them in the way of assistance in the solution of problems of maladjustment in the early years of school life. The educational program, in addition to including the schools, has included other groups, namely, social agencies, mothers' clubs, nursery schools, and so forth.

The social service staff of the clinic has continued in its active service in the field work and has received invaluable assistance from local social agencies who have in all cases responded readily and willingly to any request from the clinic for cooperation.

Number of weekly clinics held	46
Number of new cases	80
Number of old cases seen	100
Number of visits made by children	277
Number of visits made by social worker to home.....	471

Referring Agencies

Individuals	47
School system	14
Physicians	18
Tuberculosis Clinic	1

Problems Referred for

Disobedience	17
Diagnosis	17
Food capriciousness	12
Poor school adjustment	11
Enuresis	11
Thumbsucking	7
Nervousness	6

Speech defect	5
Night terrors	4
Fussiness	1
Hair twisting	1

The Division of Mental Hygiene wishes to express appreciation to all those who have helped to make this past year's program a success.

Very truly yours,

OLIVE A. COOPER, M.D.,

Assistant to Director, Division of Mental Hygiene.

CHILD GUIDANCE CLINIC

JANUARY 9, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner, Quincy, Mass.:*

DEAR DOCTOR FITZGERALD:—I take pleasure in submitting to you a statistical resumé of the first year's work of the Quincy Child Guidance Clinic.

I feel that the success of the clinic during the past year has been due largely to the splendid spirit of cooperation which the various community organizations have shown towards us. The clinic has shown such a healthy growth during the year that we are now planing to hold it on two afternoons a week instead of one.

My staff is now complete and is functioning very smoothly. It consists of:

Dr. William E. McLellan, Examining Physician.
Miss Nina Eldridge, Chief of Social Service Department.
Miss Mary Morris, Social Worker.
Mrs. Dorothy Clarke, Social Worker.
Miss Frances A. Reed, Psychologist.

The analysis of the work is as follows:

Clinics held	49
Total number of cases	80
Continued	8
New cases:	
Male	47
Female	25

Referred by:

School authorities	39
Newspaper publicity or lectures	7
Family Welfare Society	6
School nurses	6
Other clinics	5
Board of Health	4
Physicians	3
S. P. C. C.	1
Other sources	9

Referred to physicians 12

Psychometric (mental) Examinations:

Very superior intelligence	5
Superior intelligence	7
Normal intelligence	17
Dull normal intelligence	9
Borderline intelligence	13
Feebleminded intelligence	12
Test could not be performed	2
Test not necessary	15

Problems:

Bad associates	2
Borderline or deficient mentality	24
Correction of sleep habits	2
Dawdling	1

Day dreaming	4
Enuresis	4
Food fussiness	4
Homosexual tendencies	2
Mal-adjustment due to nationality	7
Masturbation	2
Mimicry	1
Nail biting	5
Nervousness	3
Neurotic adults	4
Night terrors	2
Non-reader	2
Pathological desire for attention	2
Physical defects as a factor in behavior	20
Birth injury	Incipient tuberculosis
Chorea	Mal-nutrition
Deafness	Nephritis
Defective vision	Spastic paralysis
Fainting	Tonsils and adenoids
Endocrine involvement	
Pre-psychotic symptoms	1
School adjustment	11
School offences	9
Show-off behavior	1
Sleep walking	1
Stammering	3
Other speech defects	1
Stealing	2
Stubbornness	2
Teasing	2
Temper tantrums	1
Truancy	3
Unfavorable home environment	8
Unsatisfactory school progress	19
Vocational guidance	6

Note: It is obvious that many cases present more than one problem.

Intake of cases according to age and sex:

Age	Male	Female	Age	Male	Female
9.....	9	6	16.....	3	3
10.....	9	5	18.....	1	0
11.....	9	1	20.....	1	0
12.....	4	5	Over 21.....	0	5
13.....	1	0		—	—
14.....	10	0		52	28
15.....	5	3			

Social Service Activities:

Interviews at Clinic	107
Home visits	97
Visits to effect adjustment	161

Co-operating agencies:

- Boston Community Health Association
- Boston Trade School for Girls
- Catholic Charitable Bureau

Children's Hospital, Boston
Church Home Society, Boston
Harvard Institute of Psychology
Massachusetts General Hospital
New England Home for Little Wanderers
Quincy Welfare Society
Quincy Hospital
Quincy Public Schools
Rowe Clinic, Evans Memorial, 80 E. Concord Street, Boston
S. P. C. C.
Union Industrial School, Walpole
Wrentham State School
Y. M. C. A., Dorchester

Yours very truly,

SAMUEL H. COTTRELL,

Medical Director, Quincy Child Guidance Clinic.

REPORT OF DENTAL CLINIC (Parochial Schools)

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—The following dental service was performed on the children of the first grade in St. John's and St. Joseph's Parochial Schools of Quincy:

The children were examined in their respective classrooms and classified as to their need of dental attention. The most urgent cases were disposed of first.

Most of the children had never been in a dental chair, so my service of necessity was primarily one of education, which was greatly assisted by the Sisters of the respective schools, who prepared the children so as not to fear my service.

The kind attention given the children by the attending nurses of your department was sufficient reason for the great degree of success attained.

Number of clinics	37
Number of patients	298
Number of operations	531
Extractions	157
Prophylaxis	19
Fillings	354
Copper amalgams	170
Zinc oxide cements	145
Silver amalgams	31
Copper cements	8
Gum treatment	1

Yours very truly,

ALFRED E. O'MALLEY, D.D.S.

REPORT OF PRE-SCHOOL DENTAL CLINIC (Sponsored by Red Cross)

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*:

DEAR SIR:—I beg to inform you that the Pre-school Dental Clinic started operating January 2, 1930, and continued once a week on Thursday morning at the City Dispensary throughout the year.

The children on which this service was rendered ranged from two years up to school age. They were referred by the Child Welfare Physician and Health Department nurses, when they found such treatment necessary. My service was primarily that of preventive dentistry, together with educating the child and instructing the mother in proper care of the mouth.

Number of clinics	52
Number of operations	521
Number of fillings	449
Number of extractions	72

Yours very truly,

ALFRED E. O'MALLEY, D.D.S.

REPORT OF MILK INSPECTOR

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—I herewith submit the report for the year ending December 31, 1930.

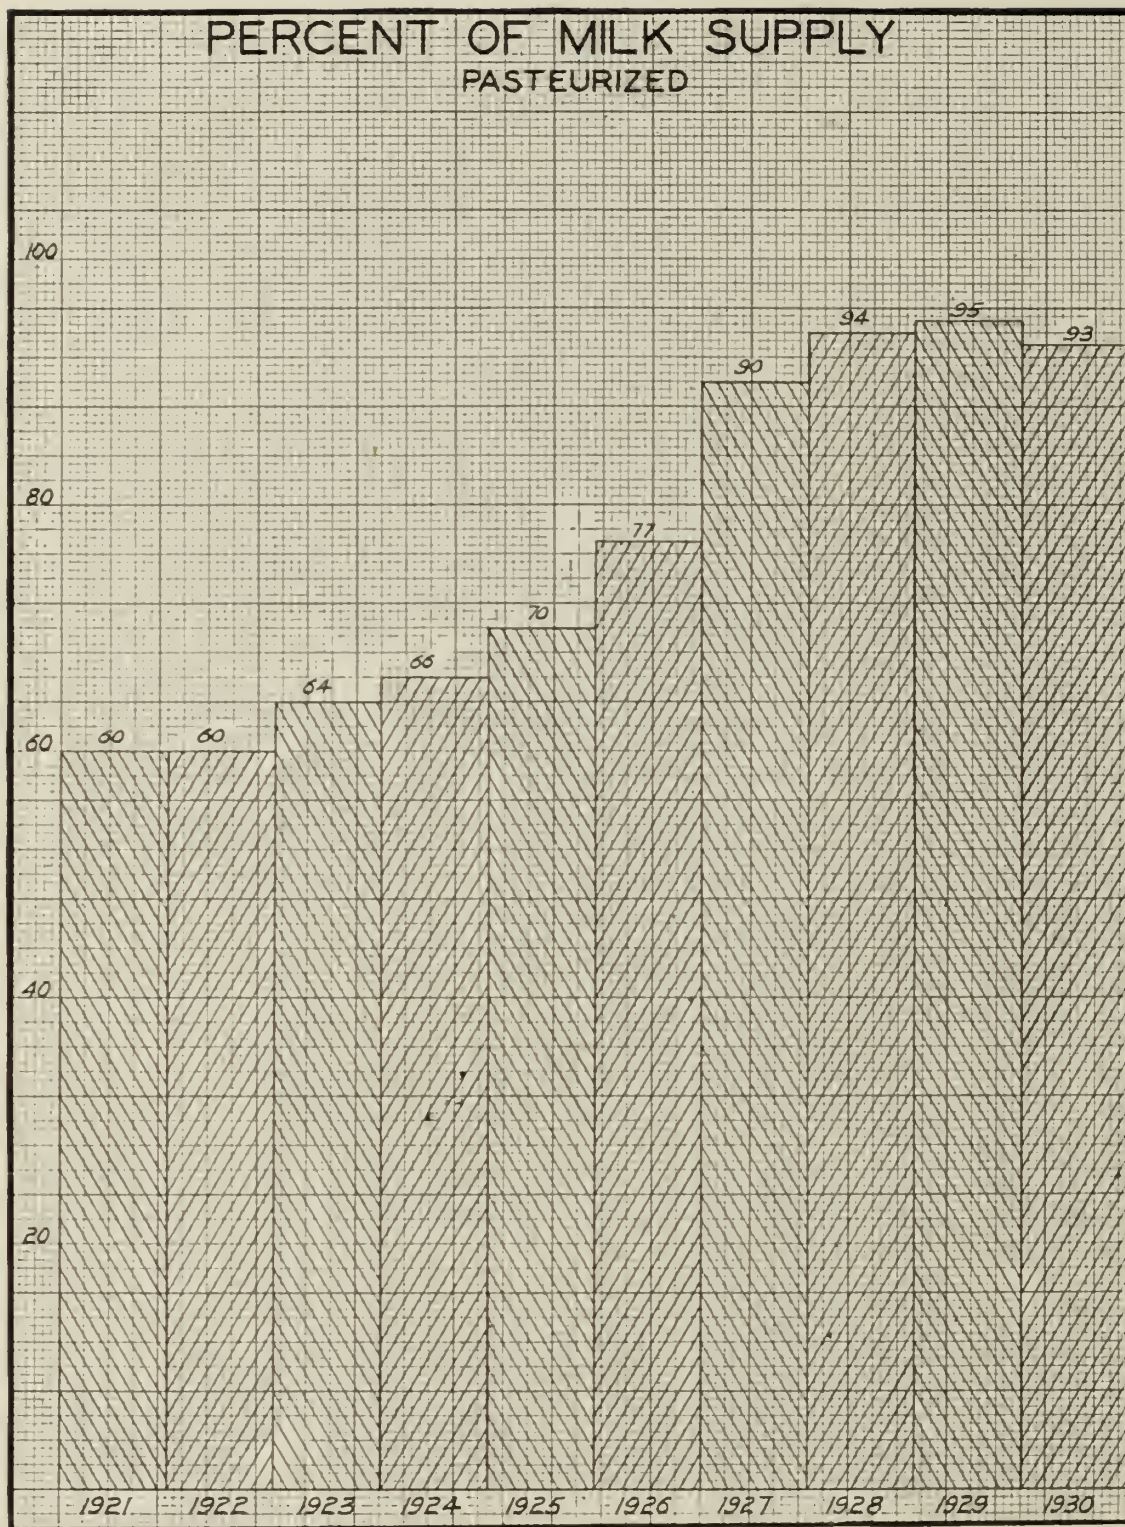

The following statistics refer to milk, cream, ice cream, oleomargarine and buttermilk, consumed and produced in Quincy:—

Dairies in City of Quincy

1 cow	8
2 to 5 cows	3
5 to 10 cows	1
11 to 25 cows	5
26 to 50 cows	1
Total number of cows in Quincy	130
Total number of cows in nearby dairies who serve the City of Quincy with milk and cream	132
Milk produced in Quincy and nearby dairies (quarts—raw)	2,120
Milk contractors' processing and storage plants in the City of Quincy	7
Out-of-town plants supplying Quincy	11
Teams, auto cars and trucks employed in the distribution of milk, cream, buttermilk and ice cream in Quincy inspected	164
Milk consumed in Quincy per day (quarts).....	30,154
Pasteurized milk consumed per day in Quincy (quarts)	28,034
Raw milk consumed in Quincy per day (quarts).....	2,130
Certified milk consumed in Quincy per day (quarts)	183
Grade A milk consumed in Quincy per day	3,147
Per cent pasteurized	93
Per cent raw	7
Cream consumed in Quincy (quarts)	2,936
Ice cream consumed in Quincy (gallons)	1,700
Ice cream manufactured in Quincy (gallons)	790
Buttermilk consumed in Quincy (quarts)	319
Milk processing plants in Quincy (quarts)	4
Milk processed in Quincy (quarts)	23,300
Retail licenses issued—milk, ice cream and oleomargarine	922
Revenue from same	\$505.00

Table Classification of Dairies Inspected and Scored

Scoring 41 to 50	1
Scoring 51 to 60	19
Scoring 61 to 70	9
Scoring over 71	1
Milk samples collected and tested for chemical analysis and bacteria	1,392
Samples taken from teams	700
Samples taken from stores and schools	356
Samples taken from dairies	336
Total	1,392

Ice cream and cream samples collected and tested for chemical analysis and bacteria	160
Ice cream manufacturing plants in Quincy	11
Ice cream manufacturing plants outside Quincy which serve Quincy	16
Milk and ice cream samples are taken from the schools and tested each month during the school year.	
Number of stores visited and milk chests inspected	603
Number of dairies visited and inspected	398
Number of milk rooms visited and inspected	120
Number of milk processing plants visited and inspected	130
Number of ice cream manufacturing plants visited	125
Number of restaurants visited	71
Number of bakeries visited	21
Number of complaints investigated	5

The price of cream and milk has dropped far below what it has been in many years, retailing in cash and carry stores for 11 cents a quart and cream selling for 15 cents per jar, the quality remaining the same.

Respectfully submitted,

JAMES O'DOWD,

Milk Inspector.

REPORT OF THE BACTERIOLOGIST

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner:*

DEAR SIR:—The work in the laboratory the past year has included the following:

Bacteriologic examinations of milk (38 collections).....	608
Chemical examinations of milk (49 collections).....	784
Bacteriologic examinations of ice cream.....	80
Chemical examinations of ice cream (5 collections).....	80
Total number of examinations	1,552

Respectfully submitted,

EDWIN E. SMITH, M.D.

REPORT OF INSPECTOR OF MEATS AND PROVISIONS

DECEMBER 31, 1930.

To the Commissioner of Health, Quincy, Massachusetts:

DEAR SIR:—I submit the report of the work in this office for the year ending December 31, 1930.

Food Establishments in Quincy

Markets	145
Stores	192
Restaurants and lunch rooms	69
Creameries	12
Fish markets	39
Delicatessens	17
Fruit stores	49

With the large increase in population the past few years, we are always sure to have a demand for more small business blocks for stores of all kinds in each section of our city.

All our large markets and many small ones have installed refrigeration systems of some kind, which will enable the owner to keep his meat and provisions at an even temperature regardless of the weather conditions, always cool, dry and sanitary at all times, and a big money saver to the merchant.

Merrymount and Adams Shore are a part of our city that is developing fast. This last year two large markets fully equipped with the most modern fixtures for doing business have been opened. Early next summer one more market will open its doors to the public on Sea Street, Houghs Neck, which will be a great benefit to that section, with a full line of meats, provisions and fruits of all kinds in their season.

Any complaints made at this office have its full attention at once. This year we have had only five complaints of any kind which I consider remarkable for any city with the population of ours.

At the present time we have eighty so-called chain stores. Out of that number twenty are full-equipped markets of the most modern type with sanitary fixtures. The managers of this class of stores are thoroughly trained and experts in this line of business.

Our holiday trade was especially good, and our market men expressed themselves as more than pleased with the large demand for poultry of all kinds. Prices were the lowest in many years.

Respectfully submitted,

HOWARD ROGERS,

Inspector of Meats and Provisions.

REPORT OF SANITARY INSPECTOR

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*:

DEAR SIR:—The following report is respectfully submitted:

I received a provisional Civil Service appointment with the Health Department on June 12, 1930, lasting until September 20, 1930, a period of 15 weeks. During this time, I acted as sanitary inspector and to a certain extent as statistician.

Ninety-two nuisances were closed by an average of 2.6 visits each.

Two mornings and three afternoons were given over to inspecting the vehicles of farmers who buy city garbage to feed the hogs. These had been a source of offence. Twenty-six conveyances were inspected as to canvas covers and tightness, then rechecked, some three times or more.

Eight visits were made to the City Dump at the request of the mayor to ensure that private collectors of rubbish properly covered the refuse. In regard to this, complaints had been made that it was allowed to blow about the streets.

Business blocks within the city were rigorously inspected as to rear of premises. Frequent inspection remedied disorderly conditions in many cases. No record was made of the number of inspections, as most of these were made when in vicinity of a nuisance.

As statistician, I drew up the monthly morbidity and mortality tables. A scarlet fever study comparing the records of parochial and public schools was made.

Health education by medium of the newspapers was carried on by me.

After regular hours I acted as truant officer to persons venereally diseased reported to me by the Massachusetts Department of Public Health, or the Quincy Clinic, as lapsing treatments. Twelve persons were followed up by 23 visits. Three had moved out of the city, two had given wrong names or addresses, and the rest induced to resume treatment.

During the vacation of the superintendent I "subbed" for him by answering telephone calls and taking charge of permits, receipts, and physicians' reports, and upon absence of the clerk one week I acted as office typist, in addition to my regular duties.

Other isolated details were incorporated into my office, such as making out the alcohol report for the Federal Prohibition Administration, issuing poultry permits, inspecting homes for the aged, and answering questionnaires.

Very truly yours,

A. S. PACTOVIS.

REPORT OF INSPECTOR OF ANIMALS AND SLAUGHTERING

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*:

DEAR SIR:—I hereby submit my report for year ending January 1, 1931.

Number of cows inspected	148
Number of dogs quarantined	140

Yours truly,

E. A. deVARENNES,

Inspector of Animals and Slaughtering.

REPORT OF INSPECTOR OF PLUMBING

JANUARY 1, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*:

DEAR SIR:—As Inspector of Plumbing I have the honor to submit my thirty-seventh annual report.

Number of applications filed	547
Received for permits	\$1,026 00

New Buildings for Which Permits were issued

Dwellings	180	Schools	3
Apartment blocks	21	Restaurants	1
Cottages	2	Block of stores.....	2

Urinals	26
Stop sinks	14
Sterilizers	4

Respectfully submitted,

J. J. KENILEY,

Inspector of Plumbing.

REPORT OF NUTRITIONIST

JANUARY 31, 1931.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—Herewith is submitted my report as nutritionist for the City of Quincy under the auspices of the Quincy Chapter of the American Red Cross from April 1, 1930, to October 1, 1930. From October 1st until December 31st, I was employed by the Quincy Health Department.

Child Welfare Clinics

The program of general health education through the use of demonstrations and conferences held last year in two of the clinics was extended to the seven clinics throughout the city. Literature distributed to the mothers was obtained from the Department of Labor and Agriculture, the State, and the New England Dairy and Food Council. Home visits were made upon the recommendation of the doctor, or when the nutritionist deemed it necessary after talking to the mother.

The Girl Scouts assisted by entertaining the children of run-about age, both by personal service at the clinics and by making many scrap-books.

Number of clinics attended	98
Number of conferences held at clinics	1,860
Number of visits to homes	82
Number of families reached through visits	31

Clinics for Undernourished Children

At the Saturday morning clinics for undernourished and T. B. contact children, individual instruction in normal high caloric diets was given, as well as encouragement in correct health habits.

On alternate Wednesdays a health club for a small group of junior and high school girls was held at the Dispensary. This has been meeting since September. As they come immediately from school, simple refreshments were served, followed by a talk and informal discussion of various health topics.

Number of clinics attended	30
Number of conferences at clinics	285
Number of children reached through conferences	83
Average number of conferences per child	3.4
Number of Girls' Club meetings	7
Number of active members	12
Number of visits to homes	74
Number of families reached through visits	28

Welfare Work

Home visits and conferences were made on several families dependent on the Family Welfare Society and the Public Welfare Department. It was felt that these families needed assistance and close supervision in budgeting and correct food buying.

Number of visits to homes made through Family Welfare	9
Number of visits to homes made through Public Welfare	41
Number of families reached through Family Welfare	4
Number of families reached through Public Welfare	3

School Classes

Health instruction by a nutritionist was inaugurated in each of the Parochial Schools. Fifteen-minute lessons were given to each grade alternate weeks.

Total number of lessons taught.....	92
St. Joseph's (April-June), Grades I to IV	16
St. Joseph's (Oct.,-Dec.), Grades I to V	20
St. John's (Sept.-Dec.), Grades I to VIII	56
Total number of pupils taught	667

Additional Activities

The newspapers were extremely cooperative in accepting many publicity articles, as well as a series of letters, addressed to the mothers, on "Food Problems."

The library bought for each branch a number of books on health recommended for both children and adults.

As a part of the Tercentenary celebration, the Red Cross Chapter had a booth at the exposition on the "Progress of Industry," showing both First Aid and Nutrition Services. An exhibit on the progress of nutrition from 1630 to 1930 was shown. It was not given with the direct intention of educating the people, but to arouse their interest in it. Approximately 1,000 leaflets of educational material were distributed to mothers, in addition to the many taken by children.

The last ten days of August were spent in Washington at the Nutritionists' Conference held at the American Red Cross buildings.

Additional Statistics

Total number of visits to homes	206
Total number of families reached through visits	66
Number of babies reached through visits	22
Number of pre-school children reached through visits	35
Number of school children reached through visits	59
Number of adults reached through visits	23
Total number of people reached through visits	139
Number of conferences with mothers at St. John's School.....	34
Number of children weighed at St. Joseph's School (April)	160
Number of children weighed at St. Joseph's School (June)	153
Number of children weighed at St. Joseph's School (Sept.)	202
Number of cases referred to dentist	1
Number of cases referred to Pre-school Dental Clinic	2
Number of cases referred to Family Welfare Society	2
Number of cases referred to Public Welfare Department	2
Number of cases referred to M. G. H. Outpatient Department	1
Number of cases referred to Dispensary	10
Number of cases referred to Habit Clinic	1
Number of bi-weekly letters to newspapers.....	30

Expenditures

Amount received from Quincy Chapter, American Red Cross	\$106.85
Amount received from City as a special appropriation for work at Dispensary	30.00
	<hr/>
	\$136.85

Recommendations

Child Welfare Clinics

That the nutritionist attend only the clinic at Woodward Institute because of the following reasons:—

1. The doctors, supplemented by the nurses, give practically all the information that the mothers really need for the care of their infants.
2. The attention of the mothers is absorbed in the immediate care of the baby and not on what the nutritionist is trying to teach.
3. The physical surroundings, on the whole, are not conducive to either teaching purposes or conferences.
4. As everything has to be carried from place to place, the exhibit has to be of the simplest, so that it is difficult to get variety of subject matter, as well as interest. Moreover, the interest of the mother of the tiny baby is limited to few things except formulas.
5. The number of children over one year of age, the nutritionists' field, is comparatively small.

That the nutritionists supply the nurses with printed material, posters and exhibits, if they so desire, for use at the clinics.

That the doctors and nurses refer cases to the nutritionist which need attention to be followed up in the homes.

N. B.—When one sees the home conditions, more valuable suggestions can be made, both for the baby in question and for other members of the family.

That, if the numbers warrant, the nutritionist attend the pre-school clinic, where she can have individual conferences with each mother, as well as group teaching for the children, provided they arrive at the same hour.

Dispensary Clinics

That the nutritionist continue the work with the undernourished and contact children, both at the Dispensary and with visits to their homes.

That the Health Club for the older girls be continued with an increased membership.

That specific diet lists be given to adults with active T. B. who remain at home.

Welfare Department

That more extensive and intensive work be done with families depending on the city for aid, in the effort to teach them the value of proper food, and how to buy it.

That this can be done by class work, as well as by home visits.

That cases still be taken which are referred by the Family Welfare Society.

Schools

That class work in the upper grade only of the Parochial Schools be continued if they so desire.

That the nutritionists be referred to cases by the nurses of the public schools that would be benefited by proper food, to be followed up in the homes.

Dental Clinics

That the nutritionist attend the Dental Clinic and advise mothers in diets and their relation to good teeth.

Acknowledgments

The nutritionist is greatly indebted to members of the Health Department for their cooperation in every way. Without their assistance it would have been extremely difficult to carry on the work. Gratitude is also extended to the Boston Dispensary and New England Dairy and Food Council for their many helpful suggestions for exhibits.

Respectfully submitted,

DOROTHY M. LANE,

Nutritionist, American National Red Cross.

MORTALITY STATISTICS

During 1930, there were 603 deaths which occurred in Quincy. This represented a decrease of 10 from the figure in 1929, namely 613. Based on the estimated population of 72,234 on July 1, 1930, the crude death rate was 8.3 per 1,000 population as compared with 8.8 in 1929. Correcting for residents and non-residents, 674 Quincy residents who died during the year indicate a rate of 9.3 as compared with a rate of 10.3 in 1929.

SEX. Of the 603 deaths in 1930, 321 were males (53.2 per cent) and 282 were females (46.8 per cent).

AGE. Of the 603 deaths in 1930, 56, or 9.3 per cent, were under one year of age as compared with 8.8 per cent in 1929. There were 11 deaths over 90 years of age. The oldest age was in the 100 years or over group. The largest number of deaths was in the 70-74 years group and the smallest number in the 5-9 years group (excepting the 100 years or over group). The average age at death fell in the 50-54 years group.

NATIVITY. Three hundred and sixty, or 59.7 per cent, of the 603 deaths, were native.

SEASONAL DISTRIBUTION OF DEATHS. The largest number of deaths in any one month occurred in February, when there were 61, and the next largest in January, when there were 60. The lowest number occurred in September, when 36 deaths were registered.

INFANT MORTALITY. The infant mortality rate in 1930 was 46 per 1,000 live births. In 1930 there occurred 26 deaths in the first week of life, or 46 per cent of all deaths under one year of age, compared with 59.3 per cent in 1929. Sixteen of the 26 deaths in the first week of life occurred on the first day, constituting 29 per cent of all deaths under one year of age, compared with 35.2 per cent in 1929. In the first month there were 33 deaths, or 58.9 per cent of the total, as compared with 68.5 per cent in 1929.

Causes of Deaths

PNEUMONIA caused 39 deaths in 1930, a rate of 54 per 100,000 population, differing but slightly from 38 deaths in 1929 and a rate of 54.4 per 100,000 population.

HEART DISEASE. The deaths from heart diseases in 1930 amounted to 142, or 23.5 per cent of all deaths, a rate of 197 per 100,000 population. The number of deaths in 1929 was 178, or 29 per cent of all deaths, a rate of 253 per 100,000 population.

TUBERCULOSIS. Tuberculosis, all forms, resulted in 22 deaths in 1930, of whom 20 died from the respiratory type. The rate per 100,000 population was 30.4 in 1930 and 31.4 in 1929. In addition, 19 died outside the city. The corrected mortality rate, based on 40 resident cases, was 55.4 per 100,000 population in 1930, 64.4 in 1929 and 78.4 in 1928.

CEREBRAL HEMORRHAGE AND APOPLEXY resulted in 46 deaths in 1930, a rate of 63.7 per 100,000 population, as compared with 36 deaths in 1929 and a rate of 51.5.

CANCER caused 69 deaths in 1930, approximately 1 in 10, representing a death rate of 95.5 per 100,000 population, as compared with 63 deaths and a rate of 90.1 in 1929.

BRIGHT'S DISEASE and NEPHRITIS numbered 53 deaths in 1930, a rate of 73.4 per 100,000 population. There were 54 deaths in 1929, a rate of 77.2 per 100,000 population.

DISEASES OF EARLY INFANCY and MALFORMATIONS caused 31 deaths in 1930, a rate of 42.9 per 100,000 population, compared with 39 deaths in 1929, and a rate of 55.8.

EXTERNAL CAUSES accounted for 41 deaths in 1929, a rate of 56.8 per 100,000 population, compared with 40 deaths and a rate of 57.2 in 1929. There were 10 deaths from automobile accidents in Quincy, 2 less than in 1929.

AMITY PERKINS, B.S.	Dietitian

INFORMATION RELATIVE TO ADMISSION OF PATIENTS,
RATES, ETC.

Application for the admission of patients to the hospital should be made to the superintendent. Patients desiring admission should be referred by a physician.

Accidents are admitted at any time.

The hospital maintains an ambulance for transportation of patients within the city limits. The ambulance may be obtained for special service by application to the superintendent.

Single rooms, \$4.50, \$5.00, \$6.00, \$8.00 and \$10.00 per day.

Semi-private rooms, \$5.00 per day.

Ward bed (private), \$3.00 and \$4.00 per day.

Ward bed (service), \$3.00 and \$4.00 per day.

Additional charges:

Operating room, \$5.00 to \$10.00.

Delivery room, \$5.00.

Etherizing fee, \$5.00.

Laboratory fee, \$5.00.

Plaster casts or special dressings, \$3.00 to \$5.00.

Ambulance, \$3.00.

Board of special nurse, \$1.00 per day.

Proprietary drugs or unusual or expensive preparations, mineral waters, liquors, etc., will also be charged extra.

Radiographs will be taken every day by appointment, with the exception of Sunday.

Appointments for radiograph of the gastro-intestinal tract should be made either Monday, Tuesday, Thursday or Friday.

REPORT OF THE BOARD OF MANAGERS

To His Honor the Mayor—The President and Members of the City Council:

GENTLEMEN:—The Board of Managers of the Quincy City Hospital submits its report for the year ending December 31, 1930.

On July 16, 1930, the new medical and surgical wing was opened to receive patients, giving us not only a new and finely furnished and equipped building with greatly increased facilities, with 38 beds on the first floor—the men's ward—a similar number on the second floor—the women's ward—and 27 private rooms on the third floor—but better than all that, the constant dread and fear of fire while patients were in the original wooden building no longer exists. No one now questions that this added unit was from every viewpoint an absolute need. A comparison of the statistical information for 1930 with 1929 shows a decided increase in every item, and as Dr. Sargent so well puts it in his report, we are no longer a small provincial institution but have taken our place with the larger hospitals.

We are also pleased to acknowledge that our request for an appropriation for more operating rooms and enlarged facilities in that department was favorably received by the City Government and that there is now well under way a substantial addition to our present operating rooms and it is expected this addition will be ready for use by June 1st.

In the very near future the new and enlarged quarters for the Pathological Laboratory—and Physical Theraphy, now being constructed in the basement of the Medical and Surgical building, also the new X-Ray quarters will be ready for occupancy, and with their enlarged and improved facilities these departments, under the capable and efficient direction of the physicians immediately in charge, will rank with the best in the Commonwealth.

And our library is one of the bright spots in the hospital. During the past year new quarters were provided for this purpose, and Miss Davis gives us a very interesting and encouraging report. The hospital is indebted to Mr. Galen W. Hill and his able assistants for their efforts and generous assistance.

For this year we are not going to ask for any new buildings or additions, but in the not far distant future we shall need an addition to the Nurses' Home—and we should not delay too long taking up the question of a new administration building.

Certain replacements will be necessary this year, particularly in the laundry, which is not now capable of taking care of our present needs.

To the Hospital Aid Associations, whose interest, kindly and material assistance towards the hospital never lags but each year is carried on with renewed vigor, and to all other individuals and associations who have been so kind and generous with gifts and donations, we express our heartfelt appreciation.

MAURICE P. SPILLANE, *Chairman,*
GEORGE E. TAYLOR, *Secretary,*
ERNEST B. NEAL,
JOSEPH A. DASHA,
FORREST I. NEAL.

REPORT OF SUPERINTENDENT

To the Board of Managers, Quincy City Hospital:

GENTLEMEN: The report of the work done at the Quincy City Hospital during the year 1930 is hereby submitted.

With the opening of the new medical and surgical ward, in July, our work has substantially increased as the accompanying statistics show.

The plan of this new building is working out very well, proving to us the value of having the medical and surgical cases segregated.

The Tufts College Medical School started this year to send some of their senior students to us periodically, for teaching purposes. The scheme is working very well, giving the students their required subjects, and helping us with our routine clinical work.

The "Aids" have been most generous with their time and help and this is truly appreciated.

To the outside clubs and organizations who have helped us, we extend our sincere thanks. The holiday seasons have been made much brighter and the patients and nurses much happier by the generous gifts donated by the "Aids," clubs and individuals. These expressions of thoughtfulness help a great deal to brighten the lonely ones and those away from home.

I wish to extend my appreciation and sincere thanks, for their cooperation, to the Board of Managers, the Staff and to those who have worked with me this past year.

Respectfully submitted,

RUTH J. ADIE, R.N.,

Superintendent.

REPORT OF THE SCHOOL OF NURSING

To His Honor the Mayor, the Board of Managers, the Staff and Miss Adie:

I wish to submit the report of the School of Nursing for the year ended in 1930, though it seems as if there is little to tell of our work, for there have been no spectacular happenings.

The opening of the Medical and Surgical building has called for a number of changes in our department. Eighty additional beds for patients has increased the nursing service necessary to meet this need. We have had to supplement our student nurse service with graduate floor duty nurses. The graduate nurses are employed chiefly on the floor for private room patients and on night duty. This has proved satisfactory to patients and doctors.

Miss Jessie Nicholson, who has been supervising in several New York hospitals since her graduation from this school, has returned as assistant in the school office and as supervisor of the Medical and Surgical building.

Miss Helen Casey is now supervisor in the obstetrical department. She is assisted by Miss Anne Leary and Miss Minnie Harron as charge nurses on the floors devoted to obstetrics. Miss Marjorie Mabon and Miss Bertha Nelson, recent graduates, have remained as charge nurses.

We have also welcomed the return of Miss Barbara Hobbs as operating room supervisor.

Miss Dorothy E. Dawes, a graduate of Teachers College, Columbia University, began her work as theoretical instructor at the beginning of September. With her years of experience in nursing and in teaching nurses, we feel that the interest and enthusiasm of the students is well founded.

The census of our school is:

Seniors	19
Intermediates	21
Juniors	9
Probationers	7
	<hr/>
Total	56

The total number of nurses who completed their training in 1930 was 13.

The total number who resigned or left for other reasons was 6.

It has been a source of satisfaction to hear that a number of our graduates are taking post-graduate courses to fit themselves for further usefulness. It is always a good sign when workers realize the help which additional training gives them.

I am glad to report that the health of the nurses, graduates and students has been unusually good. There have been no grave illnesses, though we have not yet made any provision for outdoor rest or recreation for them. The Nurses' Home is still without a porch or veranda for these young women to rest on in their time off duty. The Quincy Young Women's Christian Association has kindly allowed a group of the nurses to enroll in the calisthenics and swimming classes. Then a group has met twice a month in the Nurses' Home to play bridge. There have been occasional dances. The Hospital Aid Association has continued to serve tea monthly, which we have enjoyed greatly. To the members of the staff and the internes who have given their time so graciously in instructing the nurses and in caring for them when ill I extend sincere thanks.

Respectfully submitted,

EILEEN M. YOUNG, R.N.,

Superintendent of Nurses.

REPORT OF THE MEDICAL STAFF OF THE QUINCY CITY HOSPITAL FOR THE YEAR 1930

To the Superintendent and Board of Managers, Quincy City Hospital:

The hospital is undergoing marked material changes and with the opening of the new medical and surgical building a new era has arrived. It is no longer the small provincial institution which it was three years ago, but has developed to the point where it must take its place with the larger hospitals.

The staff has been busy during the past year, keeping step with this material development. An obstetrical service has been organized and is now functioning under the able leadership of Dr. Richard M. Ash. A pediatric service has been established with Dr. Chester L. Glenn at its head. Dr. Rollins has been appointed consulting surgeon in the department of oral surgery. Dr. F. J. Cotton has been added to the staff as consultant in bone surgery. In the department of physiotherapy Dr. Payzant, who was appointed to take the place of Dr. Edmund Burke, resigned, by his enthusiasm and his knowledge of physical therapy has increased the scope of the work to a large extent.

The staff is deeply indebted to those of its members who are serving on the committee on house officers. They have labored diligently to place the work of the house officers on a higher plane

and have elaborated a very comprehensive and practical set of rules governing these medical students and younger physicians who come to the hospital for further clinical experience. At present the Quincy City Hospital is not on the list of hospitals approved by the American Medical Association for house officer training. Application is being made for this recognition and, because of the progress which has been made in department organization, I am confident that this recognition will be given within a short time. The benefit to the hospital will be great, as it will be easier to obtain good house officers from various medical schools.

Early in the year we lost, by death, one of our courtesy staff members, who was at one time on the active staff—Dr. Harold Diehl. A man of sterling character, a diligent worker in his chosen specialty and a good friend, he is missed by his associates.

The growth of the city and the hospital is reflected by the constant increase of the courtesy staff, six names being added to the list during 1930.

In conclusion, the members of the staff look forward to the coming year with confidence, for with the splendid cooperation of the Board of Managers we feel that we are in a position to give better service to the patients who are seeking hospital treatment in increasing numbers.

Respectfully submitted,

WALTER L. SARGENT, M.D.

REPORT OF X-RAY DEPARTMENT, QUINCY CITY HOSPITAL

JANUARY 10, 1931.

To the Superintendent and Board of Managers, Quincy City Hospital, Quincy, Massachusetts:

The number of regions X-rayed during the year 1930 was just four hundred and seventy-seven more than the number X-rayed during 1929. This increase is due, in part, to the increased number of house patients and also, in part, to the increased number of doctors now sending X-ray work to the hospital.

The number of patients treated by X-ray during the past year is about the same as the number treated in 1929. The reason that there was no increase in the number of patients referred for treatment is undoubtedly due to the fact that during the last three months it was necessary to dissemble the treatment machine, thus making it necessary to refer the treatment cases to other laboratories.

For the next five months we will, of course, be forced to operate the laboratory under the handicap of decreased space until the new building is entirely completed, after which time we are looking forward to facilities second to none in New England.

During the year we had to face a further temporary handicap in the changing of the personnel of the department. Upon the resignation of Miss Agnes M. Fraser, Miss Helene A. Reed was appointed chief technician, and Miss Madelyn Flaherty was trained as assistant X-ray technician. Both these young women have done excellent work, and, after a week or two of moderate confusion, the laboratory is running more smoothly than ever. I am

hoping that the above personnel will find it to their advantage to remain in charge for some years to come.

By instructing the house officers in the technique of taking radio-grams and by keeping one of the regular technicians on call during Sundays and holidays throughout the year, it has been possible to give twenty-four-hour service.

I wish to express my sincere appreciation to the administration and staff for their hearty cooperation during the past year.

Respectfully submitted,

CHARLES WHELAN, M.D.,

Roentgenologist.

REPORT OF THE PATHOLOGICAL DEPARTMENT FOR THE YEAR 1930 OF THE QUINCY CITY HOSPITAL

During the past year the department showed a large increase in the number of specimens examined, a total of almost 10,000 during the year. The additional number of patients since the opening of the new building and a large increase of specimens received from outside sources were essentially the factors in this increase.

Miss Frances K. Morris was appointed head technician in July, following the resignation of Mrs. Doris Goodman, who is now a student at Tufts College Medical School. Miss Denise Ryan was appointed as an assistant in the laboratory and both technicians have worked together very efficiently.

Basal Metabolism determinations have been added to the scope of the laboratory work since the purchase of the new apparatus early last year.

The laboratory unit in the new building will include the pathological, clinical, milk laboratory and the nurses' laboratory, adjoined by the morgue and post-mortem room. The facilities of the unit should be adequate to take care of the hospital needs for many years to come.

The following is a detailed report of the specimens examined during the year.

Urinalyses	6,220
Renal Function tests	19
Pathological surgical specimens	819
Autopsies	26
Blood cultures	12
Throat cultures	8
Miscellaneous cultures	44
Spinal fluid	47
Sputa	64
Autogenous vaccines	2
Widals	15
Exudates	18
Transudates	7
Bacteriological smears	63
Gastric contents and vomitus	4
Feces	32
Blood examinations:	
Haemoglobin estimations	249
Red blood counts	250
White blood counts	654
Differential blood counts	269
Color indices	217
Bleeding times	2
Clotting times	21
Blood grouping	50
Blood matching	20
Blood chemistry:	
Blood sugars	97
Non-protein-nitrogen	65
Basal metabolism estimations	20
Animal inoculations	5
Icteric indices	5
Tuberculin test	1
Total number of examinations	9,325

Respectfully submitted,

FRANCIS P. McCARTHY, M.D.,

Pathologist.

To the Superintendent and Board of Managers, Quincy City Hospital, Quincy, Mass.

The following report is a statement of the treatments given in the Department of Physical Therapy during 1930:

January	391
February	313
March	367
April	228
May	241
June	225
July	561
August	534
September	570
October	470
November	427
December	577
Total	4,904

Due to the deficiency in equipment, and lack of space, we have been unable to increase the efficiency of the department above its present status. We are indebted to Dr. W. L. Sargent for the loan of a diathermy machine, which has been of great help in the work.

I would like to state that I did not assume charge of the department until the last week in June. The figures for the first six months' work are 1,765 treatments, and for the last, 3,139.

It is my opinion that the new department as planned will attract many more cases.

I wish to take this opportunity to thank the administration and staff for their splendid cooperation and interest in Physical Therapy.

With added equipment and space, we of the department hope to make a much better showing at the end of the coming year.

CLAUDE L. PAYZANT, M.D.

HOSPITAL LIBRARY REPORT FOR 1930

The Thomas Crane Public Library has completed the sixth year of book service to the patients and staff of the Quincy City Hospital. Mrs. Zayma Connolly, the hospital librarian, left in September with a year's leave of absence and her place is being temporarily filled by Miss Marion Davis of the library staff.

In November a room in the former Ward A was given for the use of the library. This was a great improvement as the books were formerly kept in a closet in the hall. Librarian Galen W. Hill and First Assistant Miss Gertrude Callahan furnished the room attractively with book shelves, easy-chairs, a rug and bright window draperies. This room is open for the use of patients or staff for one hour and a half on Monday, Wednesday and Friday afternoons before the librarian visits the wards.

There are 553 books and numerous magazines and scrapbooks in the present permanent collection, which is constantly being added to by the Main Library. Patients and staff are allowed to borrow any reasonable number of books from the hospital collection and requests for other books will be filled from the Main Library.

The patients are enthusiastic in their praise of this service, which helps them while away so many tedious hours. The new book truck with sloping shelves makes it easier for them to see all the books at once when the truck is wheeled to their bedsides.

The total circulation statistics for books loaned in 1930 show a gain of almost 2,000 over the previous year. Number of books circulated in 1930:

Adult non-fiction	346	books
Adult fiction	6,850	"
Juvenile non-fiction	390	"
Juvenile fiction	902	"
<hr/>		
Total	8,488	"

MARION LOUISE DAVIS,

Hospital Librarian.

REPORT OF THE WOLLASTON HOSPITAL AID ASSOCIATION

The Wollaston Branch Hospital Aid Association has held all day sewing meetings each month.

Our Thanksgiving and Christmas work has been carried on as in previous years.

We have enjoyed giving two afternoon teas in the Nurses' Home.

Some member from the "Aid" has visited the hospital every month, bringing the report back to the association.

ANNIE W. LOWE, *President.*

CONCLUSION

The Department suffered the loss by death during the past year of two members, Sergeant Joseph A. Delorey, who died March 14th, 1930, and Patrolman John E. Connelly, who died March 26th, 1930.

Both of these men were conscientious, reliable and hard-working officers, and their deaths are a distinct loss to the Department.

Patrolman James McNamara was promoted to Sergeant August 1st, 1930, in place of the late Sergeant Joseph A. Delorey.

The Police Signal System was extended and improved during the year by the addition of call boxes and signal lights.

New flashing warning beacons have been installed at Sea and Palmer Streets, Sea Street and Samoset Avenue, and Copeland Street, Furnace Brook Parkway.

A new type of flashing warning beacons has been installed on Brook Street at Farrington Street and at Safford Street. These were both dangerous intersections with the streets too narrow to allow of beacons in the roadway, so a signal was mounted at each corner of the streets, all of them operated from one flashing mechanism.

The traffic signals at the intersection of Hancock, Granite, Maple and Chestnut Streets have been changed from the overhead connected type to the pedestal type connected underground. This was made necessary by the removal of poles and overhead wires from Hancock Street.

The old Cadillac patrol wagon has been replaced by a modern combination patrol wagon and ambulance. Contracts have also been let for the replacement of the old Reo truck, which has outlived its usefulness.

The three light coupes in use by the sergeants at nights and by patrolmen on three of the day routes have also been replaced by new light coupes. These coupes have proved to be very valuable in the work of the Department and much good has been accomplished by their use.

I wish to thank His Honor Mayor McGrath and the members of the City Council for the splendid spirit of cooperation that they have shown in meeting the needs of the Department.

I am extremely grateful to the District Attorney and the members of his staff, Judge Avery and his associates, and the other officials of the court for the kindness that they have shown and assistance they have rendered to the Department.

To the members of the Department I will simply say that I am grateful to them for the interest that they have shown in the welfare of the Department and for the way that they have carried out their duties.

Respectfully submitted,

ERNEST H. BISHOP,

Chief of Police.

Fire Alarms

During the year there were 1,091 alarms.

Bell alarms, 299.

Telephone alarms, 728.

False alarms, 86.

Reported fires, 4 (put out by occupants).

There were 8 second alarms and one third alarm

The Central Station responded to 433 alarms,
 181 bell, 235 telephone and 17 still.

The Wollaston Station responded to 360 alarms,
 141 bell, 200 telephone and 19 still.

The Atlantic Station responded to 293 alarms,
 71 bell, 190 telephone and 39 still.

The Quincy Point Station responded to 193 alarms,
 94 bell, 71 telephone and 28 still.

The West Quincy Station responded to 243 alarms,
 91 bell, 149 telephone and 3 still.

The Houghs Neck Station responded to 128 alarms,
 32 bell, 76 telephone and 14 still.

The total number of feet of hose laid was.....	143,400
Central Station laid	48,600
Wollaston Station laid	27,650
Atlantic Station laid	22,900
Quincy Point Station laid	17,300
West Quincy Station laid	21,200
Houghs Neck Station laid	5,750

Number of feet of ladders raised	6,052
Number of gallons of chemicals used	3,797
Number of hours absent from quarters	1,186
Number of hours engines pumped	268
Number of inspections made	22,107
Number of drills	271 hours
Number of hours hydrants in use	240
Flood lights in use	33 hours

	<hr/> \$89,653 00	<hr/> \$39,524 00	<hr/> \$129,077 00

During the year we had two deaths in the department. They were Chief Alfred L. Mead and Louis Nyhan.

For the year of 1930 we had a total number of 1,091 alarms, and four fires that were reported to us that were extinguished by the occupants without the fire department responding. We had 299 bell alarms, 8 of which were second alarms, and one was a third alarm fire. We had 728 telephone alarms, 60 still alarms and 86 false alarms. The number of alarms are increasing each year as we have had 167 more alarms this year, than last year. The number of false alarms also increased, as we have had more than twice as many as for the year of 1929.

In last year's report, the late Chief Alfred L. Mead recommended that the personnel of the department should remain the same and that the ranks should be filled up, and he recommended that five men be appointed to the department, but the appointments were never made, and as we have had two deaths in the department the past year we are short of men, and I sincerely hope that the necessary men are appointed soon.

Some of the apparatus in the department is showing the signs of wear, and three pumps will have to be replaced some time soon. In the budget that I submitted I requested money to replace the chassis of Ladder No. 3, and also an item for a new car for the Deputy Chiefs. Both of these pieces of apparatus are worn out and are beyond repair.

I also recommend that a captain and a lieutenant be stationed in all stations where a double company are housed.

I respectfully request that a new, up-to-date fire station be built at headquarters. The present station was built forty years ago and

at present is not large enough to house the apparatus and the men properly. This house was built for horse-drawn apparatus and does not comply with the law in regard to motor apparatus. The sills on the main floor have been reinforced from time to time, and at present the main floor and second floor are out of line. We have at present six pieces of apparatus on the main floor, weighing about twenty-five tons, and some time in the near future we may have an aerial ladder truck that will weigh about four tons more than the present one. The sleeping quarters of the men are crowded and the toilets and wash room are not adequate.

Report of Fire Alarm Department

During the year of 1930 our entire resources were called upon to keep abreast with the demands of service from the Fire Department, Police Department, Electric Light Company, Telephone Company, Street Railway Company and local city departments regarding changes of city wires and cables. All demands were met as soon as possible, and all changes were accomplished with forethought of future requirements.

An impartial survey was made of all fire alarm box locations, and many changes were made in order that each box might serve as much territory as possible. Two hundred odd boxes must be placed very carefully when one considers the size of our city, the rapidity of its growth and the thousands of homes, commercial structures and schools within its limits.

Assignment cards located in each station were found to be of limited value due to wide differences in apparatus movements on multiple alarms, therefore, under the direction of the Chief, a complete card index system was installed.

Our underground cable system was extended by the installation of eight thousand feet of cable, thus eliminating miles of unsightly overhead wires.

As all our local city departments and public utility companies are planning major projects for the coming months of 1931 our plans must be enlarged proportionately.

Relative to fire alarms, the sounding of fire alarms at headquarters and the receiving of same should be done in a different manner. Changes should be made in the fire alarm building so that all alarms will be sent out manually. That will require a man at the desk twenty-four hours per day on eight hour shifts in the fire alarm building.

* * * * *

In conclusion, I wish to express my sincere thanks to His Honor, the Mayor, for the interest he has taken in the department, the City Council, and to the officers and men of the department for their cooperation and their splendid work.

Very respectfully,

WILLIAM J. SANDS,

Chief of Fire Department.

REPORT OF INSPECTOR OF BUILDINGS

JANUARY 1, 1931.

HON. THOMAS J. MCGRATH, *Mayor, City of Quincy, Quincy, Mass.:*

DEAR SIR:—I herewith submit the twenty-fourth annual report of the Building Department for the year ending December 31, 1930.

During the year 1930 there have been erected

160 One family dwellings	160
7 Two family dwellings	14
1 Three family dwelling	3
26 Four family dwellings	104
1 Eight family dwelling	8
195	289

Thirty-one mercantile buildings and six manufacturing buildings were constructed during the year.

The Fowler Building was constructed by the Eastern Nazarene College, on their property on East Elm Avenue, making a valuable and creditable addition to the college buildings.

The Houghs Neck Congregational Church Society have built a foundation for a church edifice on Manet Avenue which in all probability will be completed in the near future.

Early in June of this year the Protestant Episcopal Christ Church Society filed an application to build a Parish House, adjoining the church edifice on Elm Street, which was completed in November on nearly the site of the previous one which was demolished. This structure is very complete and is a credit to the society and will, undoubtedly, be of inestimable value to the welfare of the Society.

In September the Roman Catholic Archbishop of Boston filed an application for permit to erect a School Building on the Saint Mary's Church property on Crescent Street; this building is now practically completed and is finely equipped for school purposes.

In November the City of Quincy started the construction of the new operating building at the City Hospital. This work has been started and when completed will be a valuable addition to the hospital buildings which have been erected during recent years. If the Trustees decide to remove the original hospital building and replace it with a new structure, the City of Quincy can well be proud of the buildings comprising the Hospital group as they are all of modern and up-to-date construction and equipment.

This year has been a very quiet one for the Building Department in comparison with past years, but in view of the general world conditions the City of Quincy has maintained a very creditable position.

ANNUAL REPORT OF THE SEWER DIVISION OF THE PUBLIC WORKS DEPARTMENT

(For Financial Statement see Auditor's Report)

Sewer Construction

Approximately five miles of common sewers were built during the year 1930. About two miles of these sewers were located in the Norfolk Downs and Montclair Section, the balance being scattered over the various sections of the city.

Two and one-quarter miles of the Squantum Sewerage System have been installed to date and it is planned to build as much more this year, principally in the northeast side. This section will be difficult and expensive to construct, but will take care of the most thickly settled part of Squantum.

Particular Sewers

The number of house connections made to buildings for the year was 347 in wards as follows:

Ward 1.....	68	Ward 4.....	73
Ward 2.....	21	Ward 5.....	80
Ward 3.....	27	Ward 6.....	78

The total number of feet laid in these connections was 15,991 at a cost of \$15,620.84, thus making the average cost per foot \$.976. Average length per connection.....46.1 feet
Average cost per connection.....\$44.99

Buildings as follows:

Single houses	261	Hospital	1
2-family houses	31	School	1
3-family houses	1	Restaurant	1
4 apartments and over	23	Mercantile	26
Bank	1	Manufacturing	1

Maintenance

The cleaning and flushing of the system has been carried on as usual.

Surface and Storm Drains

Approximately six miles of drains have been constructed, varying in size from 8" to 60" in diameter. Vitrified clay pipe, concrete, plain and reinforced, and metal pipe have been used in this work.

Included with the City Engineer's report will be found a table showing the location, length, size and kind of material used in this work.

Respectfully submitted,

FREDERICK E. TUPPER,

Commissioner of Public Works.

REPORT OF WATER DEPARTMENT

JANUARY 1, 1931.

HON. THOMAS J. MCGRATH, *Mayor*:

DEAR SIR:—The following is the report of the Water Department for the year ending December 31, 1930.

Respectfully yours,

FREDERICK E. TUPPER,

Commissioner of Public Works.

WATER RATES

Total assessment for year 1930.....		\$413,233 01
Amount collected	\$382,748 14	
Amount rebated	599 43	
Amount uncollected	29,885 44	
		\$413,233 01
Amount due from previous years.....		\$22,930 35
Amount collected	\$20,551 05	
Amount rebated	159 79	
Amount uncollected	2,219 51	
		\$22,930 35

Service Connections and Repairs

Total assessment for year 1930.....	\$22,114 38	
Due from previous years	3,878 82	
		\$25,993 20
Amount collected	\$17,205 60	
Amount rebated	278 19	
Amount uncollected	5,241 52	
Amount collected for construction	3,267 89	
		\$25,993 20
Total assessments for water rates for year 1930.....		\$413,233 01
Municipal departments		25,000 00
		\$438,233 01

For Statement of Appropriations see Auditor's Report.

SUMMARY OF STATISTICS

Population estimated State Census, July 1, 1930.....	72,400
Total consumption of water in gallons for year 1930	2,006,913,900
Average daily consumption in gallons for year 1930	5,498,400
Gallons per capita per day.....	76
Main Pipe	
Main pipe laid in year 1930 (feet)	28,151
Total length of pipe now in use (miles)	187.4
Fire Hydrants	
Fire hydrants installed in 1930	57
Total hydrants now in use	1,712
Gate valves installed in 1930	129
Total gate valves now in use.....	2,964

Service pipe laid in 1930 (feet)	11,700
Total length of service pipe now in use (feet).....	774,594
Number of taps made in 1930	260
Total number of taps now in use	16,839
Number of meters installed in 1930	434
Total number of meters now in use.....	16,293
Per cent of services metered	98
Number of leaks in mains for year 1930.....	26
Gallons of water used per tap per day	326
Water services renewed in 1930	87
Meters taken out for test and repairs	1,052
Service pipe cleaned on poor pressure orders.....	661
Repairs made to service pipes	490
Average length of services (feet)	46

Table showing the yearly, daily and per capita consumption of water, in gallons for the past five years.

Year	Yearly Consumption	Average Daily Consumption	Per Capita Per Day
1926.....	1,736,305,000	4,757,000	77.0
1927.....	1,825,365,000	5,006,000	78.8
1928.....	1,901,589,600	5,195,600	76.9
1929.....	2,042,725,200	5,596,507	80.2
1930.....	2,006,913,900	5,498,400	76.0

Table showing the monthly and daily average consumption of water in gallons for year 1930.

	Per month	Per day	Daily average for year
January	169,746,700	5,475,700
February	155,176,000	5,542,000
March	171,085,900	5,518,900
April	160,095,000	5,336,500
May	172,301,100	5,558,100
June	168,960,000	5,632,000
July	179,313,300	5,784,300
August	174,381,200	5,625,200
September	166,413,000	5,547,100
October	163,741,200	5,285,200
November	162,129,000	5,404,300
December	163,571,500	5,276,500	5,498,400

Usage 2,006,913,900 gallons for year 1930.

REPORT OF INSPECTOR OF WIRES

JANUARY 1, 1931.

HON. THOMAS J. MCGRATH, *Mayor*:

DEAR SIR:—I respectfully submit my annual report as Inspector of Wires for the year ending December 31, 1930.

Inspection in Buildings

The following specified schedule of electrical inspections made of lights and other appliances installed:

Number of permits issued in 1930..... 1,059
Fees received for the above..... \$1,314 00

Fees received from Jan. 1, to Dec. 31, 1930, inclusive:

January	\$56 00	July	\$193 00
February	45 00	August	106 00
March	62 00	September	150 00
April	118 00	October	144 00
May	153 00	November	57 00
June	60 00	December	170 00
Total			\$1,314 00

Number of electricians doing work in 1930..... 161
Inspections made as per permits issued..... 1,326
Number of unfinished installations..... 157
Number of installations reinspected..... 85
Total inspections made during the year..... 1411
Total amount of permits issued to the Quincy Electric
Light & Power Co., to install service and electrical
appliances 666

Number of New Buildings Wired

Single houses	226
Two-apartment houses	12
Three-apartment houses	2
Four-apartment houses	24
Mercantile houses	15
Manufacturing	4
Garages	55
Miscellaneous	22

WM. C. FOSTER, *Treasurer.*

Hingham, December 31, 1930.

Trustees of Weymouth Fore River Bridge,

GENTLEMEN:—I have examined the accounts of William L. Foster, Treasurer of the Trustees of Weymouth Fore River Bridge, for the year 1930, reconciled the bank account, and I hereby certify that the same are correct with proper vouchers.

(Signed) H. IRVING BOTTING,

Town Accountant.

Hingham, January 31, 1931.

REPORT OF THE CITY PLANNING BOARD

*To His Honor the Mayor and Members
of the City Council,*

Gentlemen:

The Planning Board of 1930 has had several new projects before it for consideration involving new traffic Arteries through Quincy. These have been studied from various angles and we herewith extend our recommendations with illustrations.

Shawmut Trail Parkway

This parkway will extend from the Furnace Brook Parkway at Larry Place over the land to the west of Swingle's Quarry and thence over the old Quarry Railroad location and private lands emerging at the intersection of Reedsdale Road, Pleasant Street, and Quarry Road in Milton, thence continuing on to Dedham, our County seat.

This highway will be very beneficial in reaching Dedham and points west.

The legislative body of the Commonwealth made appropriations to cover the land takings damage so that in 1931 they should appropriate the amount necessary for its construction.

The Division of Metropolitan Planning recommends that the City of Quincy provide a direct connection from the railroad underpass at the Furnace Brook Parkway to Copeland Street at Common Street or the William T. Shea Park. This would make an improved outlet of the Shawmut Trail Parkway to Copeland Street and points south.

We hope that you will consider this connection and act favorably towards it. The estimated cost, including land takings and construction, would amount to \$60,000.

Metropolitan Golf Course

In the Blue Hill Reservation there is a wonderful opportunity for a Golf Course on what is known as the Redman Farm.

This location is on the shores of Ponkapoag and only ten miles from the centre of Quincy.

We are including in this report some photographs of this location showing its adaptability and the small expense that would be necessary to build a course.

This matter has been taken up with the Metropolitan Park Commissioners, who feel quite favorable to its construction provided there would be a proper patronage of the Course.

In our local distribution of this report we are including a blank for membership which allows all privileges of the course for a season at the small amount of \$20.00. This is something for the benefit of all of the South Metropolitan District which includes Quincy.

This board submits this location for your consideration, as the expense to the City will be small.

This Course would be constructed and maintained by the Metropolitan Park Commission, thereby making it a public course.

Neponset River Parkway

The City Planning Board of Boston under date of April 11, 1930, submitted in their report the Proposed Neponset River Parkway crossing the river in Milton and extending to the Milton-Quincy line.

Their study is meritorious but not complete and we are hereby submitting a study for its extension in Quincy. This Parkway would run along the Neponset River north of the Montclair residential section to Hancock Street opposite the Metropolitan Parkway which extends into the Quincy Shore Reservation.

It is possible to cross Hancock Street overhead, as the Metropolitan Parkway goes over the N. Y., N. H. & H. R.R. Co. This would improve the marsh land area along the Neponset River and we believe it should receive your consideration for the future development of this section.

Hull Highway

The Hull Highway that has been submitted to the special committee on bridges of the Legislature is shown on plans filed with this Board.

This Highway begins at Sea Street and Babcock Street running along the shore of Quincy Bay over Manet Avenue, Island Avenue and private properties to Nut Island, thence by a bridge to Peddock's Island.

This Highway would continue across Peddock's Island, thence across Hull Gut by a bridge to Pemberton Point, Hull.

The plans show the Highway as sixty feet wide over its whole length and provisions for access to the business section of Houghs Neck over Fensmere Avenue. From the point marked "A" at Island Avenue and Sea Avenue to the point marked "B" on Peddock's Island a bridge could be constructed at grade 45.00. This would give a clearance under the bridge at high water of approximately 35.00 feet, thereby eliminating interruptions of traffic by an open draw bridge.

Southern Artery

The extension of the Southern Artery from River Street along the shore of the Town River to Washington Street at the Fore River Bridge is under consideration for a modification of the original layout. These studies have not as yet been completed and will be given consideration in the future.

Fore River Bridge

It is quite evident that a new bridge will be required over the Fore River in the near future.

The State should bear a liberal share of this expence due to the heavy traffic from all parts.

The board suggests that the location be changed just north of the present bridge and that the height be increased. This bridge could be at grade 45.00, thereby having less interference by the openings of the draw. The approach on the Weymouth side would be the continuation of the present decline on Bridge Street and the approach on the Quincy side would extend to Dee Road.

With the bridge at grade 45.00 it would be possible to extend the Fore River Railroad under Washington Street, thereby giving railroad facilities to any industrial developments on the Town River.

Old Colony Parkway Extension

A Parkway from the Old Colony Parkway, Neponset, should be constructed crossing the Neponset River at the old location of the Victory Bridge, thence over Victory Road to the Quincy Shore Reservation at Atlantic Street.

This would be the proper continuation of the Quincy Shore Reservation and alleviate considerable congestion which is now apparent on the Neponset Bridge on Hancock Street.

Franklin Street Extension

This board still considers the extension of Franklin Street as the best improvement of the Edwards Meadows, making a through way from Granite Street to School Street, giving easy access to and from the Centre.

We also recommend, owing to the discussions of not sufficient parking, that the City take that portion of vacant land south of Cliveden Street and east of Franklin Street for additional parking.

Traffic Circle

The success of traffic circles at heavy traveled intersections has been very favorable throughout the State to date.

We recommend that the City in conjunction with the Metropolitan Park Commission consider a traffic circle at the junction of Adams Street and the Furnace Brook Parkway. This is a very bad crossing and with the construction of the Shawmut Trail Parkway the traffic will be greater at this point.

Zoning

The Planning Board introduced the original plan for zoning to the City Council in 1926. This was adopted by the Council and later rescinded by a referendum vote of the people.

During the past four years this subject has been discussed quite extensively and it is quite apparent that it is a necessity to the future growth of the City.

The City Council of 1930 has given this matter considerable attention and should adopt this ordinance.

In our survey of the State, we find that seventy cities and towns containing seventy-two per cent of the population of the State are now being protected by Zoning Ordinances.

New Industry

It is essential for any city to have increasing industry to reduce the tax rate and it should be encouraged. We are submitting a photograph of our latest addition in South Quincy.

The personnel of our board has changed during the year, owing to the resignation of Theo J. Craig, who moved out of the City.

We were fortunate to have Clifton H. Baker appointed to fill the vacancy and feel that he will be of great help to the Board.

The Governor of the Commonwealth in his judgment has seen fit to appoint our Chairman on the Metropolitan Planning Board, which gives us able representation for this district.

Respectfully submitted,

CITY PLANNING BOARD:

WILSON MARSH, *Chairman*,
JAMES E. W. GEARY, *Vice Chairman*,
JAMES J. McPHILLIPS,
JOSEPH ANGELO,
CLIFTON H. BAKER.

WALLACE S. CARSON, *Clerk*.

REPORT OF BOARD OF SURVEY

JANUARY 1, 1931.

To His Honor the Mayor and Members of the City Council:

GENTLEMEN:—The Board of Survey respectfully submit herewith its sixteenth annual report for the year ending December 31, 1930.

The Board organized early in the year and reelected Mr. William G. Shaw as Chairman for 1930. It is with regret that the Board lost the assistance and cooperation of Mr. Shaw on April 12, 1930, due to his sudden death. He was first appointed as a member of the Board of Survey in 1922 and had given generously of his time and experience in assisting in the work of the Board during these years.

Mr. Arthur Caruso was appointed May 1, 1930, by the Mayor to fill the vacancy caused by the death of Mr. Shaw.

Mr. George H. Newcomb was elected chairman of the Board for the remainder of the year.

There were not as many new land developments in the City as in previous years, this probably being due to the quietness of the real estate market.

A public hearing was held on January 23, 1930, on the petition of the Harbor View Land Company for the laying out of new streets off Willard Street, near the Braintree Town Line.

Approval for the layout of Rangeley Road on this petition was granted on July 14, 1930, the other streets having tentative approval subject to the completion of the plans and the grading of the streets.

The Board held a public hearing on October 10, 1930, on the petition of Hilda Almquist for the laying out of a new street off Franklin Street, which was named Hoover Avenue. Tentative approval was given on the layout, final approval being withheld until the plans and grading are completed.

The Board wishes to express its appreciation to the Sewer and Water Departments for the cooperation it has received from them during the year, by withholding mains on new streets until approved by the Board of Survey.

Respectfully submitted,

GEORGE H. NEWCOMB, *Chairman*

WILLIAM A. CRESSWELL,

ARTHUR CARUSO,

Board of Survey.

WALLACE S. CARSON, *Clerk.*

ANNUAL REPORT OF CITY SOLICITOR

HON. THOMAS J. McGRATH, *Mayor of Quincy*:

DEAR SIR:—The following important court cases have been disposed of during the year 1930:

The case entitled "Merrymount Company vs. City of Quincy and the Metropolitan District Commission," wherein the validity of land taking proceedings under an act entitled "An Act authorizing the City of Quincy to acquire land for the purpose of the extension of the Quincy Shore Reservation" in said city, was before the full bench of the Supreme Court at the time of my last report, January, 1929. Since that time the case has been decided in favor of the city and the Metropolitan District Commission.

In the case of "King vs. Mayor of Quincy," wherein the question of whether, under the charter, the auditor should be appointed by the Mayor or by the City Council, the full bench decided that the Mayor is the only party to make the appointment.

The recent passage, by the Legislature, of a new grade crossing act, entirely changing the law of the Commonwealth on this subject, has delayed the completion of the Quincy grade crossing project. At the time of the passage of this act, all details of a comprehensive scheme for the elimination of the grade crossing at Water Street and the completion of the work at Quincy Station had been worked out by the city and the railroad company. Negotiations have now been completed whereby the Public Works Department has approved of an agreement, entered into by the city and the railroad company, embodying the detail plans and apportionment of cost of the work, and all formalities required by the new law having been complied with, it is expected that actual work will begin without further delay.

There have been an unusually large number of accidents wherein suits for damages have been brought against the City. Many opinions have been submitted on Zoning Measures that have been before the City Council in the past year.

Respectfully submitted,

J. J. McANARNEY,

City Solicitor.

REPORT OF ENGINEERING DEPARTMENT

JANUARY 1, 1931.

To His Honor the Mayor and Members of the City Council:

GENTLEMEN:—I herewith respectfully submit the thirty-first annual report of the Engineering Department for the year ending December 31, 1930.

This department is called upon to furnish information for almost every department connected with the City Government. Some departments have few requests but others are being cared for regularly during the year.

I shall not endeavor to itemize the work that is done for each department but shall give a short resume of the substance.

City Solicitor

Surveys and plans are made for all cases against the City which are before the courts during the year.

A report of all accidents that occur is received from the City Clerk, which are immediately investigated and levels and measurements taken that will be necessary later if brought before the courts.

Plans and descriptions of all lands taken by eminent domain or deeded are prepared for the City Solicitor.

City Council

The requests of the Council have been numerous this past year. The orders passed through the Council have increased 28 per cent over the year 1929.

All orders pertaining to the acceptance of streets and permanent sidewalks, including betterment assessment orders, were prepared by this department, also orders for widenings and land takings by eminent domain.

Plans were prepared for public hearings held on 112 streets which were petitioned for acceptance by the City. Estimates were prepared and given to the Council on these projects including drainage that was necessary for proper construction of the same.

The City Engineer was required to attend all meetings of the Council and of the Council Finance Committee to give whatever information was requested of him as to the costs and merits of the various projects being considered.

Additional work was done by the Council on zoning and all plans were prepared by this department. All hearings that were held on this matter in all sections of the City were attended by the City Engineer.

City Clerk

Plans were prepared for all streets accepted or widened and all lands taken by eminent domain and delivered to the City Clerk for recording in the Norfolk Registry of Deeds.

Tax Collector

On requests that the Tax Collector receives for information as to outstanding sidewalk and street betterments, 470 were referred to this department for the requested information.

In preparation for the tax sale of 1929 delinquent taxes, descriptions of about 4,000 parcels of land were made for the purpose of advertising for the sale.

Assessors

The plans showing all parcels of land in the City which are assessed are kept in this office. They show the plots, areas, lot numbers and owners of the various parcels. These are changed continually by the transferring of land to different owners. These plans were completed for the assessment of April, 1930, with the new owners and buildings thereon.

A copy of each permit issued by the Building Inspector during the year was received and these new buildings were located and measured and placed upon these plans.

During most any year there are about 5,000 transfers of property which by making changes reduces the life of these plans requiring new plans to be made from time to time.

Park Department

Upon request of the Park Commissioners baseball fields were laid out on every playground in the City, and when the season was over they were laid out for football.

Plans and grades were given on the Hollis Avenue Playground, the Merrymount School Playground, Ward Two Playground, and Ward Four Playground, where work was done on grading.

Several locations were laid out for beauty spots where flower beds were planted.

Cemetery Department

During the year a study was made on the future development of the land remaining available at the Mt. Wollaston Cemetery.

Two additional sections were laid out into lots during the year.

School Department

The addition to the Atherton Hough School was completed and the grounds laid out and graded.

The Montclair School addition was completed early in the year and the grounds around this school were also laid out and graded.

Several new locations for schools were asked for by the School Committee and plans for these were made by this department.

The addition to the North Junior High School was started near the end of the year and drains were installed for the grounds.

The grounds around the Washington School were graded and covered with a hard surface.

Fences were laid out and installed at several of the schools during the year.

Building Department

The work of giving grades for the location of all buildings that were constructed during the year was continued by the City Engineer. Each permit was investigated and a letter to the Building Inspector and the owner of the property was sent out. There were 566 of these applications taken care of in all parts of the City.

The applicant was charged \$2.00 for each permit for this service which totaled \$1,132.00, which was turned over to the Treasurer as receipts from this department.

This work has been of wonderful value to the owner and also to the city. The result being that buildings are being placed at a grade to eliminate their getting water in the rainy season.

Lines and Grades

On request of property owners lines and grades of accepted streets are given. These requests invariably come from property owners who are contemplating the improvement of their property such as granolithic walks, grading lawns and building retaining walls. This service does not include placing lot corners or lot lines; these must be given by a private engineer.

During the year there were approximately 100 requests for this service.

Sewers

All sewers are laid out by this department, and during the year there were 5.267 miles constructed on 51 different streets in all parts of the City. For the schedule of these sewers see Commissioner of Public Works Report (Sewer Division).

Some of the important extensions were the sewer from Furnace Brook Parkway at Ida Street through Hayward Place, Conant Street, West Street, and Hynes Avenue to Station Street. This was a very much needed extension and required quite a cut in parts and encountered considerable ledge.

The extension on Hobart Street which required piling enabled us to connect Wilson Avenue and extend through Harvard Street and Elliot Avenue. This completed quite a section in the Montclair District.

The extension of the sewage system in Squantum was continued and we now have over two miles laid in this area and hope to install enough in 1931 to assure the Metropolitan Sewer Division that they may get started to build a pumping station to take care of this area.

For Squantum sewers placed to date see schedule attached.

All sewers were constructed by the Sewer Department of the City of Quincy.

There is now a total of 131.827 miles of sewer laid in this City.

Surface Drains

In the past few years drainage has been receiving its proper recognition in the City. During the year there were 7.459 miles constructed on 105 different streets in all sections of the City.

Some of the main drains that were installed included Wilson Avenue from the Montclair Brook to the railroad at Newport Avenue. This was a 42-inch line and eliminated the old inadequate brook which ran through private property and under buildings between these two points.

The Montclair Brook was started and should be completed between Wilson Avenue and Holbrook Road in 1931, requiring a 60-inch pipe.

The piping of the Furnace Brook from the Furnace Brook Parkway at Newport Avenue across Oakland Avenue to the Furnace Brook Parkway at Anderson Road was a much needed improvement. This was the old bed of the brook and at times was very disagreeable from a health standpoint.

Another good improvement was the relieving of the Standish Avenue pocket which required a drain from the Furnace Brook at Douse Road under the railroad, through private lands, Old Colony Avenue, Greenleaf Place and Warren Avenue to Standish Avenue. This pocket in Standish Avenue has been a cause of discontent on the part of the property owner for some time and is now quite an improvement.

Considerable work was done on making plans of all drains that have been installed in previous years, and no record having been made of same.

The majority of our surface drains during the year were laid with both plain and reinforced concrete pipe which we believe will make them permanent construction.

All surface drains were constructed by the Sewer Department of the City of Quincy.

For itemized list see drain schedule attached.

Accepted Streets

There were 40 streets accepted during the year by the City Council amounting to a length of 4.76 miles.

These streets were all laid out under the betterment act and plans and schedules were recorded at the Norfolk Registry of Deeds, having been prepared by this department.

The construction of all these streets was not completed due to some of them not being accepted until the latter part of the year.

There were six street widenings made and the land taken by eminent domain.

All construction was done by the Highway Department of the City of Quincy.

The streets that were not completed will be started early in the spring of 1931.

For list see schedule of accepted streets.

Rebuilt Streets

There were 24 streets rebuilt during the year covering a total of 6.551 miles.

With the total mileage of streets now accepted the rebuilding of streets shall become quite an item before many years.

The most important street rebuilt was Sea Street from the Southern Artery to Babcock Street, about two miles in length. The trees on this street were removed allowing the roadway to be widened from 18 feet to an average of about 45 feet. This is the direct line from Quincy Square to Houghs Neck.

Washington Street from Canal Street to the Southern Artery was also rebuilt. This is one of the main arteries to the South Shore.

At the end of the year the majority of our main thoroughfares were in very good condition.

Granolithic Sidewalks

There were 6.61 miles of granolithic walks constructed during the year on 40 different streets. There was also 1.4 miles of granolithic curbing installed. The majority of this work was done on the beach side of Wollaston and Atlantic.

This work was done under contract by Henry Lavelle between July and December.

Construction orders and layout of these walks, including final measurements and betterment assessments, were done by this department.

The cost of granolithic walks is greatly increased by the necessity of constructing small retaining walls, moving hedges, and regrading lawns. This expense is caused by property owners building walks and grading lawns to please themselves instead of making use of the service of this department in getting lines and grades before construction.

For itemized list see Granolithic Sidewalk schedule.

Asphalt Sidewalks

During the year asphalt sidewalks were placed on a large scale, much beyond any previous year, there being a total of 16.634 miles installed on 62 streets in various sections of the City. These walks were mixed on the location and prove to be a wonderful value to some sections of the City.

The demand for this type of walk is increasing every year as they are a hard surface and there is no assessment of betterment on them.

These walks were all built by the Highway Department of the City of Quincy.

For itemized list see Asphalt Sidewalk schedule.

Zoning

The City Council appointed a committee to take up the matter of Zoning early in the year.

This committee prepared a new text and this department prepared a new plan covering the whole of the City.

The plans were readjusted continually and public hearings were held in every section of the City which were attended by the City Engineer, who explained the boundaries of the different classifications of the plan.

The finished plan was adopted on December 29, 1930, and a petition for referendum was started which may eliminate all work that has been put in on this map during the year.

I wish to express my appreciation for the cooperation which has been extended to me during the year by His Honor the Mayor, the members of the City Council, city officials, and the personnel of this department.

Respectfully submitted,

WALLACE S. CARSON,

City Engineer.

ACCEPTED STREETS—1930

Streets	Location	Ward	Width in feet	Length in feet	Estimated Cost	Accepted
Aberdeen Road	Bay View Road to Green Street.....	6	30	205	\$3,000	July 16, 1930

Being cared for by private societies, adults	2
Being cared for in Tewksbury Infirmary	6
Being cared for in Braintree Infirmary	2
Being cared for in Pondville Hospital	0
Being cared for in Private Hospitals	6

The past year has again shown a great increase in relief to the needy of the city, more so than in previous years. This has been due, as heretofore, to unemployment and sickness.

Our City Infirmary is filled to its utmost capacity and we are boarding a great many cases in private and boarding homes.

At Thanksgiving this department distributed over one hundred baskets. Christmas, with the cooperation of this department and the school children of the city, the Family Welfare Society was able to distribute over one hundred baskets, including necessary food such as meat and vegetables for the Christmas dinners; also toys of all descriptions for the children.

I wish to take this opportunity to say that more spacious quarters are regarded as an imperative need. Congestion in the office is very great and the atmosphere is greatly affected. Considering this from a health point of view, the situation should be altered so that a greater degree of ventilation should be possible. The general office for employees is very much overcrowded, desks are close together and result in a degree of confusion and nervous strain. The present arrangement of the office does not permit the proper handling of applicants for aid, neither does it give opportunity for segregation of employees necessary for the efficient performance of their duties. Applicants should have an opportunity to give information requested of them and also receive their orders for aid free from the observation and hearing of others. As this need is urgent, the department pleads for early action by His Honor, the Mayor.

It is the department's sincere desire to see that the activities of the department are so shaped that the greatest amount of good may be done for those needing its service and yet at the same time not lose sight of the fact that economy in expenditures must be practiced.

I wish at this time to thank all those affiliated with me in the work of the Welfare Department, His Honor, the Mayor, and all departments who cooperated with me so heartily in the carrying on of the work for the past year.

Respectfully submitted,

CHANNING T. FURNALD,
Commissioner of Public Welfare.

ANNUAL REPORT OF THE PARK DEPARTMENT

To the Honorable Mayor, THOMAS J. McGRATH.

DEAR SIR:—Every modern city of the first or second class has a number of official boards, among which are a Board of Park Commissioners.

The reason for the creation of this board and the necessity of the same is possibly a question upon which a number of our citizens are rather divided in their opinion; it, therefore, behooves us, at the occasion of preparing the forty-second report of the "Quincy Board of Park Commissioners," to briefly meditate upon the reasons why a city should have a group of men to perform the work which this board is engaged in.

In the early decades of the Republic, we were an agricultural people; our cities were few and far between and of limited population, made up mainly of men bred upon the farm, blessed with the physical developments and rugged health which came from the life in the open, from simple food, and well ventilated homes.

The change to city conditions, with its lack of physical labor, its indoor life in crowded and not seldom ill-ventilated homes, quickly told upon the physical well-being of the city dweller. Especially was this true of the children born and bred under these unfavorable conditions, with little opportunity for play, the chief method of child development.

In the long ago, our cities were without parks, our schools without gymnasiums, physical education was unknown. The city child was not expected to have as strong a physique as the country bred boy or girl had. This tendency to a loss of physical vigor increased in subsequent generations of city-bred people. Something had to be done to stimulate into the city folks the vigor of outdoor life; something had to be done to provide open spaces where our children could enjoy the great outdoors, where they could bask in the balmy sunlight, where they could fill their lungs with nature's pure, fresh air.

Conditions began to arise among the children in our cities, especially in the more congested districts which men of far vision took notice of with apprehension. The general status of the health of city children, due to the lack of fresh air and sunshine, caused alarm. Tuberculosis, the white man's plague, began to gain a stronger foothold from year to year.

Children, away from the beauties of nature, knew not how to appreciate our then small parks; in fact, to destroy the shrubbery and flowers in our parks was considered an almost heroic act by the youth of those days.

Thinking men and women throughout our land began to urge the erection of gymnasiums for our schools; they urged physical education. For years wide-awake citizens of the leading cities throughout our land have seen the necessity of the creation of parks and have donated tracts of land for park and playground purposes. Gradually these have been laid out in the various cities of our country; parks, beautiful and practical.

It is, therefore, the pledge of your "Board of Park Commissioners" to acquire, preserve and beautify our city parks, to pro-

vide adequate playgrounds for our children in general, and to give our citizens an opportunity to enjoy nature in her grandeur and majesty, to have their children learn to appreciate nature, and to provide for them an opportunity to play outside where they may inhale pure fresh air and enjoy the sunshine, so that they may become strong, healthy citizens, that is, in short, the purpose and the aim of this Board.

With this in mind, our Board has completed another year's work and, herewith, wishes to submit to you, Mr. Mayor, and to the public in general a short resume of our work during the year of 1930.

We have arranged the various parks in the city in the wards in which they are located with the sincere hope that the ward councillors will study the work accomplished and take note of the recommendations for the betterment of parks in the district they represent.

Ward 1—Houghs Neck

This is one of the most ideal playgrounds in the city with ample space for all sports. Interest was keen in all activities during the summer and fall. Teams from this playground won the championship in baseball and slugball. Baseball and football were the leading sports. A permanent fence is needed and a suitable gateway properly marked. Bleachers, back stop, flagpole straightened and painted, infield graded for baseball. One band concert. Playground pageant and exhibit held at the end of the playground season. Two supervisors.

River Street Beach

A popular place during the bathing season, scene of many picnics and penny sales. Beach under care of park workers.

Maypole Park

Flagpole painted and flower beds laid out.

Narragansett Park

Shrubs and flower beds trimmed and cared for.

Faxon Field

Lined off for soccer and field hockey for girls. Used by High School for drills. This piece of land makes a beautiful approach to the city from the State Reservation; when completed will be a fitting memorial to its donor, Mr. Henry M. Faxon.

Faxon Tennis Courts

Five courts under the direction of a paid instructor through the generosity of Henry M. Faxon, who also maintained the upkeep. Tennis championships of Quincy High School and junior and senior open tournaments for the City of Quincy were played off here. The Park Department is greatly indebted to our good friend for the many pleasant hours our people were able to enjoy on these courts.

Manet Lake

One of our natural skating ponds cleaned out weeds and other growth, then flooded. Hockey rink erected and equipped with goal nets.

Rink used by teams in the Amateur Hockey League. Flood lights were provided by a special act of His Honor the Mayor.

Ward 2—Baseball Field

There was a constant demand for this field by teams in the Industrial League and semi-pro and amateur teams of the district. Flagpoles straightened and painted. Bleachers, backstop, players' bench painted and repaired. Infield graded, outfield filled in. A fence is necessary for safety in the outfield, which drops off into a steep gravel pit.

Stewart Park

Shrubs and flower beds make this one of the beauty spots of this section, under care of Department.

North Street Playground

Ideal shaded spot for children to safely play during the summer months. Received weekly attention of park workers.

Quincy Point Bathhouse

Open from June to September. Proved a popular place for mothers and children during the vacation period. Usual repairs made. Two attendants, one male and one female, on duty from 10.00 A. M. to 6.00 P. M. daily. The unsightly gravel pit could be beautified. Hand ball courts erected would make this beach a popular one for the young and older men of the city.

Avalon Beach

This beach, as in other seasons, proved a popular resort for the citizens of this district. A swimming instructor held daily classes in swimming and life saving, which were encouraged by awarding buttons and emblems in cooperation with the Red Cross. The Swimming Carnival, sponsored by the Association of Quincy Point, was held on Sunday, August 17th. It proved to be a big success, and upwards of 10,000 people were in attendance. Prizes were awarded in all events. Members of the Park Board acted as judges. Four rafts, one water chute and a life boat are park equipment. Recommend that a comfort station and more benches be erected this year as a necessity. A suitable shelter should be built over the sand box for the children. The one now there is poorly erected and does not serve the purpose.

Whiton Park

A beauty spot. Drinking fountain equipped with dry well to drain off water. Shrubs and grass plot under care of park workers.

Ward 3—Elm Street Playground

Strictly a children's playground, a most popular one, supervised by two instructors, well shaded, an ideal spot for supervised play. Settees, sand box painted, gate shifted and new wall built. Base-

ball team from this playground were runners up in playground league. Comfort station needed. Doll carriage parade at the end of season one of the high lights of exhibition.

Robert Burns Monument

Keep statue clean and cut grass; spot lights here for night lighting.

Fort Hill Square Park

Flower beds set out, received regular care of park workers.

Bradford Street Playgrounds

Tennis court amesite, playground under supervision of two instructors, sand box and flagpole painted. Tennis court used as skating rink for children in winter. Pageant and display of work held by supervised classes.

Smith Field Playground

Largest attended playground in the city. Three instructors, merry-go-round erected, a new novelty in Quincy which proved very popular. New slide installed. Bleachers and backstop on ballfield painted. Flagpole straightened and painted. Infield graded and kept in shape for baseball. Flood lights for football practice provided. Baseball and football games played here in season. Recommend that the brook be covered, a new loam infield for the ballfield, and comfort station is an absolute necessity. Pageant, display of work and sports of the supervised playground season was held by the children of this district and was attended by the largest gathering of parents during closing week.

Liberty Square

One of small plots that have been beautified with shade trees and flower beds.

Ward 4—Shea Park

A beautiful park laid out with flower beds, grass trimmed. Flagpole painted, dry well dug around drinking fountain.

St. Moritz

The State reservation in the Blue Hills the winter playground of the South Shore. The Park Board cooperated with the Blue Hills Recreation Club to obtain betterments from the Metropolitan District Commission. Painted large toboggan slide and ski jump. Erected children's toboggan slide and hockey rink. Cleaned the ponds for skating. Sixteen flood lights installed for two skating ponds and toboggan slides. The Park Board acted as judges during the winter carnival of 1930. Amateur hockey league teams played their games in the rink on holidays and Sundays. Six toboggans, property of Department, in constant use.

West Quincy Baseball Field

Field used mostly for baseball by Industrial League, semi-pro and amateur teams. Bleachers and backstop painted, grade outfield and infield. Dry well dug around drinking fountain. Grass cut, field lined for ball games. Floodlights for football practice. Comfort station recommended.

Playground

Popular place for the children of this district well attended. Two instructors. Flagpole and sandbox painted. Dry well dug around drinking fountain. Grass cut and ground cleaned weekly.

Adams Street Lots

Two striking islands of beauty laid out with flower beds.

Ward 5—Merrymount Park

Fifteen acres of natural beauty, making it one of the most beautiful parks in the state, with a pageant field, bathing beach, soccer field, football gridiron, cinder track, baseball fields, tennis courts, picnic grove and band stand.

Third Field

Scene of the Quincy Massachusetts Bay Colony Tercentenary Pageant. Picnics were held here every week-end by churches and societies of Quincy. Two pavilions for refreshments and dancing make it an ideal spot.

Second Field

This field was used for baseball, soccer and parking.

The Quincy Chamber of Commerce Trading Post was held on this field during Tercentenary Week. When the pond is filled in a ball field can be laid out to help the over demand for the upper field.

Upper Field

This field was in constant use during the spring and summer months for band concerts and baseball. The gathering place for the American Legion Membership Drive, which drew thousands of people from all over greater Boston to witness the attack of Quincy from the air.

The baseball field was put in excellent condition by having a turtle back diamond in the infield built, and treated with calcium chloride. This work was supervised by an expert engineer.

The bleachers, backstop and players' benches were painted and repaired.

The dressing room under the bandstand was equipped with hooks and a shower bath installed. New fence built along driveway. Tool house enlarged, equipped with necessary implements to properly carry on the work.

Monument erected to Charles Francis Adams, 2nd, on grounds facing Southern Artery.

The baseball field was used by the Quincy team of the Boston Twilight League, Granite Trust team of the Bankers and Brokers League, and semi pro and amateur teams.

Tennis Court

It was in constant use at all times under the supervision of a caretaker. Dry well installed around the fountain to prevent water running on the courts.

Pfaffmans Oval

A natural spot to view athletic contests. During the summer this was a popular place for drills. The school children of the city held their pageant here before thousands of spectators. N. E. A. A. U. meet was held as part of the Tercentenary Week celebration. Soccer games were played in the spring. Semi-professional football and the Quincy Park Board Amateur League use the oval every Sunday and holiday during the season. Quincy High School five afternoons a week for practice in football and track.

The field was roped and lined off for each game.

Two bubbler fountains were installed. New boards put around the cinder track, which was loamed and rolled. Flood lights for football practice were installed. Soccer goal posts equipped with regulation nets.

Field House

A park this size should have a field house equipped with dressing rooms, shower baths, a storage room for park equipment. As this is centrally located it should have a room for the Board to hold weekly meetings and properly carry on the growing activities of the Department.

Band Stand

The band stand's present location is not in a suitable place to accommodate the large turn out of our citizens who enjoy band concerts. It is located alongside of a road leading into the park. Facilities for parking are inadequate.

To protect the baseball field from the damage wrought by machines driving over it the Board was forced to prohibit this practice. As the majority of the people enjoy a concert sitting in their cars we recommend that this band stand be discontinued and moved to the lower field, where cars can park all around it if erected in the center of the field.

Pine Island

A bridge to Pine Island will open up this popular picnic grove to the public. At present it can only be reached by boat—the bridge was wrecked two years ago by ice and tide. Would recommend that a pontoon bridge be erected for summer use and pulled ashore during winter months.

Municipal Band Concerts

The Board is heartily in favor of a system of municipal band concerts, and will quote a statement of Walter M. Smith, Quincy's nationally known band leader and trumpeter, in which he states: "The American Bandmasters' Association convention to be held in Boston in April of 1931 is a fact that should be of the greatest interest to all lovers of band music, as the impetus which this meeting will give to band music in this locality through the focusing of the attention of the public and public officials on the band as a concert organization can hardly be overestimated. It may easily be expected that band concerts in the city of Boston will be on the increase as a result of the limelight of publicity being thrown on band music in general, and it is not unreasonable to suppose that possibly our own City of Quincy may feel the urge to do a little more toward the summer entertainment of her citizens and

her guests. For instance, a regular evening concert, once each week, sponsored by the city, and free to all, in Merrymount Park on the Pageant Grounds, away from the noise of the traffic of Hancock street, with a program of good music well played by a good band, and free from 'Song Pluggers' and all musical trash, could not fail to attract an attentive and appreciative crowd of music lovers of from five to ten thousand people nightly. Such a plan is not at all unusual in many of the western cities of the size of Quincy, and would bring our city to the forefront among eastern cities in the matter of municipal music.

"We have the bands, and the most ideal location in Massachusetts. The cost would be so small as to be practically negligible in comparison with the creating of such an attractive feature in our public life. Let us hope that sooner or later the city will awake to what it has in its midst and do its part in restoring at least some part of loving music to the people."

Park Roadways

The two roadways leading into the park are the cause of a real dust nuisance on windy days. It is the purpose of the Board to see that this is abated by oiling or a treatment of calcium chloride.

Bowling Greens

There is ample space to build a bowling green at Merrymount Park. This will be a popular move as many of our citizens are members of clubs which now use the greens at Franklin Park and Milton. At the same time give the middle-aged and older men a chance to enjoy our park facilities.

Wollaston School

The playground facilities are available only during the supervised playground season. The group dancing and display of work, especially by the basket weaving class, were the features at the end of season exercises. Two supervisors.

Massachusetts Fields

Children's playground in rear of school provided with facilities for supervised play during the season, one instructor. Basketry, tray work and needle work were of excellent design and well done.

Butler's Pond

Butler's Pond, flood lights erected by a special act of the Mayor. Ice cleared of snow and flooded when necessary for good skating.

Safford Park

Considered the most striking of the smaller parks, well shaded, laid out with shrubs and flower beds, well cared for by park workers. Suggest that more settees be placed here so that the people in this section can enjoy its beauty.

Ward 6—Montclair Playground

The Board in its last year's report recommended the early completion of this playground as a long felt want in this section. The covering of the brook will solve the problem and the rest will be a matter of filling.

Some work of a temporary nature was done, as this park has not been accepted by the Board. Two instructors accomplished much and held a successful pageant and display of work. Horse shoe pitching tournaments were received with great favor among the older people and was encouraged by the instructors. The Montclair Improvement Association cooperated with the Supervisor of Playgrounds and loaned its building for a pageant and entertainment.

Ward 6 Playground

This is an excellent plot of land and was much used. Owing to numerous complaints, ballplaying was restricted to smaller boys. North Junior High School, North Quincy Amateur League played home games here. At the end of the baseball season the bleachers were removed and erected on the Hollis Avenue Field. This made it possible to lay out a regulation football field, which was used during the season by teams in the Park Department Amateur League. This playground had two instructors and ranked with the highest in attendance. A successful pageant and display of work ended the season. Floodlights installed for football practice.

With the discontinuance of baseball and football on the Ward 6 Playground, there is an opportunity to erect tennis courts. This can be done by selling one portion, the money derived to be used in developing the part retained.

With the opening of Hollis Avenue Playground to baseball and football there will be ample space to install tennis courts in the spring.

Norfolk Downs Sand Pit

In rear of Francis Parker School used as a supervised playground during the summer season. Instructors obtained good results and conducted a successful Field Day with a display of the work accomplished. Bubbler fountain moved in from the road, underbrush and trees cut down. If this place is to be a permanent playground many changes should be made. It is hoped on the completion of Hollis Avenue that we can abandon the Sand Pit.

Hollis Avenue Playground

Not accepted as a city park as yet by the Board. Bleachers back stop erected, drain run through field, filled in and graded. The early spring should see loam spread and seeded, making the field ready for baseball in May. Field house with dressing rooms and comfort station recommended.

John Wendall Moses Playground

Squantum, popular playground of this district, baseball, football and tennis leading sports. Field used by Industrial League. Playground teams, home field of Squantum A. C. in both baseball and football. Floodlights provided for football practice. Infield treated with calcium chloride to lay dust. Tennis courts and club house taken over by Department. Club house used as dressing

room. Tennis courts in constant demand. New tennis tapes, court rolled and put in shape, new nets furnished.

Many unique ideas introduced by the instructors at the end of season field day. Playground well attended. Children showed the results of careful instruction. Two supervisors.

John R. Nelson Park

A beautiful park, the gift to the city by Mrs. John R. Nelson. Memorial to Squantum veterans in the World War, dedicated with appropriate services by Wollaston Post 295, American Legion, Armistice Day, November 11, 1930. Mayor Thomas J. McGrath accepted the gift for the city. With flower beds this can be made a beautiful spot and a fitting memorial to that sterling citizen, John R. Nelson.

As briefly as possible the Board has stated the needs and accomplishments of the parks in the various wards. It is our sincere desire that some of the recommendations be worked into the program for the coming year.

Daily Program for Playgrounds

NINE O'CLOCK

Flag raising. Arrange swings and see-saws.

NINE-FIFTEEN TO TWELVE O'CLOCK

Playground games for smaller children.

NINE-THIRTY

Baseball for large boys (league). Indoor baseball for small boys. Folk dancing and playground games for girls.

ONE O'CLOCK

Modeling in sand, bean bag, ring toss for small children. Quoits, croquet for larger boys. Croquet, weaving for girls.

ONE-THIRTY

Baseball, indoor baseball, volley ball, slug ball (league for girls), weaving for girls. Calisthenics daily when a large number of children are on the playground, tennis.

THREE-THIRTY

Playground games for boys and girls. Safety Campaign instructions.

Pledge of Allegiance

Take down flag at sunset.

REPORT OF SUPERVISOR OF PLAYGROUNDS TO THE BOARD OF PARK COMMISSIONERS

GENTLEMEN:—The playground season opened on Monday, June 21st, and continued until Friday, August 23. This completed the usual nine weeks of supervised play. The entire season was influenced very little by inclement weather; in fact only three half days were lost.

The playgrounds were as popular as ever, as added attractions and a careful check-up on the attendance increased the interest in such a way as to show excellent results.

The following list is the average High and Low attendance per day for the various playgrounds:

	Low	High		Low	High
Pollard	60	140	Ward 6	50	125
Elm	75	200	*Squantum	20	85
Adams	40	100	*Montclair	40	150
Ward 3	125	350	Parker	25	125
Ward 4	75	160	Mass. Field	25	100
Wollaston	35	125	Houghs Neck	25	125

*Increase over 1929.

On most days the numbers would be much greater than this list would indicate. This was determined largely by the tides, when hundreds of children would flock to the bathing beaches. The children from the Elm, Pollard, Adams and other playgrounds constantly used Avalon Beach, which was under the supervision of our swimming instructor.

This place was always congested during the tides. Mr. Reardon, the instructor there, gave regular lessons on life saving to members of the different playgrounds. An insignia denoting proficiency in this art was presented to 60 children of various ages who had to pass a strict course, similar to the official Red Cross tests, before they were given the award. A life saving corps was organized for service at the beach from among those who had passed these tests. They were stationed along the water front and were on duty at regular periods. This proved successful, as several accidents were prevented by these experts. As during the previous seasons we cooperated with the Massachusetts Safety Council, and a campaign was carried on throughout the season for safety. The supervisor met with the Park Board at its regular meetings on Monday night of each week. This Board called several meetings for all the instructors. The supervisor was in contact with representatives of the National Playground Association of America and attended its convention, held in Salem, Massachusetts, during the last week in June.

A great abundance of materials for handcraft was furnished by the Board, consisting of reed, raffia, wool, cotton and silk for weaving, clay, wood and paint. The exhibition of articles finished by the children all over the city should be proof enough of the enormous interest shown. Parents should be pleased with these accomplishments.

The usual interplayground competition program was followed out. Eleven playgrounds were represented in the Junior Baseball League for boys, 14 years or under, and six playgrounds for senior boys up to 16 years. In the Slug Ball League for girls, eleven playgrounds were represented. An indoor baseball schedule was carried out for very small boys. The Park Board offered appro-

priate prizes for the winners of these leagues. Hikes to the Blue Hills and to the beaches for picnics were common.

This year, instead of holding a massed field day for all the combined playgrounds, it was decided that each playground should be responsible for its own demonstration. This idea proved to be very successful. Every playground in the city carried on its program of folk dancing, games, races, and an exhibition of its handwork at a time in the evening when most parents could attend. The manner in which they responded to this was most gratifying. Great interest was shown not only by the parents and friends of the children, but by the merchants of the city, who donated a surprising number of prizes for the various events. There was more interest displayed in these local demonstrations than was ever witnessed before in the history of playground activities in Quincy.

For example, at Montclair, one of the smallest playgrounds, there were 600 people who remained long after dark in order to witness the final exercises. At Ward 3, which had the highest daily attendance, it was estimated that there were 3,000 people present. These events were held on different evenings during the last week.

Every effort has been made to have the playgrounds as inviting as possible to the children. The instructors are chosen from a civil service list as far as possible. We believe that our corps of workers are well qualified in every way. Following is a list of playground instructors for 1930:

Messrs. S. White	Misses E. McConarty
" J. O'Brien	" E. Bruton
" C. Grocott	" R. Savage
" W. Halloran	" M. Mularky
" *B. Carrera	" E. Likander
" W. O'Byrne	" E. Hourula
" G. Tocci	" I. Burke
" G. Brett	" K. McCoy
" D. Lubarsky	" L. Elko
" F. Connors	" D. Shea
" H. Call	" H. Rintamaki
" C. Connolly	" A. Gustavson
	" E. Ford

*Deceased.

Respectfully submitted,

FRANKLIN B. MITCHELL.

Sports—Baseball

No city in the Commonwealth of Massachusetts outside of the City of Boston has better facilities for the playing of baseball than the City of Quincy, with eight first-class regulation baseball fields, all of them under constant care of department workers, lined off before games and furnished with bases, home plates and pitchers' rubbers. Every ward in the city has its own field and representative teams. Six hundred and fourteen permits were issued by the Board during the season, beside the blanket permits given to the Junior High Schools and the Playground Leagues. Every effort was made to have the fields in good playing shape, and the favorable comments by the teams using them more than repaid for the work accomplished.

Football

This great American game of the rugged youth was encouraged in every way possible by the Board. Floodlights for night practice were erected on seven playfields, six gridirons laid out and goal posts erected.

The five team Football League sponsored by the Park Board was a success far beyond all expectations. Interest ran high and the competition was keen. The West Quincy Pirates were the winners of the Park Board Trophy. Teams entered were the Atlantic A. C., Penn A. C., Manet A. C., and West Quincy Pirates. Weekly meetings were held with the Park Board, where open discussion of all matters pertaining to the league came up.

Percy Lane of the Quincy Ledger sports staff served as president. Franklin B. Mitchell, Supervisor of Playgrounds, City Councillor Charles P. Hedges were of great assistance to the Board, acting as referees and umpires on numerous occasions.

The good sportsmanship shown by the players, the bringing together of young men from all parts of the city well repaid the efforts expended.

William Fritz donated a cup that was awarded to the team winning the game on Thanksgiving Day.

Soccer

Provisions were made for soccer during the early spring on Pfaffman's Oval, where games were played every Sunday up until June. In the fall soccer fields were laid out at Faxon Field and the second field at Merrymount Park. The goal posts were equipped with goal nets.

Quincy boasts of several good soccer teams, which are members of various leagues in Greater Boston.

Swimming

One of the most enjoyable and healthful recreations for all is bathing as conducted at our bathing beaches at Mound Street Bathhouse and Avalon Beach. Everything possible to insure safety to beginners with an experienced male instructor, who is assisted by those more advanced acting as life guards. Swimming answers a two-fold purpose. Of the hygienic value little need be said, and as a protection every man, woman and child should be able to swim.

Hockey

For the first time in the history of the City of Quincy a Hockey League was organized and sponsored by the Park Board. The interest was so great that three rinks were built to satisfy the demand of the ten teams represented. The rink at St. Moritz in the Blue Hills was used holidays and Sundays, and Sailors' Home and Houghs Neck were both illuminated by a special act of His Honor, the Mayor, making it possible to play night games. Trophies were offered by the Kay Jewelry Co. and William Westland Co., with individual medals by the Park Board. The teams were evenly matched and stimulated interest in a game that is fast becoming a leading sport in the United States.

Each team played each other once, making a series of nine games apiece. At this writing the games are in the final week with all teams bunched, so that six have a chance to compete in the playoffs which will take in the first three teams.

The cooperation of City Councillor Charles Hedges of Ward 5 and the City Fire Department in flooding the Sailors' Home pond when necessary was greatly appreciated by the Board.

Tennis

Quincy is indeed fortunate in having tennis courts located at Faxon Field, Bradford Street, Merrymount Park and Squantum. There are demands from Houghs Neck, South Quincy, West Quincy and Atlantic for courts. While we realize this is an expensive proposition, these demands should be considered at once.

Tennis championships were held at the Faxon courts. The High School and City teams, open for male and female, were run off for cups donated by Henry M. Faxon. Tennis tournaments were held at the Squantum courts as part of the Supervised Playground Program.

Winter Sports

The Board encouraged winter sports this year on a larger scale than ever before. Natural ponds, such as Manet Lake, Butlers Pond, Sailors Home Pond, two ponds at St. Moritz, were kept cleared of snow and flooded when necessary. Toboggan slides built for the children at St. Moritz, hockey rinks cared for and cleared of snow. The winter was ideal for skating, and thousands of our citizens enjoyed the sport on the places available. At some future time when money is available a toboggan slide at Merrymount Park will be a popular move.

Band Concerts

This popular feature of the parks' program was grouped this year in one week as part of the Quincy Tercentenary Week. Concerts were held in all parts of the city.

The Merrymount band stand was in constant use all through the season by the various bands sponsored by different organizations.

To facilitate the work of the Park Board in the Ward Band Concerts a portable band stand on wheels is a necessity; it will save money and eliminate a lot of unnecessary labor.

To Veteran Organizations

The Park Board has noted that several parks in this city are unnamed, at the present time listed as Ward Playgrounds. Such playgrounds should be named and dedicated to some leading deceased citizen or veteran as a memorial. The playgrounds are in use by the coming generation, and the Board knows of no better way to perpetuate the names of our veterans and leading citizens. With the coming of Memorial Day, 1931, it is the recommendation of the Quincy Park Board that action be so taken and all fields dedicated this coming year.

The playgrounds listed are as follows: Ward 6, Ward 4, Ward 2, Hollis Avenue, Houghs Neck and Montclair.

Recommendations

- Purchase power lawn mower.
- Purchase larger truck.
- Construct more tennis courts.

Provide playground apparatus at Faxon Field.
Provide comfort stations at playgrounds where necessary.
Field house and lock rooms at Merrymount Park.
Complete Hollis Avenue and Montclair playgrounds.
Chain link fences at Ward 2 and Montclair playgrounds.
Purchase portable bandstand.
Fill oval.
Provide bowling greens.
Encourage all-year-round activities on all playgrounds.
Provide facilities for mass recreation for women and young women along lines laid out by the Playground and Recreation Association of America.

Permits

During the year the following number of permits were issued for the various activities, viz.:

Hockey	120	Picnics	28
Baseball	614	Boy Scout outings.....	6
Soccer	34	Girl Scout outings.....	5
Football	52	Exhibition drills	4
Band concerts	42	Concessions	15

Expenditures

The expenditures of this Department may be found in the Auditor's Report.

Conclusion

The Park Board is deeply grateful to His Honor the Mayor, the Engineering Department, the City Council. Fire Department, foreman of parks, park workers, Supervisor of Playgrounds, playground instructors, the young men who composed the Football and Hockey Leagues, the two newspapers of the city and the Playground and Recreation Association of America for services rendered during the past year.

Respectfully submitted,

LORETTO D. TOCCI, *Chairman*
WILLIAM M. TRUSSELLE, *Secretary*
THOMAS J. LARKIN.

REPORT OF CITY CLERK

MAYOR THOMAS J. MCGRATH:

I have the honor to submit the forty-second annual report of this department, being for the year ending December 31, 1930.

RECEIPTS

Junk licenses	\$300 00
Amusement licenses	3,274 00
Common victuallers' licenses	660 00
Express and carriage licenses.....	27 00
Pool and billiard licenses.....	905 00
Auctioneers' licenses	20 00
Druggist licenses	18 00
All other licenses	3,487 00
Marriage permits	659 00
Recording and special	1,458 75
	<hr/>
	\$10,808 75

The above sum has been paid to the City Treasurer.

Number of marriage intentions issued in 1930.....	670
Number of marriages recorded in 1930.....	702
Number of births recorded in 1930.....	1,512
Number of deaths recorded in 1930.....	772

The number of dogs licensed in 1930 was 1,995 males; 441 females; 453 spayed and one breeder's license (\$50), for which the sum of \$7,528.00 was collected. The sum of \$6,934.20 was paid to the County Treasurer and \$593.80 to the City Treasurer. The sum of \$3,099.25 was collected for hunters' licenses. The fees amounting to \$331.00 were paid to the City Treasurer and the balance to the Commonwealth.

Annexed are the births, marriages and deaths recorded in Quincy in 1930 and the election returns.

EMERY L. CRANE,
City Clerk.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The sixtieth annual report of the Trustees of the Thomas Crane Public Library is submitted herewith.

The work of the library during 1930 has been intensive rather than extensive. No new branches have been added. On the other hand, efforts have been concentrated towards building up the book collection, improving facilities and bettering service. While the total of books is now over 85,000, it is still inadequate. It is probable that there is no public library having a circulation as large as ours but what has well over 100,000 volumes.

The per capita circulation of 9.2 is higher than any previous year and is far above the average for public libraries. The fact that there was a turn-over of more than two-thirds of a million volumes in the main library and its various branches and agencies would seem to indicate that there is a healthy growth in the demand for reading in spite of the radio, movies, miniature golf and other attractions and distractions of today.

While the cost of operation has increased so far as the amount of money expended is concerned, nevertheless the unit cost per volume circulated remains below 10 cents, whereas the average for public libraries throughout the country is 15½ cents.

The main building and those branches owned by the library have been kept up by such repairs and painting as was required during the year. The Wollaston Branch grounds were graded and a fence installed to prevent encroachments on the lawn which had become a source of annoyance.

There is one matter of paramount importance to which attention should be called at this time and that is the overcrowded condition of the book stacks and administration facilities in the main building. The ever-increasing use by our citizens of the library makes the time not far distant when some solution of the problem of an outgrown building will have to be considered.

The Trustees desire to take this opportunity to attest again the splendid efficiency and loyalty of the librarian and members of the staff and to thank the mayor and city council for the cooperation so generously accorded by them to the Library Department.

Respectfully submitted,

GEORGE E. ADAMS,

Chairman.

GEORGIANA CUSHING LANE,

Secretary.

JAMES H. SANKEY,

Treasurer.

GEORGIANA CUSHING LANE,

Auditing Committee.

REPORT OF THE LIBRARIAN

To the Trustees of the Thomas Crane Public Library:

In submitting the report of the library for the year 1930 it may be worth while to note that the year just past was the sixtieth year of the public library of Quincy, the forty-eighth as the Thomas Crane Public Library.

In the first report, that for the year 1871, occur these sentences: "The library has now ranged itself by the side of its eighty sister libraries in Massachusetts and begins the beneficent work in which all ages and employments may share alike. Whether it will prove the blessing anticipated by its friends will depend upon its proper use. . . . It only needs further to be said that the Trustees will direct their best efforts on a line with the requirements of the time, in the hope that those who seek entertainment or knowledge shall find here what they seek." The six men who signed this first report were the men who organized and guided the movement for a public library in the town of Quincy and who supervised its establishment. Their names, which will still be remembered by old-time residents of our city, were William W. Greenough, Luther W. Anderson, Henry Barker, Harrison A. Keith, Charles F. Adams, Jr., and Charles A. Foster. All six forward looking men have passed away, after contributing much to the civic development of Quincy.

A review of the record of the library for the year just past will, we hope, show that this library has continued to the present time to be "the blessing anticipated by its founders," and that it has kept "on a line with the requirements of the time."

Circulation

At the end of the past year the Thomas Crane Public Library had a list of registered borrowers totaling 22,096 persons, or 30 per cent of the present population of Quincy. Books issued for home use amounted to 668,187 volumes, a gain of 57,899 over last year, or about 8½ per cent. The per capita circulation, 9.28, is well above the average, which is 5.29, for public libraries throughout the country. Though the figures for books loaned furnish the only statistical records for measuring the use of the library, they do not, of course, cover the total use that is made of the resources of the library. Thousands of books are regularly consulted or read during the year within the confines of the library, and of these no accurate record can be kept. If the library is to be judged by the use made of it, I think it may be fairly regarded as approximating the standard set by its founders.

Book Additions

The first report shows that this library opened with 4,607 books on its shelves. Last year we added more than double that number of books. Our present total stock amounts to 85,295 volumes. This may not seem a growth in any way phenomenal, but it should be remembered that over a period of years, thousands of books have worn themselves out in service or have become out of date and been discarded. Once more I call attention to the need for books. In spite of an average turn-over of nearly eight circulations for each book in the library during the last year, we still fall far short of meeting the demands made upon us for books and more books.

Reference Work

Two years ago, in my annual report, I mentioned our reference or information service as an outstanding weakness in our service. It is gratifying to report this year that this branch of our work has been decidedly strengthened. Much of the credit for this is due to Mrs. Wilford, who came to us in the fall of 1929. Possessing a background of familiarity with books, she has developed an instinctive knack of finding just the right material for the searcher for information, and we have been the recipients of many favorable comments on the assistance she has rendered. Other assistants who have been scheduled at the reference desk have also done excellent work in aiding readers.

Children's Work

The extent of the library's service to the boys and girls of Quincy may be evidenced by the fact that a total of 299,381 books were borrowed from the children's room of the main library, the children's shelves of the branches, and from the classroom libraries sent to the schools. This amounts to 45 per cent of the total circulation. It was found possible this year to install the much-needed and long-awaited modern charging desk in the children's room of the main library and to give Miss Kingman an equally needed full-time assistant to aid in her work. Outside of the issuing of books, much time is given by the children's librarians in answering questions, finding books for children and in assisting parents and teachers in book selection. A very attractive exhibit of new children's books was held during Book Week in November, and a story hour was held one afternoon which filled the room to overflowing. Miss Kingman also prepared the classroom libraries, 141 of which, a larger number than usual, were sent to the elementary schools of Quincy, and she or her assistant have followed up this work with regular visits to the schools.

Branches

No new branches were added during 1930. Indeed, as I stated in my report of 1929, the city is now so well covered that it seems hardly probable that requests for additional branches will be made for several years at least. Changes to more desirable and more adequate quarters were made in the cases of the Manet and the General Palmer branches during the year. The only change anticipated for 1931 is the removal of the Baxter Branch at South Quincy to some location nearer the business center of that district, in proximity to the Quincy Adams Station. With one exception, all the branches showed gains in circulation ranging from 2 per cent to 30 per cent of last year's circulation. A very considerable proportion of the increased book appropriation of last year went into the duplication of books for the branches, especially standard books on the high school reading lists. The book collections of the branches still need strengthening, and it is hoped that this coming year more books for permanent use may be purchased for the branches and the necessity of drawing upon the main library for popular books lessened. Additional shelving was installed in the Wollaston and Baxter Branches during the year.

Hospital Service

Our library work at the Quincy City Hospital has been maintained on the schedule instituted in 1929 of three afternoons of ward service. Through the cooperation of the hospital authorities an innovation and extension of the service was made possible last fall. The library was assigned a room in the administration wing (the old Ward A), which we furnished with shelves, a table, chairs, drop lights, etc., from funds left over from the appropriation for the Merrymount Branch. This attractive room is open an hour and a half on the days the hospital librarian is in attendance for the use of nurses, internes and convalescent patients. This innovation is proving a success. Books loaned through the hospital library service amounted to 8,488, a gain of nearly 2,000 over last year's figures.

Inventory

It has been the practice of this library to take an annual inventory of the stock of books. In the last five years our work has grown to such an extent that it has been found necessary to spread the inventory over two years, taking the stock of the branches one year and that of the main library the alternate year. The last inventory completed in 1930 showed greater losses than heretofore. Just why this should be so is a question that is puzzling most public librarians who are very generally reporting similarly increased losses. The usual answer given is that in the last few years, or since the war, there has been a moral let-down in regard to property rights which is widespread and that the abuse of the privileges offered by public libraries is but one phase of a general attitude. In proportion to our total circulation our losses are comparatively slight, but they are often extremely exasperating in special cases, where a borrower wants a particular book which is discovered to be among the missing. It sometimes seems as if we were putting too much trust in the honesty and good sportsmanship of some users of our library.

Staff

The library lost, by resignation this year, two members of our force—Mrs. Josephine Marshall and Miss Violet Johnson. The former, as Miss Ghigli, joined the staff in 1922 and had served for six years as librarian of the Manet Branch at Houghs Neck, where she made many friends both for herself and the library. Miss Johnson, who came to us early in 1929, left in June of this past year to be married. Both resignations were accepted with regret. Mrs. Zayma Connolly, our hospital librarian, was granted a year's leave of absence in September, this position being filled by the transfer of Miss Marion Davis from the Norfolk Downs Branch. We were fortunate to secure as a substitute for Miss Davis, Mrs. Winifred Russell, a resident of Quincy, who had had experience both in the Springfield and the Somerville public libraries. Four regular assistants have been added to the staff during the year—Miss Helen Egan, now librarian of the Manet Branch; Miss Helene Hodgkinson, assistant in the Children's Room; Miss Carolyn Kittredge, assigned to the General Palmer Branch, and Miss Aline Blake, assistant in the main library. All these new assistants and eight other members of the staff took the course in library work given in the fall under the auspices of the State Division of Public

Libraries. This library was represented at the All New England Conference of Librarians held at Swampscott in June by the librarian and a good proportion of the staff for one or more days.

A Retrospect

As the past year marks the completion of five years' service as your librarian, it may not be out of place to close this report with a brief retrospect. Entering on my duties Feb. 1, 1926, I found a library, which, under my predecessor, Mr. Temple, had not only expanded rapidly, but was exceptionally well organized for a high degree of efficient service at a very low operating cost. While opportunities for further branch expansion have presented themselves in these five years of my administration and have resulted in the establishment of three new branches, at Montclair, Lakin Square and Merrymount, my chief problem has been the development of a book collection to more adequately meet the demands created by the rapid expansion of library outlets. Through the cooperation of the city officials, our budget for books has been increased \$6,500 in the past five years and the effect has been evidenced by an increase of 50 per cent in the circulation of books for the same period. Much attention has been given to book selection, both in fiction and especially in non-fiction, and I believe that we have within certain limitations a well-rounded collection of books for active use. Though our stock of books has increased 33 $\frac{1}{3}$ per cent in this period, we continue to cope with the demands of readers who last year borrowed over two-thirds of a million books. In this connection it may also be pointed out that, while our per capita circulation has increased from 7.8 in 1925 to 9.28 in 1930, the unit cost per volume circulated is only 1/10 of a cent higher today than in 1925, and that it is still much below the average for public libraries.

Our work with the children of the city through our various agencies has grown materially and I can testify to a genuine spirit of cooperation with school authorities and teachers in this phase of our work. Improvements have been made from time to time in our branch service. We have increased the opening hours, changed locations and provided more adequate facilities where they seemed needed.

In giving this résumé of accomplishments, I am at the same time well aware that we have often fallen short of what might have been expected of us, that many improvements remain to be made and that the coming years will bring forth other problems. I am also extremely sensitive to the fact that such growth in usefulness as this library may have had in the five years of my administration could not have been accomplished without the assistance and vision of your board of trustees, nor without the cooperation and support of the city authorities. And any credit that may be due belongs, in large measure, to Miss Callahan and the corps of assistants whose efficient service and loyalty to the interests of this library I doubt is exceeded in the personnel of any public institution. Lastly, I may add that no one could have enjoyed more friendly or happier relations with trustees, staff or users of the library than it has been my good fortune to enjoy during these years as your librarian.

Respectfully submitted,

GALEN W. HILL,
Librarian.

January 31, 1931.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of Quincy:

This has been a year of great progress in the public schools. A building program planned by the School Committee some three and one-half years ago has been steadily going forward.

During the year 1930, a splendid four-room addition was added to the Gridley Bryant School, the hallways renovated, and a double room in the old building was converted into an assembly room. The assembly room is sufficiently large to afford an opportunity for educational and social meetings.

The east wing of the North Junior High School is practically completed. The equipment is being installed. It is anticipated that not less than 1,400 children will be enrolled in this school in September. The first unit of this building was dedicated February 8, 1927.

A new four-room addition is under construction at the Adams School and, when completed, will relieve that district of the overcrowded condition.

The School Committee is ever mindful of the older buildings in the city. Many improvements have been made during the year. The major repairs that have been made to the school buildings include the following: Several floors have been relaid and repaired; new water service inside and out at the Central Junior High School; several buildings have been painted inside and out; all the flag poles were repainted; new radiation was installed in the Adams and Home Making Schools; radiator traps replaced at the Massachusetts Fields School; all toilets at the Coddington and Washington Schools were completely renovated and new, modern toilets were installed, and minor repairs to many others in the city. The Washington, Webster and Francis W. Parker School yards were resurfaced, which means better playgrounds for the children. The names of the buildings have been inscribed on the Thomas B. Pollard, John Hancock and Lincoln Schools and the contract has been let to inscribe the name on the Central Junior High School; American Chain Link fences were erected at the Coddington and Wollaston Schools. These are some of the major repairs for the year.

The Rules of the School Committee were codified, brought up to date and printed. This was another step in the line of progress because all the rules and regulations governing the schools are now printed in one little pamphlet.

The Schedule of Salaries for teachers of the public schools was also revised and made effective at the beginning of the present school year in September. It was essential in revising this schedule to recognize the standard of scholarship set up by the state authorities. The state increased the minimum number of years to three and made Bridgewater, Fitchburg and Salem Normal Schools four year schools.

During the year, the Committee has cooperated to an unusual extent with various civic organizations and churches of the city by permitting them the use of school halls and gymnasiums. We believe that while the schools are primarily built for the children that they belong to the taxpayers, and with proper care and supervision should be used by the people of the city.

For the first time in the history of the school system of the city of Quincy, the School Committee voted a year's leave of absence on full pay for one of its teachers who had served forty years as a teacher, Miss Annie Cahill.

During the year we lost by death Mr. James Barr, custodian of the Squantum School, who served eleven years as custodian. Also Mr. Charles A. Boland, custodian of the Merrymount School, who served three years as custodian. Miss Elizabeth Keefe, teacher in the Massachusetts Fields School, died after a service of one year. They were faithful servants of the city schools.

The schools sustained a great loss in the sudden and untimely death of Mrs. Robert E. Foy, who for several years served as a member of the Advisory Committee on Industrial Education for Women. She served cheerfully and well and was ever ready to give the best of herself for the betterment of the school children.

The foregoing report was prepared by a special committee of Mrs. Beatrice W. Nichols and Dr. Daniel B. Reardon, and was adopted as the annual report of the Committee for the year 1930.

Teacher 1929-1930

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

In accordance with the established custom, I submit herewith the annual report of the Quincy Public Schools for the year 1930.

The work of the different departments is given in full as submitted by the department heads with emphasis placed on the features of their work, which to them seem most important. The Assistant Superintendent has reported for the State-aided, Academic Evening, Academic Summer Schools and special classes. Because of the importance attached to these reports, they are given in full. The principals and teachers have worked earnestly and intelligently to discharge their important duties.

I want to emphasize at the beginning of this report a paragraph taken from the conclusion of my last year's report. I might say that it sums up very briefly and in simple words what has grown to be a philosophy of education with me:

"WHAT I SHOULD LIKE TO EMPHASIZE MORE THAN ANY OTHER THING DURING THE YEAR 1930 IS MORE ATTENTION TO THE INDIVIDUAL. WHAT IS REQUIRED IS A SYSTEM OF EDUCATION WHICH SHALL ENCOURAGE BOYS AND GIRLS TO TEACH THEMSELVES; A SYSTEM CALCULATED TO FOSTER THE CHILD'S CURIOSITY; TO MAKE THE DESIRE FOR KNOWLEDGE AN HABITUAL DESIRE; AND ABOVE ALL, TO FAMILIARIZE EACH CHILD WITH THE BEST METHODS OF ACQUIRING IT BY HIS OWN EFFORTS."

If we wish to maintain a high standard of scholarship in our school system, we must maintain a standard of excellence in our teaching force. This cannot be done by the common cry of "home teachers," regardless of their qualifications. If it is a fine thing to consider home teachers, it is a much finer thing to consider the great multitude of fine home children who are committed to the care of these home teachers. No teacher, during the past four years, whose residence is in Quincy, who is a graduate of a school meeting the requirements set up by the School Committee, has been deprived of an opportunity to teach in Quincy. In fact, the School Committee has given every preference to Quincy teachers who are qualified to teach. It is the primary aim of the Committee to secure high-grade teachers and many home teachers are high grade. Some home teachers have not given the same consideration to the school system that has been accorded to the teacher by the School Committee. The school system is not a training or recruiting station. Several home girls have come into the schools knowing they were to leave it in a short time; others, to get a little experience to fit them for another position—then leave.

Secondary education in Quincy is coming into its own. The influence of the Junior High School is being felt. The plan of organization established three and one-half years ago is showing splendid results. The Senior High School has reached a new high mark in attendance. More than 2,200 pupils are now registered. The High School was originally built to accommodate approximately 1,500

pupils. This means that the principal and teachers have been forced to meet situations and conditions which have made it very hard for them to do reputable high school work. Despite this fact, we feel that the standard of scholarship has not only been maintained but several of the departments are being conducted with greater efficiency.

The Junior High School has fully justified its establishment in that it has strengthened the entire course of study through the three crucial years of the child's life and given an impetus to better Senior High School work. The principal of the Senior High School has repeatedly given me assurance that the children are being better prepared to do Senior High School work.

Reorganization is essential to meet the ever-changing conditions of daily life. Buildings have been erected in which thousands of young, enthusiastic children pour in and out every day in which they are receiving a new type of instruction. Thousands of other communities are planning to do likewise, and where new buildings are not possible, as much of the Junior High School program is being used as is possible under existing conditions.

The Junior High School is not fully justifying its existence in Quincy if it fails to strengthen the entire course of study, or fails to make a real extension of the secondary program. It is our endeavor in the Junior High School to approach each subject through the medium of the child's own interests. We recognize the very great value of the administrative and social features of the Junior High School, but we further *recognize a greater requirement which is the reorganization of the content and method of courses of study in meeting educational objectives.*

The City of Quincy never did a finer thing for her future citizens than is being done now by the Junior High Schools in its attempt to provide a square deal for all the pupils of the Junior High School age.

Of the 14,000 pupils, which is the average number belonging, 6,000 of them are in the Junior and Senior High Schools. This means 43 per cent of all the children in the Quincy School System are in secondary schools and doing some type of secondary education.

Tercentenary

One of the outstanding features of the year was the School Department's contribution to the celebration of the Tercentenary of the Massachusetts Bay Colony. Approximately 5,000 school children presented a great school pageant at the Pfaffmann's Oval, June 4, on "The Progress of Public School Education in Quincy." This spectacle was preceded by a parade. It was one of the most impressive ever given in Quincy. The children marched from School and Elm streets along Hancock street to the Park.

The period covered by the pageant ranged from 1630 to 1930. The parade seemed to focus attention on the Progress of Education from its original "ciphering and arithmetic school" to the present comprehensive curriculum. It also demonstrated why so large a portion of public funds is devoted to the maintenance of the now cosmopolitan school system. It was estimated that 15,000 people witnessed the parade and pageant. The school sessions were suspended at eleven o'clock, that children and parents might enjoy the day. It was a veritable parents' day.

The pageant and parade was planned for the purpose of depicting the outstanding events in the progress of public school education in the City of Quincy. We believe the purpose was accomplished.

It was a big undertaking well carried out. It was a credit to the School System, and to all who gave of their time and talent to make it possible.

The Day Trade School

The outstanding fact for the school year was the change in the average membership—a drop from 192.6 in 1929 to 182.0 in 1930. The total enrollment remained about the same. Where the changes came with a comparison of enrollments and membership over a period of five years is shown in the following table:

	1925-26		1926-27		1927-28		1928-29		1929-30	
	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.
Auto Mechanic.	30		42		41		43		48	29.3
Electrical	36		36		38		35		38	32.5
Machine	37		34		40		40		31	25.7
Machine (Co-operative)		4	2.0
Plumbing	37		38		36		36		39	29.1
Sheet Metal.....	18		19		21		20		18	16.3
Woodworking .	70		65		80		76		68	47.1
Special		1	
Total Enrollm't	228		234		257		250		246	
Total Average Membership				182.4		190.6		192.6		182.0

The woodworking department is rarely filled to capacity, the machine shop shows a decided drop with the other departments operating at capacity and often with a waiting list.

For the last few years we have been urging the addition of new departments in the Trade School. The need is great. At present the city, state and nation are in a period of depression with a great amount of unemployment. A study of the unemployment situation in many different places has shown that about one-third of the unemployed are unskilled laborers. One way to prevent this situation in the future is to provide greater opportunities for training skilled workers. The Trade Schools of Weymouth and Quincy serve all the territory south of Boston except in the vicinities of Fall River and New Bedford. I feel sure that additional departments in the Quincy Trade School would be patronized not only by Quincy boys but by boys from many of the surrounding towns. At the present time 35 out-of-town boys are attending the Quincy Trade School for which the City receives tuition.

Well trained painters and paper hangers are surely needed, yet Fall River is the only place in Massachusetts offering such full time day training for boys. Auto body repair work has become increasingly important, offering a good field for well trained workers. At present a boy can learn this type of work only in the productive workshop by the pick-up method. There are many other trades besides the two mentioned which might well be taught in Quincy if the Trade School had the room and the proper facilities.

At the request of the management of the Boston Gear Works the Trade School is again experimenting with Co-operative Part-time education for machinists. The widespread depression has hindered the full development of the plan and the school now has

but one boy who spends alternate weeks in the school and the factory, receiving pay from the factory for both weeks. He learns the practical aspects of the machinist's trade on productive work at the factory. At the school he studies related drawing, related mathematics, related science, English, civics and industrial hygiene. In the future the Gear Works hopes to have most of its apprentices trained at the Trade School on the co-operative plan.

Due to automatic salary increases the total costs for the school year ending August, 1930, increased by \$1,019.24 to \$53,154.56. As shown in the table below this total cost was greatly reduced, but, owing to the decrease in average membership, the net per capita cost to the City of Quincy advanced from \$111.58 to \$123.22.

Tuition for pupils living outside of Quincy.....	\$5,240.00
Cash from products made in the school.....	1,805.88
Aid from the State of Massachusetts.....	20,633.78
Aid from the Federal Government.....	2,857.88
Miscellaneous receipts	189.63
Total receipts	\$30,727.17
Net cost to City of Quincy	\$22,427.39

The market value of products made in the school or repair work done by the boys amounted to \$23,966.01.

The Home Making School

For the second year the Home Making School started the fall term with all the pupils the building will comfortably hold. The enrollment dropped at mid-year as several girls were obliged to leave school because of economic conditions at home. The average membership for 1929-1930 was 50.20, slightly less than the 51.06 of the previous year.

The total cost of maintaining the school was \$15,068.15, an increase of \$997.20, but the city treasurer received the following:

Tuition for non-residents.....	\$418.50
Cash for work done.....	1,330.38
Aid from the State of Massachusetts.....	6,002.42
Aid from the Federal Government.....	1,192.84
Miscellaneous receipts	6.34
Total receipts	\$8,950.48
Net cost to City of Quincy	\$6,117.67
Net cost per pupil to City of Quincy.....	\$121.87

The school now has four tuition pupils—one from Braintree, one from Holbrook and two from Abington. The Director tells me there are more non-resident girls seeking admission.

The building was completely redecorated during the summer, making it more attractive and an incentive to the girls to do their best. The girls further improved the interior by making new kitchen and bathroom curtains and painting some of the kitchen equipment.

Two new teachers came to the school in September. Mrs. Bethel Ross, a former teacher in the Vocational Department of the Framingham Normal School, took the place of Miss Boughtwood, who resigned to accept a position in the Boston School Department as head of the Foods Department. Miss Muriel Henry, a recent graduate of Framingham Normal School, is teaching Design and Science in place of Miss Eastman, who resigned in order to marry.

The school is approaching trade standards in catering, dress-making and millinery. The success of this work encourages us to believe that the school may gradually become a girls' trade school in fact without losing any of its home making characteristics.

An important part of the school work is carried on through the Home Project, which has been given more careful attention during the past year. The Director of the school, Miss Cowles, says: "Trade experience is given the girl either in the home or the commercial establishment by means of the required Home Project Work. Four hours of work is required per week either in the trade for which the girl is training or in her own home. This project must involve processes learned at school and must bring about some constructive thinking on the part of the girl. The school will send out waitresses for parties and dinners or dressmakers for home sewing at a charge of thirty cents an hour and carfare. Part time house work and restaurant work is also procured for the girls, all of which may count for Home Project credit."

The school has practically outgrown its present quarters. Parents are beginning to understand the worth of the practical training the school gives the girls, not only as future home makers but as wage earners in the field of dressmaking, millinery and catering. If we had enlarged facilities in the departments already existing with the addition of new ones, such as hair dressing, retail selling, etc., I believe many more girls would avail themselves of such an opportunity. Very careful consideration should be given to the needs of this school.

The Continuation School

During a period of business depression one would expect a decrease in Continuation School attendance because of the difficulties of finding work for minors between the ages of 14 and 16. The following table gives the facts:

Enrollment	1925-26	1926-27	1927-28	1928-29	1929-30
Boys	67	84	95	82	72
Girls	26	56	62	65	54
Total	93	140	157	147	126
Hrs. of Service	8,988	11,860	7,996	7,148

Through the cooperation of employers of this city we have been able to keep nearly all the continuation group employed, thereby cutting down the so-called twenty hour group (those unemployed who are required to attend school every school day until re-employed), thus reducing the hours of service.

When the Continuation School was first started, many girls between the ages of 14 and 16 were employed in stores and offices, but this practice has practically disappeared in Quincy. At the present time only twenty-six girls between 14 and 16 years are employed in Quincy, distributed as follows:

Home Permits	16
Domestic Service	4
Other Service	4
Temporarily unemployed	2

Because of this change in employment, commercial training for girls was eliminated two years ago. During the past year the course in Millinery was discontinued and in its place a course in Home Nursing and Child Care introduced. Besides the Home Nursing the girls receive training in Sewing and Cooking with related work in Arithmetic and English, and informal work in Civics and Hygiene. The Continuation School work is thus closely related to the form of employment in which the girls find themselves.

It is impossible to so closely relate the work of the boys as they are engaged in almost as many different forms of employment as there are boys. Their shop work, therefore, still consists of Home Mechanics, covering many things that any person would find helpful in doing odd jobs about the house.

To carry on this form of education it costs \$3,533.66. The city treasurer received the following because of the Continuation School:

Tuition fees for non-residents.....	\$82.96
Cash for work done.....	14.42
Aid from the State of Massachusetts.....	1,574.07
Aid from the Federal Government.....	268.90
Total receipts	\$1,940.35
Net cost to City of Quincy.....	\$1,593.31

Evening Industrial School for Men

The Evening Trade Extension Classes for Men tend to reflect business conditions with large enrollments when times are good and small enrollments when times are bad. One would think that men out of work would use some of their time to better fit themselves for a job, but the enrollment for 1929-1930 was the smallest for several years as shown in the table below:

	1925- 26	1926- 27	1927- 28	1928- 29	1929- 30
Shop Mathematics for					
Electricians	13
Automobile Mechanics....	24	26	20	20
Electrical Wiring	45	31
Machine Shop Practice..	21	19	12	26	18
Machine Drawing and					
Shop Mathematics	27	41	27	43
Plumbing	52	46	35	33	20
Roof Framing	36	10	22
Sheet Metal Drafting....	29	33	20	23	19
Ship Blue Print Reading	63	32	44	53
Totals	234	282	146	211	110

The classes in Plumbing and Sheet Metal Drafting were closed because of poor attendance before the end of the usual twenty week course. The classes started this fall have also been few and small with the exception of the Ship Blue Print Reading classes, which are conducted at the Fore River Plant from four to six P. M. The Fore River Plant incidentally is one of the few industrial plants not affected by the general business depression.

Although the trade extension classes for men are restricted to men actually engaged during the day in the trade they wish to

study at night this is interpreted liberally and men are allowed to enroll who are temporarily out of work, provided they have worked at the trade within a year.

With a small enrollment the costs are reduced but not in proportion to the reduction of enrollment, because certain overhead expenses are the same whether the enrollment be large or small. The total cost for the Evening Industrial School for Men was \$1,382.14, which was reduced as follows:

Tuition fees for non-residents.....	\$29.20
Registration fees not returned and Miscellaneous.....	107.00
Aid from the State of Massachusetts.....	568.65
Aid from the Federal Government.....	108.63
<hr/>	
Total receipts	\$813.48
Net cost to City of Quincy.....	\$568.66

Evening Home Making School for Women

Miss Perry, the Supervisor of this work, says, "The aims of the Evening Home Making Classes are to assist the pupils with their home problems, to teach them to be more proficient in their home duties of cooking, sewing, decoration, home nursing, etc., by using the new and best methods—in fact, to make the home more attractive and comfortable, and, by so doing, make a happy healthy family." In this work the department expended \$8,210.93, a decrease of \$914.23. This total cost to the city was reduced as follows:

Tuition fees for non-resident pupils.....	\$122.50
Aid from the State of Massachusetts.....	3,331.14
Aid from the Federal Government.....	826.72
Registration fees not returned and Miscellaneous.....	411.00
<hr/>	
Total receipts	\$4,691.36
Net cost to City of Quincy.....	\$3,519.57

The number of women reached and a comparison with other years is shown in the table below:

	1925- 26	1926- 27	1927- 28	1928- 29	1929- 30
Millinery	122	112	48
Foods	85	105	120	153	150
Dressmaking	730	726	751	719	522
Home Nursing	16	17	37	30
Home Decoration	42	100
<hr/>					
Totals	937	959	936	951	802

Although the value of the Home Nursing work was stressed, we were disappointed not to have more than two classes. The outstanding development is the increased attendance in Home Decoration classes.

In the Dressmaking classes work in renovation was stressed and continues to be emphasized. Women were urged to bring to class coats, dresses, etc., that were not being worn but were too good to throw away, and they were remodelled for adult wear or "cut over" for the children, thus saving many dollars.

In the various classes old or new material to the value of \$7,713.04 was converted into finished products worth \$21,295.20.

Americanization Work

During the school year 1929-1930 this department taught 475 people, of whom 36 were illiterate minors, at a total cost of \$5,168.17. The net cost to the City was \$2,779.92, as the State reimbursed the City \$2,388.25. The City receives no reimbursement for minors, but as they are required by law to attend evening school it seems sensible to place them in the Americanization classes for adults rather than organize special classes for them in the Evening Academic School. It cost \$391.68 to educate the 36 minors. It is interesting to learn that some employers of illiterate minors check their attendance at evening classes very carefully.

For the second time the State Department of Americanization conducted a Pilgrimage to Washington, D. C., in March, 1930. Thirty-seven Quincy pupils and their friends made the trip. The pupils returned to the city inspired by the beauties of Washington and its governmental activities. Such a trip creates greater respect for our government and its laws.

As in the past, the Federation of Women's Organizations, clubs, the Library and many individuals cooperated in a friendly manner, helping to make the alien feel at home in a new country.

There is probably no branch of the School Department where the progress made by the pupils is so evident. After the pupils are admitted to American citizenship they are still urged to attend an Advanced class and later enter the Evening High School.

The Evening Academic School

For the fiscal year ending December 31, 1930, \$3,716.24 was expended for evening academic classes and evening gymnasium classes—an increase of \$443.01 over the previous year. The increased cost represents increased service to evening school pupils. The academic school was carried on three weeks longer in March of 1930 than the previous year; three more teachers were required for the academic classes in the fall of 1930 than in the fall of 1929, and three new gymnasium classes have been opened. Last fall 593 adults enrolled in the academic classes as contrasted with 486 in 1929.

The following table shows the enrollment for five years:

FALL ENROLLMENT

Subjects	1926	1927	1928	1929	1930
Office Practice	12
Advanced Bookkeeping	20	17	18
Elementary Bookkeeping	83	79	47	65	50
Business Arithmetic	92	119	69	102	112
Business English	128	191	109	146	187
Penmanship	55	89	44	80
Elementary Stenography	165	142	103	174	70
Intermediate Stenography	18	17	35
Advanced Stenography	24	32	36	39	48
Elementary Typewriting	215	194	142	226	139
Intermediate Typewriting	17	35
Advanced Typewriting	36	37	41	48
Mechanical Drawing	92	69	42	76	128
Grammar School Subjects.....	23	21	8	36
Algebra	49	35	50	63
Cultural English	48

This year the evening school session from 7:15 to 9:15 is divided into two sessions rather than three as has been done in the past. Students are allowed to take two subjects except in elementary bookkeeping and elementary stenography. The requirements have been raised for those admitted to the classes in elementary stenography, no one being allowed to take the subject who has not had two years of high school education or its equivalent. As was expected, the enrollment in stenography decreased, but the quality of work being done has greatly increased. Selected pupils have been allowed to take up work with the new office practice machines purchased for use of the Commercial department of the Senior High School, under the direction of Miss Taft, who teaches this work to the day pupils. Thus there is no divided responsibility for the care of the machines.

The gymnasium classes continue to grow in popularity. Three new classes have been started—a class for men and one for women at the Quincy Point Junior High School, and a class for men in the Senior High School. All the classes maintained in the past are open this year with increased enrollments. This fall 126 men and 282 women enrolled in gymnasium classes as compared with 41 men and 186 women in 1929.

The Academic Summer School

Some of the important facts for the summer school for the past five years are given in the following table:

Grade	Year	No. Teachers and Principals	Total Enrollment	Average Membership	Per Cent of Attendance	Total Cost	Cost per Pupil
VB-VIIIA	1926	20	465	406.59	96.97	\$2,141.55	\$5.27
	1927*	20	423	394.46	98.48	2,336.71	5.92
IV-VII	1928	21	552	504.89	96.88	2,860.26	5.67
IV-VI	1929	16	348	311.01	96.53	2,256.09	7.25
IV-VI	1930	16	380	345.69	96.81	2,221.82	6.42

*Summer School maintained for but 5 weeks.

Only three teachers were needed at the Willard Summer School Center and but four at the Francis W. Parker Center, so one principal took charge of both schools. At the Daniel Webster Center there were seven teachers and a principal.

Eighty-one pupils enrolled to try and gain lost promotions: 66 or 81.5 per cent were successful, 8 or 9.9 per cent left before the close of summer school, and 7 or 8.6 per cent failed. Two hundred ninety-eight enrolled to remove conditions; 244 or 81.9 per cent were successful, 41 or 13.8 per cent left and 13 or 4.3 per cent failed. One pupil registered from the fourth grade to prepare for advancement and was recommended for trial in grade V in the fall.

All of the sixty-six pupils who gained lost promotions through summer school work enrolled in school in September. At the end of the first ten weeks 30 or 45.5 per cent were passing in all subjects, 9 or 13.6 per cent were failing in one subject studied at summer school, 6 or 9.1 per cent were failing in one subject not studied at summer school, 21 pupils or 31.8 per cent were failing in two or more subjects.

Of the 244 who succeeded in removing conditions, 197 registered in school in September. Of these, 97 or 49.2 per cent were doing satisfactory work in all subjects at the end of the first ten weeks, 60 or 30.5 per cent were failing in one subject and 40 or 20.3 per cent were failing in two or more subjects.

The one pupil recommended for double promotion was doing satisfactory work in all subjects at the end of the first ten weeks.

Again standard tests in reading and arithmetic were given to all summer school pupils during the first week and the last week of the term. The results of the tests showed much progress was made by the pupils. Only those pupils were recommended for promotion whose test results at the close of the summer school session showed them to be doing satisfactory work for their grade.

Special Classes

Great progress has been made in our provisions for the child three or more years mentally retarded. In 1924 there were no special classes in the city and now there are eight classes for the mentally retarded.

In September, two classes for retarded children thirteen to sixteen years of age were opened in a double portable building in the yard of the Central Junior High School,—a class for boys and one for girls. After a few weeks' trial it was found wise to move the girls' class to the portable at the Coddington School. Removing the older boys and girls from the mixed special classes in various parts of the city has greatly increased the efficiency of these classes and made it possible to give the older group work more adapted to their needs.

There are, in the school system, 177 children who are now three years mentally retarded or who will be before they are fourteen years of age. Eighty children are in the mixed "Opportunity Classes" for the younger children, thirty are in the two classes opened this fall and eleven are in the "Over-age Classes" of the Junior High Schools. Eleven children are in the districts served by the Atherton Hough, Adams Shore, Merrymount, Coddington and Cranch Schools, and as yet no classes have been established serving this scattered group. The remaining forty-five children are in the regular classes of the elementary or junior high schools and in most cases are doing satisfactory work where they are now placed. It has not been our policy to take a pupil from a regular grade if he is doing the work of the grade satisfactorily and is contented even if the child is three years mentally retarded. Some children who have done very good work in the special classes are sometimes allowed to try the regular grade again. There are a few retarded children in the Willard, John Hancock and Lincoln Schools who should be in a special class, but the two classes serving these schools, one at the Willard School and one at the Lincoln School, are both full.

During the year the teachers and principals referred fifty-two children to the three Clinics serving Quincy. Dr. Patterson of Wrentham examined most of the children, spending nearly three weeks in the Quincy schools.

More children will be examined in the spring and fall of 1931, and results may indicate the need of a Special Class at the John Hancock School, which would relieve the situation of the Lincoln and John Hancock Schools, and also serve the Cranch School, and a class at Adams Shore to care for the retarded pupils from Atherton Hough, Adams Shore, Merrymount and Coddington Schools.

REPORT OF THE SENIOR HIGH SCHOOL PRINCIPAL

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

The annual report for the Senior High School is herewith submitted to you. Our numbers continue to increase but, unfortunately, accommodations do not increase. This is, of course, not a new statement for this school or indeed for the whole city. Nevertheless, we cannot help but be disturbed because large numbers and limited space greatly hamper our work and prevent us from doing for our boys and girls what we might desire. Economic conditions have doubtless been responsible for an unusual increase this year. In October, 1929, there was a membership of 1,791, while in October, 1930, there was a membership of 2,042. So far as I recall this is the largest increase in any single year in the history of the school. We have divided the study halls into class rooms by means of partitions and have used the auditorium for a large study hall. After the semi-annual promotion it will be necessary to hold one or more classes in the cafeteria. It is a pleasure to note, however, that with all the confusion and inconvenience the work goes on happily and on the whole very efficiently.

The increased facilities of our commercial curriculum have served to attract greater numbers to that line of work and also to raise the standard of accomplishment in the department. The absolutely modern equipment for use in our Office Practice classes has been particularly attractive. With the facilities at our disposal we are able to train pupils for almost any type of office work and appear to be rather successful in so training them. Nearly 300 pupils are now studying this work, and every year will bring a substantial increase in numbers. Of course, the technical commercial subjects, shorthand, typewriting and bookkeeping, continue to have a prominent place in our commercial curriculum, and will probably always be regarded as a more or less necessary part of a commercial education. We have given much attention to these subjects because we are attempting to adjust our curriculum to meet the needs of Quincy business men, and apparently a general training in all commercial branches is desired by prospective employers. The collective opinion of business men of the city regarding proper training was obtained and has been of immense value in organizing our work. The next step is to organize a placement department which shall serve to provide our pupils with employment and business men with properly trained office help of all kinds. This department will be established when sufficient space can be afforded to conduct it with any degree of efficiency.

Our efforts along the line of physical education have begun to show results, and we can now look forward to the time when every boy and girl in the school will be engaged in some form of athletics. During the past year 754 boys and 308 girls participated in athletics either in intra-mural or inter-school games representing 10 different sports. The proximity of the Faxon Field with its many resources has been a great help in developing our program of athletics. Our athletic teams have all made a good showing and some of them have been particularly successful. Our soccer team won the New England championship, our cross country team

was undefeated during the season, and our track team won the State championship in its division. In this connection, I wish to deplore the attitude of some people who rate the success of a physical training program and of athletic teams simply by the number of games which the football team may have won. I hope we may never feel ourselves compelled to limit our efforts to such a narrow program as the development of a single sport.

At the graduation exercises in June the following awards were made: Wollaston Woman's Club Scholarships to Hazel E. Berry and Hilja I. M. Malmstrom; Quincy Women's Club Scholarships to Janice Buck and Alice L. Magnant; L'Eco Club Scholarship to Ferrer DiBona; the Washington and Franklin Medal for excellence in American History to Lillian E. Pearce; the Cyril P. Morrisette Post Medal for Scholarship and Athletics to Edwin E. Calvin. The Quincy Women's Club offered two cash prizes for the boy and girl who, in the opinion of the faculty and of their class, had contributed most to the school. These were awarded to Arthur E. Olinto and Dorothy E. Barr.

The usual number of pupils took College Entrance Examination Board examinations in June, and reports from the Board show that they were as successful as pupils from other schools. We had a larger number of new plan candidates than usual and all were accepted at the colleges of their choice. Several of them had honorable mention at these colleges for high marks on their examinations. In connection with entrance to college, I should like to call attention to the fact that there is a growing tendency to insist on five years of preparation for pupils of average ability. Preparatory schools have regularly required five years, and this seems now to be the tendency of public high schools where any real attempt is made to prepare pupils for college.

From time to time I desire to mention departments of the school which are not so well known by the public and perhaps not so thoroughly understood. Our school library is one of these departments. The objectives of the school library are: (1) to enrich the school curriculum by furnishing materials to supplement the textbook and giving directions and guidance in the use of these facilities, (2) to give instruction in the independent use of libraries and books as tools, (3) to foster informational reading as a life habit, (4) to encourage the habit of reading for pleasure, and (5) to develop the library habit. Our school is particularly fortunate in having a well organized library, a trained librarian, and ample resources. The following statistics will show what use was made of our library during the past year:

Total attendance, 28,413 pupils, an average of 33 per period throughout the year.

Total circulation of books, 17,447, an average daily circulation of 101 books.

Two hundred and ninety periods of instruction in the use of books and libraries were given by the librarian to the pupils in English, History, Problems of Democracy, and Commercial Geography classes.

During the past year our assistant principal, Mr. Wilson, made a study of our loss of pupils from causes other than graduation. He obtained some results which will be of interest in a further study of this problem. The greatest loss was in the entering class as might be expected. The total loss was distributed among curriculums as follows: Commercial, 10.6 per cent; General, 14 per cent; Preparatory, 8.4 per cent; Manual Arts, 27 per cent; House-

hold Arts, 40 per cent. The causes for leaving were work, 28 per cent; failure, 28 per cent; moved from city, 14.6 per cent; sickness, 13 per cent; went to private schools, 5 per cent; returned to Junior High Schools, 1.4 per cent; needed at home, 1.8 per cent; died, 1.3 per cent; other various causes, 6.9 per cent. The total loss was 224, which was about 11 per cent of the enrollment of 2,056 pupils. These figures give us some valuable information and show us where some very definite work needs to be done.

In closing, may I say that we are most grateful to you for the kindly help and counsel you have given us and to the School Committee for their support and their willingness to afford us every possible facility for carrying on our work in a satisfactory manner.

Respectfully submitted,

ERNEST L. COLLINS,

Principal of Senior High School.

REPORT OF THE HIGH SCHOOL DEAN OF GIRLS

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

The work of the Dean of Girls of the Senior High School for the year 1930 has been concerned largely with the following:

Extra-curricular Activities—This part of the work has included supervision of the social program of the school, sponsoring of a girls' service club, work with the Student Advisory Council, and various responsibilities in connection with the activities of other organizations.

The Dean keeps activity records of every student. At the present time a study is being made of the extent of participation in the various types of activities and the distribution of participation among the students.

Emergency Room Cases—According to our records, three hundred forty-seven girls have been admitted to the Emergency Room during the past year.

Three cases of accident were taken immediately to the family physician. In one case of illness the School Physician was called.

Among the minor injuries receiving treatment at school were about fifty cases of cuts and bruises. Over two hundred of the cases of illness have been a matter of upset stomach, fainting, headache, etc. This would seem to justify some provision for general instruction in personal hygiene. Work along this line has already been attempted in individual cases. In several instances the girls have been taken to the School Physician for advice.

Other types of cases which have come to the Emergency Room have been blistered heels, something in the eye, falls, toothache, hysteria, burns, splinters, nose bleed, etc.

The supplies used and the treatments given are those recommended by the School Nurse.

Attendance—The Dean has cooperated with the Assistant Principal in the investigation of absences. This has involved daily phone calls and some thirty home visits.

Educational and Vocational Guidance—This has included program guidance, regular check-up and follow-up of failures, college guidance and the gathering and dissemination of vocational information. Catalogues have been obtained from institutions offering various types of advanced training.

Early last spring a questionnaire was distributed among the girls of the school. They were asked to indicate what they planned to do the year following graduation and what they hoped to do eventually. The replies showed a meager knowledge of educational and vocational opportunities and requirements. As an immediate follow-up, personal conferences were held with over one hundred girls.

Here is a line along which much can be done. The girls need to know what opportunities there are in the various fields, what the requirements are, where the necessary training may be obtained, and what work should be done in high school in preparation for advanced training. Such information not only provides a basis for intelligent choice but is valuable as a part of their general education. Also it helps to furnish an incentive and to make high school work more meaningful.

At the present time we are trying to work out a more systematic and complete program of guidance.

In connection with work of this kind, I might mention a series of trips which have been made with interested groups—averaging about twenty-five girls each—to the following institutions: Quincy Hospital (two groups), Deaconess Hospital, Bridgewater Normal, Framingham Normal, Massachusetts School of Art, Simmons College, Radcliffe College. By previous arrangement we were shown through the buildings of the institutions, were given explanations regarding the work offered, and in several instances visited classes.

Individual Cases—Considerable time has been spent in the investigation, follow-up, and study of special cases which have been brought to the attention of the Dean in various ways. Case records have been kept.

The work with the girls has also included placement in part-time positions, supervision of cafeteria marshals, chaperoning of groups upon various occasions, approval of dismissals in cases of illness, and other minor routine and occasional duties.

In addition to the above, I have been teaching two classes of English.

Respectfully submitted,

MILDRED B. HARRISON,

Dean of Girls.

REPORT OF THE SUPERVISOR OF GRAMMAR GRADES

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

It gives me pleasure to submit the following report:

The work of constructing a set of English Objectives for grades five and six has been completed. Those for the first semester have been used or tried out once, with cognizance taken of the children's and teachers' reactions, and have been revised in accordance with the suggestions based upon the groups' reactions. With the close of the second semester the Objectives for that period will be ready for revision.

In accord with the best in educational thought, "that it is both desirable and expedient to bring into closer relationship the materials of geography and history," we are about to reorganize the geography and history objectives of the elementary grades; the reorganization looking forward to the following outcome: (1) the provision of such experiences as will help the child to have a better understanding of the simple problems "of group life" which are common to all; (2) the development of meaningful units of work such as will draw upon the child's past experiences and will impel him to make use of all kinds of subject matter and available supplementary material; (3) the growth in such ideals, attitudes, skills and habits as will make for the child's wholesome participation in the life of his community.

From our use, in the Junior Highs, of the Objectives as worked out for the elementary schools, it has become apparent that certain revisions need to be made. With this end in view, the English teachers have already held two meetings. In making the needed revisions they will be guided, largely, by the principles that good written expression depends upon: "(a) something to say, (b) a valid reason for saying it, and (c) the necessary technical equipment to say it," and that good oral expression depends upon opportunities for cultivating skill in speaking.

The girls and boys of the Junior Highs will contribute their quota to the "thousands of letters of tribute"—now being written by the school children of America—to be presented to Rear Admiral Richard E. Byrd at the convention of the Department of Superintendence at Detroit, Michigan, February 23, 1931.

In closing, I wish again to express to you my sincere appreciation of your continued confidence, and also to thank my co-workers—the principals and teachers—for their splendid inspirational spirit of cooperation and loyalty.

Respectfully submitted,

HELEN MAUDE DELLICKER,

Supervisor of Grammar Grades.

REPORT OF THE SUPERVISOR OF DRAWING

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit my annual report for the Drawing Department of the public schools of Quincy for the year 1930.

In the first six grades special emphasis has been placed this year upon greater originality in representation, and in grades 4, 5 and 6 more free brush design work. Cooperating with the Primary Supervisor, greater stress is being placed in Grade I upon larger and freer drawings. To further this idea, Mr. Muir and Miss Gunell have provided an easel for each first grade and the pupils are much interested in taking turns in painting large pictures.

Miss Vera Stevens, Art teacher at the South Junior High School, resigned to accept a position in the South. Miss Lela B. Smith of the Central Junior High School was transferred to fill her position.

The Drawing Department had an active part in the big Tercenary Parade sponsored by the public schools. The pupils of the Junior High Schools painted about one hundred large signs for the different divisions of the parade, while all the grades, from one through Senior High School, contributed drawings and work for a parading Art exhibit. This exhibit gave a complete review of all branches of the drawing course from its beginning through the Senior High School. The Art Clubs of the Junior High Schools also exhibited their work in this parade.

I am glad to have the opportunity at this time to thank you, Mr. Muir, for your help and interest in this department, also to thank Miss Helen Ash for her faithful and adequate assistance and the teachers and pupils for their loyal cooperation.

Respectfully submitted,

AMY E. ADAMS,

Supervisor of Drawing.

REPORT OF SUPERVISOR OF PHYSICAL EDUCATION

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit the report of the Department of Physical Education for the year of 1930.

The same plan of Physical Education as in former years was followed in the elementary schools. A gymnastic program with a daily ten minute period adapted to the age of the child was conducted. Less formal work was given in the first three grades than in grades four, five and six. In addition to these ten minute periods the supervised recess plan was continued.

A report of progress may be made regarding the graded gymnastic work in the Junior High Schools as mentioned in my report of last year. These lessons when completed will give a definite progression of gymnastic work in grades seven, eight, and nine. The results of the athletic interests in the Junior High Schools may be noted in the table below.

Too little time is available for effective work at the Senior High School as gymnasium classes meet only once weekly, for forty-seven minutes. Nearly two thousand pupils are taking part in gymnastic work under very crowded conditions.

In keeping with the modern trend in Physical Education our Senior High boys and girls are given opportunity to participate in games during gymnasium period. During these games the pupils have a chance to acquire the basic skills of the more common types of games. As a result of this more pupils are playing either on divisional, inter-class, or school teams.

The following table gives by schools the number of boys and girls participating in after-school games throughout the city:

Table

Sport	Senior High		South Jr.		North Jr.		Central Jr.		Quincy Pt. Jr.		Trade School		Totals
	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	Boys	Girls	
Basketball	270	150	200	80	260	80	225	70	150	90	70		1,645
Baseball	80	...	35	...	60	...	118	...	125	...	20		438
Soccer	30	...	80	...	100	...	40	...	275	...	28		553
Slug Ball	90	...	95	...	125	...	125	...		435
Track	130	40		170
Football	122		122
Field Hockey	55		55
Ice Hockey	20		20
Tennis	57	63		120
Golf	10		10
Totals	719	308	315	170	420	175	383	195	550	215	118		3,568

Teams representing the Senior High School won the New England High School Soccer Championship, the State Championship in Track, and were undefeated in Cross Country.

I would not close this report without thanking all for expressions of kindness, both personal and professional, shown during the year.

Respectfully submitted,

WILLIAM H. WHITING,
Supervisor of Physical Education.

REPORT OF THE SCHOOL PHYSICIAN

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

The annual report of the health activities of the School Department for 1930 is herewith submitted.

The program of the year remains practically the same as the one of the previous year of 1929. A brief summary of the most important events is hereby included.

In January the Follow-Up Clinic made its annual visit to Quincy. The following tabulation indicates the results of its work:

Number of children recommended for re-examination.....	239
Number of children re-examined	196
Number of children who refused re-examination.....	14
Number of children absent	29

Improved Group

Number of children found to be improved in 1929.....	119
Number of children remaining improved	99
Number of children found to be unimproved	4
Number of children not re-examined	16
Recommendations for 1930:	
Number of children recommended for sanatorium treatment	3
Number of children recommended for summer camp.....	33

Unimproved Group

Number of children found to be unimproved in 1929.....	79
Number of children remaining unimproved	9
Number of children found to be improved.....	61
Number of children not re-examined	9
Recommendations for 1930:	
Number of children recommended for sanatorium treatment	3
Number of children recommended for summer camp.....	9

A group of 159 children were X-rayed and tested in December preparatory for the physical re-examination to be given by the Follow-Up Clinic during January, 1931.

Another annual event was the program for the series of immunizations treatments, cooperating with the Department of Health in the Diphtheria Preventive Campaign. School children of the first and second grades—numbering 668—were given these treatments. We are again indebted to the Commissioner of Health, Dr. Edmund

B. FitzGerald, and his assistants, for their valuable aid in this very important work of prevention against diphtheria.

The physical examinations of the pupils of the entering class of the Senior High School, and the 7th and 9th grades of our four Junior High Schools, were completed during September by Drs. Rachel L. Hardwick and Ella G. Hedges, who examined the girls, and Drs. Robert L. Cook and George D. Dalton, who examined the boys. All the boys of the Trade School, the athletic group of the Senior High School, and the girls of the entering class of the Home Making School were included in the program of examinations.

The items of nutrition, posture and throat were added to the record cards,—making a total of six definite conditions to be checked by the doctor—namely, Nutrition, Posture, Throat, Heart, Lungs and Hernia. The cooperation of the Supervisor of Physical Education, Mr. William H. Whiting, and the teachers of that department were most efficient in aiding the doctors during these examinations.

The number of employment certificates issued shows a slight increase,—a total of 349 having been granted during 1930.

Examinations for Employment Certificates, Age 14 to 16 Years

	Boys	Girls	Total
Form C Regular	48	8	56
Form D Non-resident.	8	2	10
Form E Limited—temporary	160	4	164
Form F Limited	84	17	101
Special Certificates:			
Farm	1	1
Domestic	4	4
Home Permit	13	13
	<hr/> 301	<hr/> 48	<hr/> 349

In September the physical examinations of the pupils of the first grade of the elementary schools started. Conditions of defects were generally apparent in the same various degrees as in other years. Written notices of these abnormal conditions were sent to the parents or guardians. A greater number of parents were present at these examinations. If a more comprehensive understanding of the importance of the general health of the school child could be presented to the parent, it would seem as if such a viewpoint would be a most helpful and definite factor to correct physical defects.

The scope of routine inspection is practically unchanged. Problems are more numerous as the school population increases. Some idea of the large area covered by this branch of our health work can be visualized very clearly when one glances at the annual report of our school nurses and considers the number of examinations for various causes and also the number of home calls made by them. We are very fortunate to have nurses who render such conscientious and valuable services to advance the health conditions of our school children.

During the past year we have appreciated the value of the encouragement, the helpfulness, and the cooperation everyone has extended to this department, and we very sincerely thank everyone for such splendid support in our work.

Respectfully submitted,

MARIA E. DREW, M.D.,

School Physician.

CONCLUSION

In conclusion, Quincy desires to provide for its children the best education that careful thought and adequate financial support can furnish. The report of the Committee printed in the foreword of this pamphlet is sufficient evidence of their devotion to the general educational program for the welfare of the future citizens of Quincy.

It has been a great satisfaction to serve the city with members of a School Committee with such a manifest desire for the betterment of the school children. The press has given unstintingly of its time and space to chronicle the school news from week to week. The Mayor and Council have been very considerate of the needs of the school system. This type of cooperation has made it possible for the employees of the school system and the teaching staff to register another year's school progress for the City of Quincy. To all I extend my sincere appreciation.

Respectfully submitted,

JAMES N. MUIR,

Superintendent of Schools.

APPENDIX A.

LISTS OF GRADUATES

1. Senior High School

(a) JANUARY, 1930

127

Dorothy Norma Allen	Mary Monica Fruth
Esther M. Asnes	Isabel Dorothy Gabriel
Helen Harriette Avgerinos	Vincent Gallo
Rose Catherine Barnett	Charles Matthew Gill
William Walker Bartlett	Barbara E. Goward
Eugenia E. Benson	M. Theresa Harcourt
Ruth Marie Bigoness	Myerma Reid Hersey
Marion Louise Black	Helene Esther Hodgkinson
Evangeline May Bryan	George Frederick Hollinshead, Jr.
Janice Rosaline Buck	Richard Avery Howard
Alma Minna Burgess	Margaret A. Hughes
Ethel Dorothy Carlson	Eliza Jean Hutchison
Gladys C. Carlson	Beatrice Agnes Irwin
Daniel A. Cellucci	Helene D. Johnson
Harry Candage Chase	Richard E. Johnson
Lawrence Alfred Christensen	Evelyn Margaret Kain
Evelyn Margaret Christie	Helen Esther Kenney
Eleanor Mary Clancy	Avice Williams Kent
Gertrude Elizabeth Cleary	John H. Kerrigan, Jr.
Abraham Nathan Cohen	Kermit R. Kimball
Joseph Louis Coletti	Merriel Kimball
Dora Constantine	Ruth Olive Koss
Joseph F. Coppola	Nathan Kuperman
Marjorie Winifred Corner	Beatrice F. Kurlansky
Ruth Evelyn Craig	Frederick Aaron Leppala
Florence Rand Cushing	Rose Ruth Levine
Henry Cutler	Esther I. Linnea Lindberg
Rose F. D'Alessandro	Sylvia Locke
William Aleck Davidson	Isabell Teal MacBurnie
Gladys Marion DeLuca	Florence Mary MacDonnell
Florence Laura dePourtales	Donald Richard MacMillan
Evelyn Diamond	William Alphonsus Manning
Gilbert Joseph Dillon	Louis Matcovsky
Catherine Pasqua DiPanfilo	Ernestine L. Meda
Emily Elizabeth Dixon	Dorothy L. Melendy
Mary Elizebeth Donovan	Olga E. Mikkola
William Alfred Duffy	John Henry Millar
Anne Dunlavy	Dorothy Irene Moles
Elizabeth Whipple Dunlavy	Dorothy Frost Monroe
Oscar Eugene Eckblom	William H. Mowbray
Helen Agnes Egan	Earl Keefe Murphy
Gladys R. Evans	Walter Olavi Nisula
Marion Evans	Morgan Joseph O'Regan
Donald Stanley Fairfield	Pauline Pavan
Frederick Charles Fallon	Robert Wilbur Payne
Henry Martyn Fisher	Edna Mela Persion
Sadie Fleishman	Alph Bernard Peterson
Evelyn Clara Fontana	John Gardiner Pinkham
Dorothy Mae Franzi	Merlyn Richardson

Arvo M. Rintamaki
 Albert H. Sherman
 Signe S. Siitonen
 Edith Mae Silverman
 Mary Whiting Simmons
 Bernice Elizabeth Smith
 Lillian A. Smith
 Walter M. Smith, Jr.
 Hazel May Steeves
 Robert P. Stevens

Vera Isabelle Newell
Grace L. Nicholson
Abigail Norris
Frances E. O'Connor

Anna A. O'Leary	Donald C. Spaulding
Mary Agnes O'Leary	J. Carlton Spear
Arthur Emerson Olinto	Ruth Elizabeth Spear
Theodore O. Olson	Robert J. Spillane
Mary Rose Palmisano	Dorothy Squire
Helen E. Patten	M. Bertha Steele
Alice Gertrude Paul	Ida Stern
Alfred G. Pawsey, Jr.	Flora I. Stewart
Lillian Eleanor Pearce	Thelma M. Sullivan
Carl William Pearson	Helen Jacquelyn Sweetser
Louis Pellegrini	Dolores Sylvia
Marion J. Peterson	Catherine Christina Tangney
Kathryn L. Phillips	Donald John Taylor
A. Harry S. Pimentel	Reynold Arthur Taylor
Helen Saunders Pinkham	Dorothy L. Thomas
Mary Elizabeth Pitts	Arthur Wellington Tucker
Louisa Alice Pothoff	Jean F. Turnbull
Louise E. Praderio	Erle Leighton VanBuskirk
Margaret Helen Pyyny	Arthur R. Van Horn
Alice S. Rahko	Robert D. Veronese
William Ranalli	Lester Eugene Walker
Aino Sylvia Rautiainen	James D. Walsh
Aaron Keever Redcay	Helen Elizabeth Washburn
John X. Regan	John W. Wastcoat
Helen Concetta Restelli	William Howard Webber
Richard E. Rice	Marion White
O. Wendell Rogers	Florence Harriet Whittemore
Kenneth Franklin Ryder	William Melville Whitten
Josephine Julia Salvucci	Vellamo Wilander
Evelyn Marie Savard	Doris Lillian Williams
Dorothy M. Scannell	Barbara Mary Wirtz
Gretchen Elizabeth Schragle	Constance Agnes Wood
Ruth C. Sennott	Ruth Carol Woods
Tillie Shaevitz	Arthur W. Wyman, Jr.
Margaret V. Shea	Grace Anthea Young
Doris Winifred Sherriff	Linwood Boice Young
Hugh H. Smith	Robert Blithen Young

2. Graduates from the Home Making School, June 1930—16

Lucy Conceda Theresa Bosco	Edith M. May
Elsa Marie Casagrande	Elva Lillian Parsons
Dorothy Theresa Dorley	Josephine Pauline Rusconi
Anna Linea Grahn	Margaret Genevieve Surett
Edith Irma Bell Lord	Lillian Grace Turner
Theresa Margaret Mallett	Hildegard Agnes Wallander
Marjory Malnati	Lois Nancy White
Antoinette Theresa Marini	Madeline Harris Wight

3. Graduates from the Trade School, June, 1930—46

Electrical Department

David Gill Bowness	John Charles Martell
Walter L. Burrill	Thomas Philip McGeoghegan
Pasquale Henry Colarusso	Cornelius Xavier Murphy
Hugo Coletti	Roy Stanley Nilson
Robert Oliver Fisher	Nicholas Henry Ward
Gordon Joseph Hathaway	

Plumbing Department

George Cedarstrom	John Francis Perucich
Attilio DiTullio	Joseph Purpura
David Goldman	Charles Wilson Riley
Angelo John Grazioso	Carl Taylor
Thomas James Hefler	Lewis Wanless
Frederick James Murphy	

Auto Mechanic Department

Christopher Berio	Raymond D. Russell
Russell W. Donovan	Everett S. Todd
Willard M. Lonergan	Edwin N. Wenton

Cabinet Making Department

Roderick Benotti	Roy Swenson
Robert Haughton Dexheimer	Sulo Tuori

Sheet Metal Department

John E. Bates	L. Heber Crawford
Tony Brandolini	John E. Hayden
Robert L. Burchell	Ladd Lewis

Machine Department

Herbert Berg	Arthur F. Jellows
Lambert Gustafson	Harold E. O'Neill

Pattern Making Department

Edelweiss L. Biloni	George R. Roberts
Victor Everett Harlow	Ferdinand Sisti

APPENDIX C

SCHOOL STAFF AND TEACHERS' ORGANIZATIONS

1. Organization of Staff, December, 1930

Black face signifies attended without graduation.

Attendance for less than one year at an institution is not noted.

JAMES N. MUIR, B.S., Superintendent, University of Pennsylvania;
elected 1927

ALBERT H. COCHRANE, Ass't Superintendent, Harvard, A.B., Ed.M.;
elected 1925

Senior High School—Coddington Street

Teachers	Department	Where Educated	Date of Election
Ernest L. Collins.....	Head Master	Bates College	1912
George A. Wilson.....	Submaster, Physics	Massachusetts Institute of Technology	1921
Mildred B. Harrison..	Dean of Girls, English....	Wellesley College, George Washington University	1929
Felix V. Cutler.....	Social Science department	Bates College, Harvard University, Ed.M....	1926
